

NON-RENAL ELECTRON MICROSCOPY REQUEST
OREGON HEALTH SCIENCES UNIVERSITY
DEPARTMENT OF PATHOLOGY

PATIENT'S NAME _____

OHSU PATIENT'S UNIT NO. _____ ACCESSION NO. _____ EM NO. _____

REFERRING PHYSICIAN _____

HOSPITAL _____

SPECIMEN _____

PERTINENT CLINICAL INFORMATION _____

REASON FOR REQUESTING ELECTRON MICROSCOPY _____

Please be sure to tell the EM people why the study is being requested. If tissue in glutaraldehyde is not immediately submitted for EM, the vial should be placed in the labeled box in the refrigerator in the cutting room.

Any time fresh tissue is obtained in which it is foreseen that diagnosis might be a problem, tissue should be reserved in glutaraldehyde for EM. At the time the case is signed out with the staff it should be brought to his/her attention that glutaraldehyde fixed tissue is available.
