

***New Doernbecher NICU - Doernbecher Neonatal Care Center (DNCC)***

Newborn babies who need intensive medical attention are often admitted into our neonatal intensive care unit, also known as the Doernbecher Neonatal Care Center (DNCC). The DNCC combines advanced technology and trained healthcare professionals to provide specialized care for the tiniest patients. The neonatal care center also has intermediate or continuing care areas for babies who are not as sick but do need specialized nursing care.

Every year, Doernbecher cares for hundreds of newborns and babies from throughout the Northwest in our 46-bed neonatal care center. Doernbecher pediatric intensive care specialists are committed to providing each child with the highest quality care, in a family-centered environment. The DNCC is the place where other neonatal intensive care units across the region refer their most seriously ill newborns

Funds donated by Friends of Doernbecher will help develop a new Doernbecher NICU facility.
