

My Break Time Brain Book

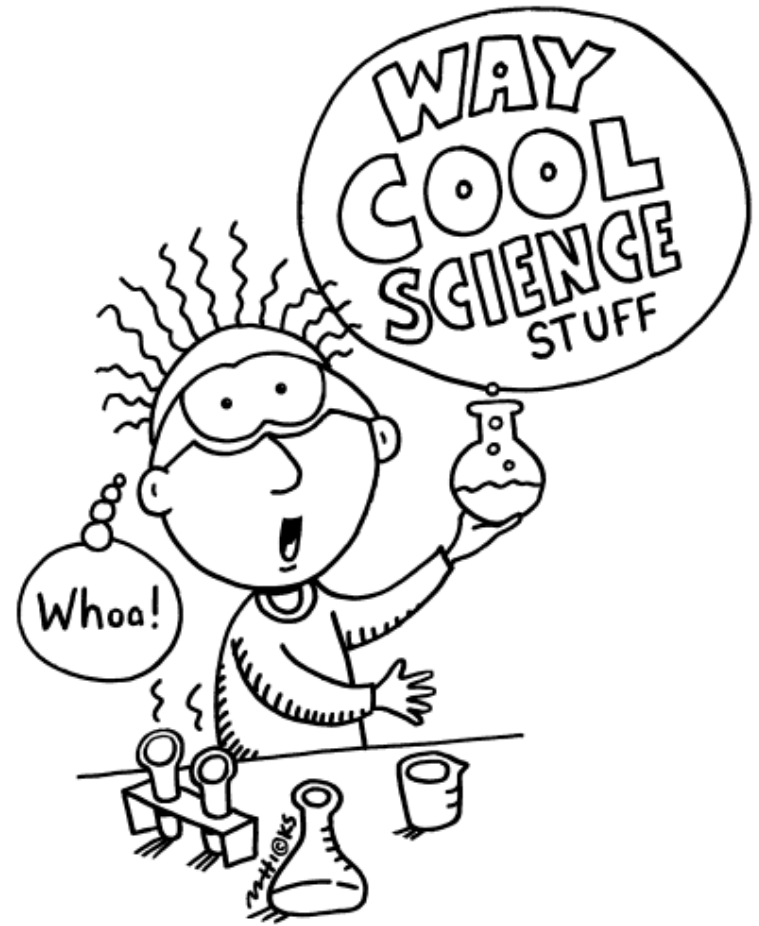

By: _____

I am a scientist!

I think like a scientist every time I try to learn something new.

Today, I'm learning new things about my brain!

There are **four** main parts of my brain.

