

2014 Asian Pacific American Heritage Month

Asian Pacific Islander Employee Resource Group and Center for Diversity & Inclusion

Patient Care in the Context of Culture

Thursday, May 29, 2014 | 12-1pm | BICC Gallery

The Asian Pacific Islander Employee Resource Group hosts a panel discussion among OHSU faculty and providers on the topic of cultural competent care. Panelists will discuss their personal and clinical experiences in providing culturally competent care for Asian Pacific Islander (API) and other diverse patients. The discussion will focus on psychosocial and cultural facets that are unique to API communities, and highlight each provider's unique perspectives about integrating a patient's belief systems into their treatment or care plan.
