
Welcome to FACULTY of 1000

F1000 is a post-publication peer review service based on the opinions of 10,000 of the world's top researchers and clinicians. These experts systematically pick the best published research and write short evaluations explaining why they rate these articles so highly. The evaluations are published on F1000.com as a comprehensive database that covers important and interesting research from more than 3,500 journals. **More than 240 papers written by OHSU researchers have been rated by the experts at F1000.**

Oregon Health & Science University subscribes to Faculty of 1000, which means you have full access to F1000 content within the institution's IP range and externally, using roaming access, if you set up [MyF1000](#).
