

Collaborative Quality Measurement and Reporting Initiative

Partner for Quality Care: Information for a Healthy Oregon is a collaborative initiative managed by the Oregon Health Care Quality Corp to bring together health plans, purchasers, the public, and primary care practitioners to develop a system to measure and improve health care quality in Oregon. The initiative embraces a three-pronged approach: measure the quality of health care; help practitioners use quality measurement information to improve systems of care; and educate the public about their role in contributing to quality health care. Public reporting of measures for clinics with four or more adult primary care practitioners will occur in late 2009. If interested in learning more about the initiative, please contact: Paige Webster at paige.webster@q-corp.org.
