Adult: Neuro-Oncology Treatment

Primary Central Nervous System Lymphoma (PCNSL)
- Newly Diagnosed
- Recurrent

IRB#11601
Phase II study of maintenance obinutuzumab for primary central nervous system lymphoma
Complete responders

IRB#1012
Phase I/II study involving Carboplatin and Methotrexate administered with Blood-Brain Barrier opening, and Rituximab
No Trials Currently Available

No Trials Currently Available

IRB#922
Phase II study involving Carboplatin, cyclophosphamide, and etoposide phosphate administered intra-arterially; randomized to receive/not receive Delayed Intravenous Sodium Thiosulfate Chemoprotection

IRB#2868
Phase I/II study involving Carboplatin, Melphalan and Etoposide Phosphate administered with Blood-Brain Barrier opening and Delayed Intravenous Otoprotective Sodium Thiosulfate

Glioma
- Newly Diagnosed or Recurrent
- Recurrent

IRB#5056
Phase I/II study involving Melphalan and Carboplatin administered with Blood-Brain Barrier opening and Delayed Intravenous Otoprotective Sodium Thiosulfate
No Trials Currently Available

CNS Embryonal or Germ Cell Tumor
- Newly Diagnosed
- Recurrent or Refractory

Key
- Open for Enrollment
- In Development
- Enrollment on Hold