1) Parietal

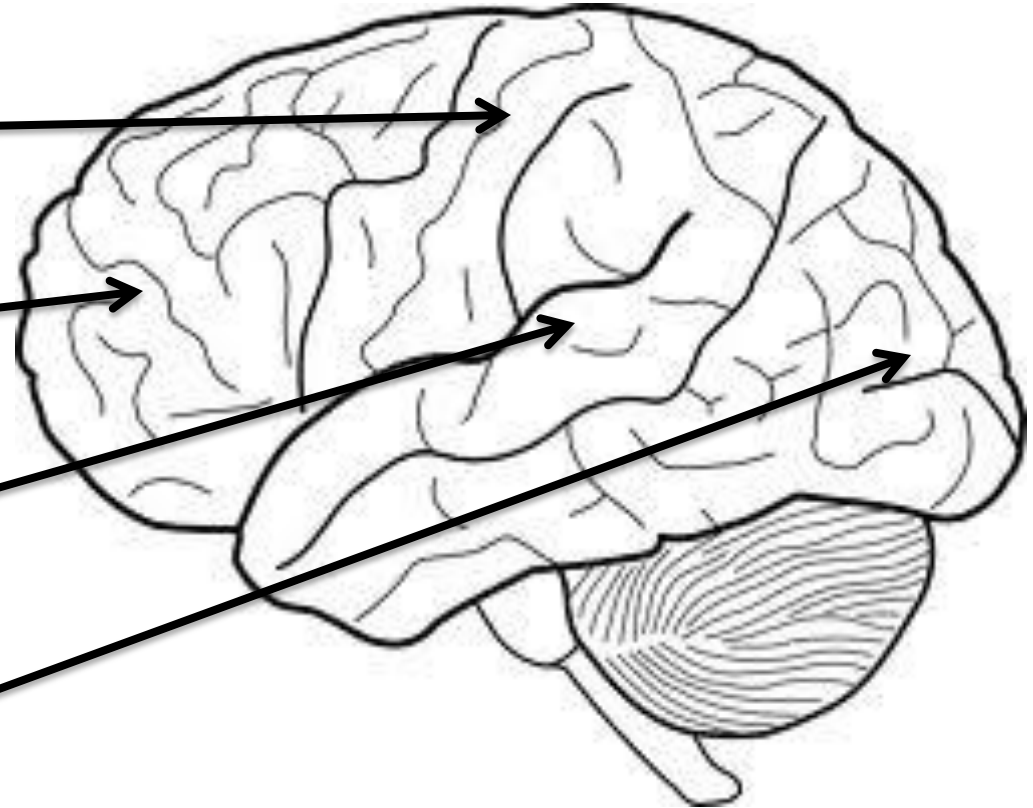

2) Frontal

3) Temporal

4) Occipital

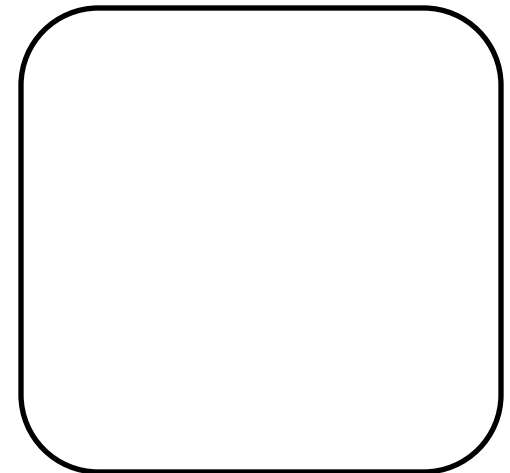

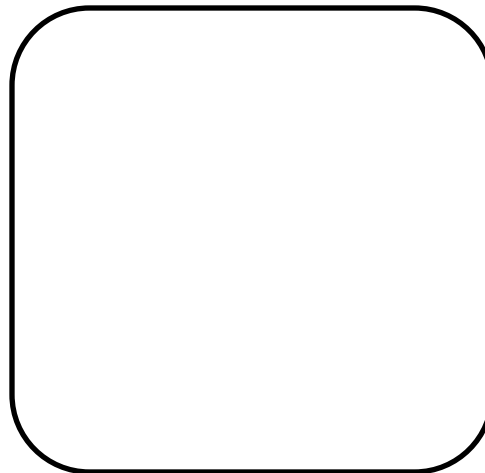

The **parietal** part is at the **top** of my head.

The **parietal** part of my brain helps me **feel** sensations, like:

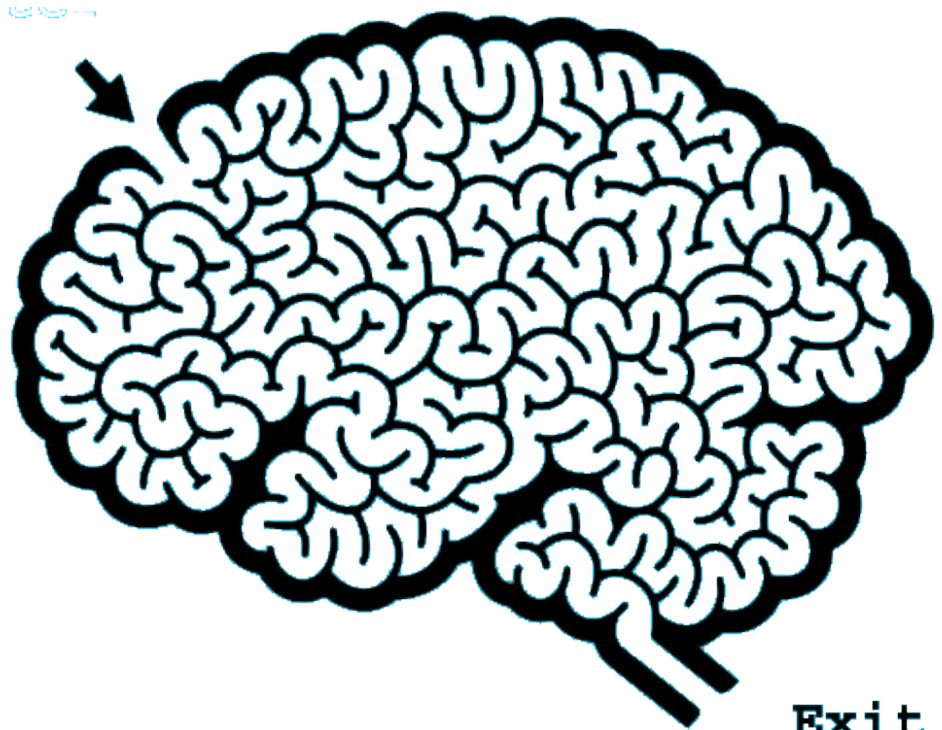

- 1) Hot
- 2) Cold
- 3) _____
- 4) _____

The **frontal** part is at the **front** of my head.

The **frontal** part of my brain helps me **solve problems**.

I'm using the frontal part of my brain when I solve this maze!

The **temporal** part is at the **sides** of my head.

The **temporal** part of my brain is where my **memories** are saved.

I'm using the temporal part of my brain when I draw a happy memory.

The **occipital** part is at the **back** of my head.

