Head & Neck

Squamous Cell Carcinoma of the Head and Neck

Surgical

Pre-op Intervention

IRB #9434
Prophylactic anticoagulation for the prevention of venous thromboembolism (VTE)

Post-op Intervention

IRB #10613
Phase II study of transoral surgical resection followed by low-dose or standard-dose IMRT for p16+ oropharynx cancer

IRB #6918
Phase III study involving Postoperative Radiation Therapy +/- Cetuximab

Non-Surgical

HPV positive

No trials currently available

IRB#10972
New study to be available soon

HPV negative

No Trials Currently Available

IRB#11957
Double Blind, Phase II Study of Nivolumab in Combination with Ipilimumab vs Nivolumab and placebo for SCCHN

IRB#16230
Double Blind, Phase II Study of Nivolumab in Combination with Ipilimumab vs Nivolumab and placebo for SCCHN

Recurrent Metastatic

1st Line

No Trials Currently Available

2nd Line

No Trials Currently Available

Post-op Intervention

No Trials Currently Available

IRB#8092
Phase II study involving concurrent radiation and chemotherapy versus radiation alone

Surgical

No Trials Currently Available

Cutaneous Squamous Cell Carcinoma

Salivary Gland Cancer

Squamous Cell Carcinoma of the Head and Neck

Surgical

Pre-op Intervention
