

Division of Nephrology & Hypertension

8th Annual CME Program

Preserving Nephrons in Everyday Practice: Strategies and Opportunities

Friday, September 12, 2008
7:30 am – 3:30 pm

The Marriott Residence Inn – Riverplace
2115 SW River Parkway
Portland, Oregon 97201

Course Objectives

1. Inform and update the primary care practitioner regarding early diagnosis and reno-protective management of chronic kidney disease (CKD). The 2008 course will review both established and newly emerging strategies for long-term protection of renal function in patients with mild to moderate chronic kidney disease (CKD).
2. Review issues the primary care provider faces in early diagnosis and management of CKD.
3. Provide an update on sources of nephrotoxicity and measures for minimizing or preventing renal toxicity.
4. Provide data on efficacy and on practical guidelines for safe use of renin inhibitors in resistant hypertensive states.
5. Review and update information on the remarkably increased cardiovascular risk associated with even mild degrees of CKD.
6. Provide emerging information on the diagnosis and management of renal stone disease, as a common condition with potential for permanent renal injury.
7. Review the pharmacology of available antihypertensive agents with emphasis on tailoring choice of agents to the individual patient.

Course Description

This annual program is designed to inform and update the primary care practitioner regarding early diagnosis and reno-protective management of chronic kidney disease (CKD). The 2008 course will review both established and newly emerging strategies for long-term protection of renal function in patients with mild-moderate chronic kidney disease (CKD). The course content will include a review of issues that the Primary Care Provider faces in early diagnosis and management of CKD; update on sources of nephrotoxicity and measures for minimizing or preventing renal toxicity; data on efficacy and on practical guidelines for safe use of new renin inhibitors in resistant hypertensive states; review/update of information on the remarkably increased cardiovascular risk associated with even mild degrees of CKD; emerging information on diagnosis and management of kidney stone disease; and an overview of antihypertensive agents that emphasizes tailoring choice of agents to the individual patient.

GENERAL INFORMATION

LOCATION:

The Marriott Residence Inn – Riverplace
2115 SW River Parkway (not Naito Pkwy or Downtown)
Portland, OR 97201
www.residenceinn.com/pdxri

This is not the Naito Parkway or Downtown Marriott.
Please check the hotel website for directions.

PARKING:

Day parking is complimentary for conference attendees at the Residence Inn-Riverplace. Drive past the hotel to the end of River Parkway, just before the road turns around; take a right into the gated area. Follow the signs to the parking area behind the hotel.

REGISTRATION:

Pre-registration is required to ensure course materials will be available. We will send a registration confirmation to your email address. Same day registration may be available if space permits. Space is limited to 100 participants. No refunds or cancellations after September 8, 2008.

Should conditions warrant, the sponsors reserve the right to cancel this program and provide a full refund of registration fees.
