

Legacy Emanuel General Surgery R-2 Orientation

This is a six week R-2 rotation at Legacy Emanuel Hospital with Drs. John Zelko and Richard Jamison based on the mentorship model of education. The clinical focus will be on complex abdominal and emergency general surgery. The resident is expected to function as a “junior partner” and is responsible for all patients on the service unless otherwise instructed (usual census is 3-8).

Schedule:

The resident is NOT expected to round on the service before Monday morning OHSU conference.

Report to the OR for all cases. Chose case of choice if both attendings are operating in separate rooms. If no cases are scheduled, then report to clinic.

Dr. Jamison sees clinic patients Monday and Tuesday mornings.

Dr. Zelko sees clinic patients Tuesday and Thursday mornings.

Staff the Legacy Emanuel Surgery Resident Clinic Wednesday mornings from 9-11AM. This is mandatory for the R-2.

Surgical M&M Conference is Friday 7-8AM. The resident is NOT expected to round before conference.

Call:

The resident will carry the service pager from 7AM to 5PM Monday through Friday.

Drs. Jamison and Zelko take all night calls Monday through Thursday except on ER call days when primary call will be directed to the resident for new consultations.

The resident will take Friday and Saturday home call (or Sunday if preferred) with either Sunday or Saturday off.

There is significant flexibility given personal events or other needs.

All RRC work hour regulations will be observed without exception.

Policies:

Drs. Jamison and Zelko are ALWAYS available to answer questions. You are encouraged to ask them.

Legacy Emanuel R-2 Rotation

Introductory Description:

The General Surgery R-2 rotation at Emanuel is based on the mentorship model. This is a six week rotation with Drs. John Zelko and Richard Jamison whose private practice is focused on complex abdominal and emergent general surgery. The resident will function as a junior partner with progressive independence as reasonable throughout the rotation. There is no other resident or PA assigned to the service or available for cross cover.

Goals and Objectives:

Develop understanding of private practice dynamics, both office and hospital-based.

Develop and refine effective interpersonal skills with allied medical personnel and consultant physicians.

Refine patient assessment and management skills by taking initiative in complete decision-making process.

Exploit the mentorship model of physician education by emphasizing the differences in age and experience between the attendings and resident.

Method of Teaching:

Socratic Method, responding to specific patient disease processes and management needs.

Evaluation Method:

360 degree evaluation process involving the resident, ward and OR nurses as well as specific patients and both attendings.