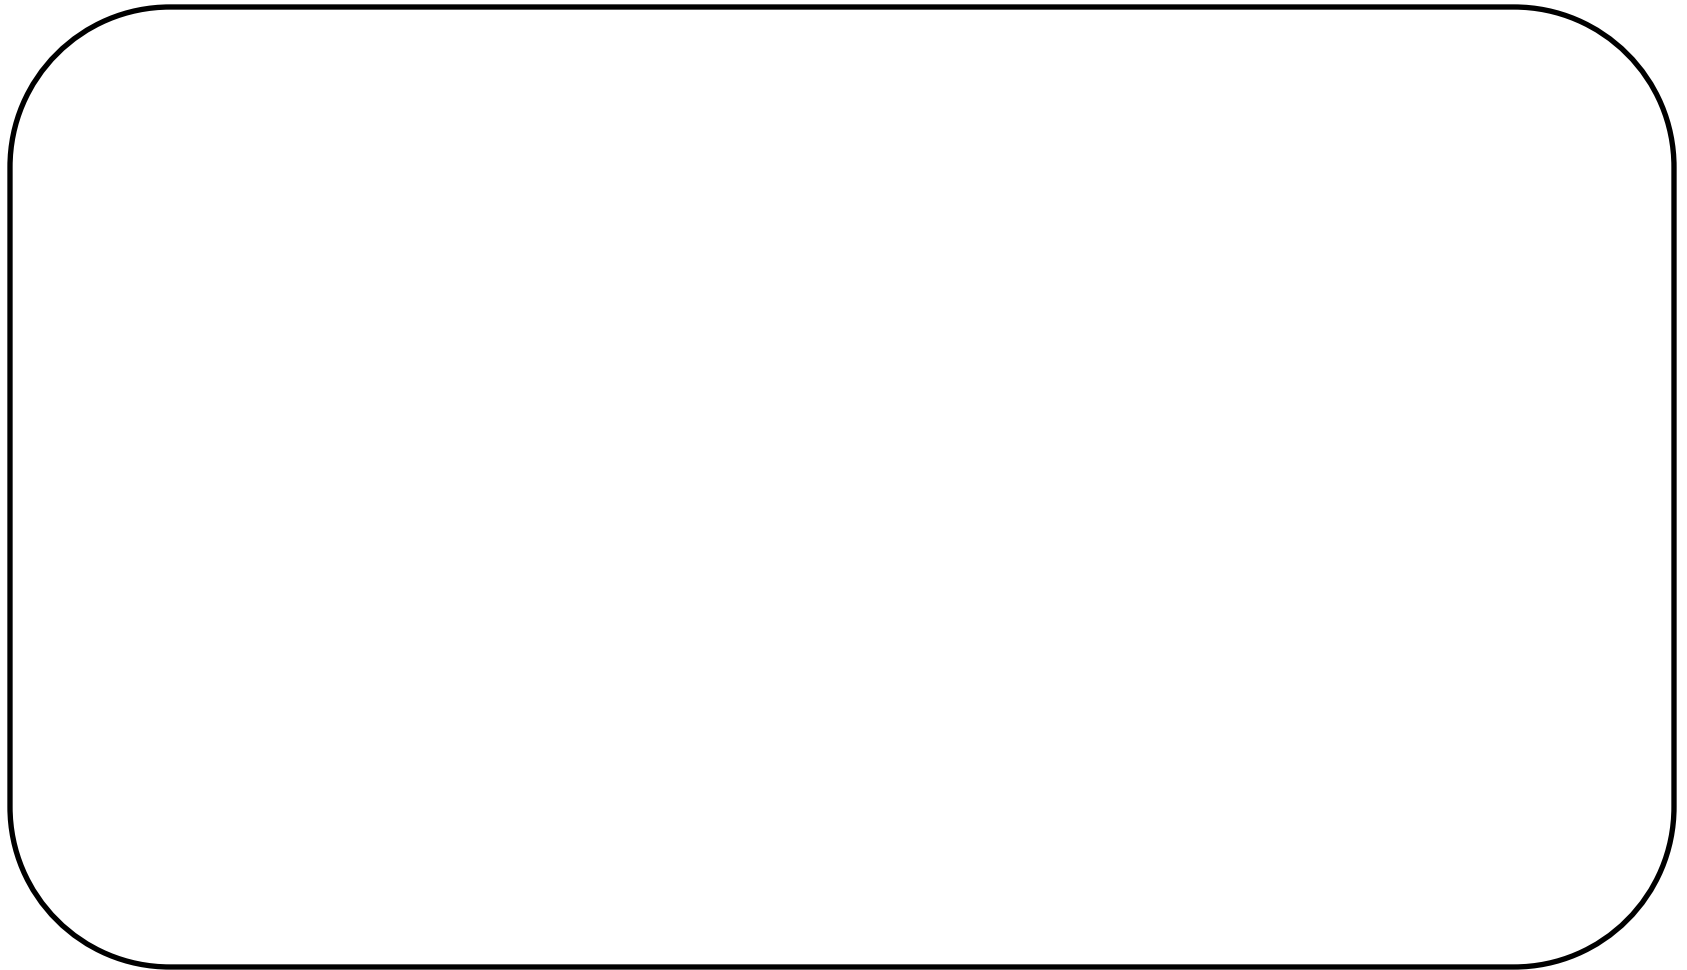

The **occipital** part of my brain helps me **see** things.

Some things I see now:

- 1) MRI machine
- 2) My research buddy
- 3) _____
- 4) _____

I learned a lot of cool things today.

Here's a picture of the coolest thing I learned today.
