Multiple Myeloma (MM)

New Diagnosis
- Transplant
  - IRB #9398 Phase III comparing lenalidamide, bortezomib, dexamethasone (RVD) to high dose treatment with peripheral stem cell transplant
- Non Transplant
  - IRB #15608 Phase III trial of bortezomib, lenalidomide and dexamethasone versus carfilzomib, lenalidomide and dexamethasone, followed by lenalidomide maintenance in newly diagnosed symptomatic myeloma
- Observational
  - None Available

Relapsed / Refractory
- Failed One Previous Therapy
  - None Available
- Failed Two Previous Therapies
  - IRB#15214 Phase 1a/1b INCB052793 in advanced malignancies
  - IRB#15863 SL-401 plus Pomalidomide and Dexamethasone in Relapsed/Refractory Myeloma
  - IRB#15430 Study coming soon

Key
- Open for Enrollment
- Enrollment on Hold
- In Development
