The Center for Health & Healing South Building Project is a $349 million, 750,000 square-foot building project that comprises two buildings: a 14-story health care facility and a 10-story mixed-use building that includes a patient guest house. Construction began in January 2015.

The first seven floors of the health care facility (Block 29) will be dedicated to invasive surgeries and procedural care. Above it, The Knight Cancer Institute will consolidate outpatient clinics, infusion and clinical trials space.

The mixed-use building (Block 28) will include five floors of temporary lodging for patient families who travel long distance to access OHSU’s specialized services, conference facilities and above-ground parking.

Hoffman Construction is building the project, and ZGF Architects designed it. Both parts of the CHH South Building Project are slated to open July 2018.

**Health care facility:**
- Surgery and interventional procedures
- Clinical and research space for the Knight Cancer Institute, including oncology clinics, infusion area and space for clinical trials
- Clinical space for the Digestive Health Center and Preoperative Medicine Clinic
- Retail pharmacy
- Lab services
- Healthy food options
- Open waiting spaces and access to outdoor terraces

**Guest house building and parking garage:**
- 76 units for patients and families
- Laundry facilities on each floor
- Indoor/outdoor spaces for children to play and adults to relax
- Communal kitchen and dining room
- Exercise space
- Conference center
- Space for a future urgent care center

**OHSU at a Glance (FY15)**
- Patients: 258,914
- Patient visits (hospitals and medical/dental clinics): 938,740
- Employees: 15,098
