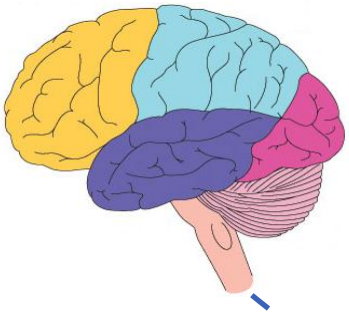
Parents of 8-12 Year Old Siblings!



Have you ever wondered….

What is ADHD?
What about brain activity?
Does it differ in siblings?

Help us study it!

ADHD Research Study

Examining Siblings with and without ADHD

What's Involved?

- One initial screening visit at OHSU
- Possible follow up testing visit and MRI Scan
- Each visit lasts 2-3 hours
- Kids get a cool brain picture from their MRI

Who's Eligible?

- 8 to 12 year old biological siblings In good health with or without ADHD
- If taking a stimulant medication for ADHD/ADD, they must be off that medication for some visits
- Must be right-handed and have no permanent metal in their bodies

APPROVED: May 21, 2013

What Is Brain Imaging?

A brain image is obtained using a magnetic resonance imaging (MRI) scanner. It is a non-invasive machine that takes a picture of the brain. No radiation or injections. It is safe for all ages.

COMPENSATION	To Parent	Each Child
Screening visit:	$30	$20
Testing & Scan visits:	$60	$50
