Three $10,000 Research Grants Available Through ONS Foundation

- **One Neuro-Oncology Research Grant** focusing on symptom management, support systems, or quality of life in neuro-oncology patients and their families.
- **One Research Grant** focusing on pain assessment and management.
- **One Research Grant** focusing on certification, nursing education and/or outcomes research.

Eligibility Criteria
The principal investigator must be actively involved in some aspect of oncology patient care, education, or research. Funding preference is given to projects that involve nurses in the design and conduct of the research activity and that promote theoretically based oncology practice. Membership in ONS is not required for eligibility. The $10,000 award is given at the beginning of the award period; the researcher has two years to complete the study.

Deadlines
Letters of intent are due **March 26**.
Applications are due **April 23**.

New Research Funding From ONS Foundation

Adherence to Oral Chemotherapeutic Agents Research Grant (RE37) Funding Now Available

Applications are invited for research proposals that address adherence to oral chemotherapeutic agents, including targeted therapies. A major goal of the Oncology Nursing Society Foundation is to provide funding to support the ONS Research Agenda. The agenda's focus is on areas where gaps exist in the knowledge base for oncology nursing practice.

One $160,000 grant award with a funding period of up to two years ($80,000/year) is available. Letters of intent are due **March 19,2012**, and applications are due **April 19, 2012**. For more information and an application, visit: http://www.onsfoundation.org/apply/re/Adherence

Council for the Advancement of Nursing Science
Call for Abstracts

The Council for the Advancement of Nursing Science

Better Health through Nursing Science

An Open Membership Council of the American Academy of Nursing

CALL FOR ABSTRACTS

The Council for the Advancement of Nursing Science is now accepting research abstracts for the 2012 National State of the Science Congress on Nursing Research

Conference Dates and Location:

September 13-15, 2012: Washington Hilton Hotel, Washington, DC

General guidelines for submission of abstracts

Papers, posters and symposia will be selected that best exemplify the state of nursing science in the particular area in which the work was completed. Only abstracts derived from completed research will be accepted. Abstracts should clearly specify the contributions of the work to the current state of nursing science. Areas of special interest include research technologies and health innovation. **We encourage Authors to submit multiple abstracts due to an increase in presentation opportunities at this year's meeting.**

Review and selection

The 2012 Abstract Review Committee will determine the final selection of abstracts based on scores and recommendations from peer reviewers. Reviews will be completed based on submitter-identified abstract categories.

Abstracts must be submitted electronically via the online process which can be accessed at http://eabstracts.postergenius.com/cans2012/ or by visiting the Council's website at www.nursingscience.org.

Timeline

The online abstract submission process ends at 11:59 PM (EST) on February 15, 2012. The review process will begin in late February and announcements are scheduled to take place in May/June 2012.

For more information

The abstract submission process is self-explanatory once you arrive on the website--click on the 'Submit New Abstract' box and begin the process. You are able to go in and edit your abstract through February 15 by clicking on the 'Edit Previous Submission' box. After February 15, the abstract is considered final and will be reviewed based on the content provided. If you should have specific questions that are not addressed please email support@scigentech.com. You are also encouraged to visit the Council's website at www.nursingscience.org for additional conference information.

Your 250-word abstract should include:

Title: A brief statement of the nature of the investigation or purpose of the project.

Authors: All authors and affiliations.
Aims: The overall purpose, research question, or study hypothesis.
Methods: The study or project design and methods (sample, procedures, measures, and/or data analysis).
Results: The study or project findings or products.
Conclusions: The overall impact of findings and relevance to nursing or healthcare science.
