Adult: Neuro-Oncology Treatment

**Primary Central Nervous System Lymphoma (PCNSL)**
- **Newly Diagnosed**
- **Recurrent**
  - IRB#11601 Phase II study of maintenance obinutuzumab for primary central nervous system lymphoma Complete responders
  - IRB#1012 Phase I/II study involving Carboplatin and Methotrexate administered with Blood-Brain Barrier opening, and Rituximab
- **No Trials Currently Available**

**Glioma**
- **Newly Diagnosed or Recurrent**
- **Recurrent**
  - IRB#922 Phase II study involving Carboplatin, cyclophosphamide, and etoposide phosphate administered intra-arterially; randomized to receive/not receive Delayed Intravenous Sodium Thiosulfate Chemoprotection
  - IRB#2868 Phase I/II study involving Carboplatin, Melphalan and Etoposide Phosphate administered with Blood-Brain Barrier opening and Delayed Intravenous Otoprotective Sodium Thiosulfate
- **Key**
  - Open for Enrollment
  - In Development
  - Enrollment on Hold

**CNS Embryonal or Germ Cell Tumor**
- **Newly Diagnosed**
- **Recurrent or Refractory**
  - IRB#5056 Phase I/II study involving Melphalan and Carboplatin administered with Blood-Brain Barrier opening and Delayed Intravenous Otoprotective Sodium Thiosulfate
  - No Trials Currently Available

**High Grade Glioma**
- **Anaplastic Oligodendroglioma or Oligoastrocytoma**
