

## **“Top 10” Oral Pathology/Oral Medicine Issues With Jeff Stewart, DMD, John R. Smith, PhD, and Brett Ueeck, DMD, MD**

You don't need to stay up until midnight and catch David Letterman to get the latest Top 10 List! Just attend this 3-hour session to review those conditions that you will see most frequently in your daily practice of dentistry. OHSU faculty specialists will share their expertise with you. Dr. Jeff Stewart will discuss the 10 most common oral lesions/oral pathology conditions. Dr. John R. Smith will review the 10 most common medications/drugs being taken by patients and their affect on dental treatment. Dr. Brett Ueeck will summarize the latest information available on the top 10 dental complications associated with bisphosphonates. You won't want to miss this important and timely information of vital importance to all practitioners.

**Speakers: Jeffery CB Stewart, DDS, MS** is Associate Professor in the Department of Pathology & Radiology at the OHSU School of Dentistry. He has been a Diplomat of the American Board of Oral and Maxillofacial Pathology since 1987. He practices in the Faculty Dental Practice including serving as one of the oral pathologists in the biopsy service. Dr. Stewart has been invited to lecture at national, regional and local levels throughout the country. He has published over eighty articles, abstracts and book chapters.

**John R. Smith, PhD**, is Professor of Pharmacology in the Department of Integrative Biosciences at the OHSU School of Dentistry. Dr. Smith received his MS and PhD in pharmacology/toxicology from Oregon State University and completed a post-doctoral fellowship in pharmacology at the University of Washington. He is currently the course director for all pharmacology classes offered to dental resident students and undergraduate dental students at OHSU-SD. Dr. Smith is currently a member of the pharmacology section of the ADA's Test Construction Committee for the National Board Exam.

**Brett A. Ueeck, DMD, MD** - Dr. Ueeck spent the last ten years at Oregon Health & Science University completing his training to become an Oral and Maxillofacial Surgeon. His training consisted of six years of combined dental and medical education and four years of surgical training including one year as a general surgery resident. Presently he is an assistant professor in the Departments of Oral and Maxillofacial Surgery and General Surgery. His primary clinical interest is the treatment of oral cavity cancer and reconstruction.

## **Medical Emergencies Update With Steven Beadnell, DMD**

Medical Emergencies occur in dental offices on a daily basis. Dentists and their staffs have an ethical and medicolegal obligation to be able to recognize and appropriately respond to these emergencies. This course will review the prevention, diagnosis and management of common medical emergencies in the dental office. Course content is appropriate for the entire dental team and fulfills the Oregon Board of Dentistry's relicensure requirements for medical emergencies and anesthesia permits.

### **Objectives:**

- Be able to determine what emergency equipment is appropriate for your office to have available for the management of medical emergencies.
- Develop a knowledge base within the entire dental team to allow them to develop an emergency response plan appropriate for their office.
- Be able to review the medical history and recognize which patients are at risk to develop specific medical emergencies
- Understand the signs and symptoms of common medical emergencies and develop a rational approach to their management in the dental setting.

**Speaker:** *Steven W. Beadnell, DMD graduated from Oregon Health & Science University, School of Dentistry in 1980. He completed a general practice residency upon his graduation and then completed his oral & maxillofacial surgery training at David Grant USAF Medical Center. He has been in private practice in Portland since 1991 and is Adjunct Associate Professor at OHSU in the Department of Oral Maxillofacial Surgery.*
