

Molecular and Medical Genetics Grand Rounds  
2007-2008 Grand Rounds Schedule  
**Thursdays, 9:00 to 10:00 A.M., Mac Hall 3198**

- September 27      Kory Keller, M.S., C.G.C., Genetic Counselor  
                          “Tales of woe: the unfortunate story of pediatric NF2”
- October 11         Donald Basel, M.D., Genetics Resident  
                          “Use of Hammerhead Ribozymes in a Murine Model of Osteogenesis Imperfecta”
- October 18         Ellen Magenis, M.D., Professor  
                          “Genomic Imprinting”
- November 1        Sue Richards, Ph.D., Professor  
                          “Too much or too little of a good thing: when does it make a difference?”
- November 8        Gwen Fraley, M.S., C.G.C.  
                          “Update on Preimplantation Genetic Diagnosis (PGD)”
- November 15       Dawn Siegel, M.D.  
                          “Genetic Analysis of PHACES Syndrome”
- November 29       Robert Steiner, M.D.  
                          “Cataracts, diarrhea, and mental retardation: CTX”
- December 6        Allison Gregory, M.S., Genetic Counselor  
                          “Huntington Disease”
- December 13       Yasmine Akkari, Ph.D., Clinical Research Assistant Professor  
                          “Two New Microdeletion Syndromes Characterized by Comparative Genomic  
                          Hybridization using Microarrays”
- January 10         Jone Sampson, M.D., Assistant Professor  
                          “Hereditary Diffuse Gastric Cancer”
- January 17         Niamh Stover, M.S.  
                          “Cohen Syndrome”
- January 24         Robina Ingram-Rich, RN, MS, MPH  
                          “Hemophilia Overview: What’s New/What’s Not After 20+ years”
- February 7         Robb Moses, M.D., Professor  
                          “Ciliopathies”
- February 14        Dana Kostiner, M.D., Assistant Professor  
                          “Bumpy Bone Syndrome: Hereditary Multiple Exostoses with or without TRP”
- February 28        Kerry Silvey, M.A., G.G.C., Public Health Genetics Specialist  
                          “The Oregon Experience Providing Clinical Genetics and Metabolism Services by  
                          Telemedicine”

- March 6 Anabel Stenzel, M.S., C.G.C. and Isabel Stenzel Byrnes, M.S.W., M.P.H.  
“Living with Cystic Fibrosis: A Patient’s Perspective”
- March 20 Cary Harding, M.D., Assistant Professor  
“Recent advances in the pharmacologic therapy of phenylketonuria (PKU)”
- April 3 Donald Basel, M.D., Genetics Resident  
“Arthrogyrosis Multiplex Congenita”
- April 10 Nabil Moghrabi, Ph.D.  
“Fanconi Anemia: Molecular Diagnosis”
- April 17 Jennifer Penfield, P.A., Instructor  
“Mevalonic Aciduria and HIDS: A Presqualene Cholesterol Synthesis Disorder”
- April 24 Julie Kingery, M.D.  
“Vancomycin-Resistant Enterococci”
- May 1 Monique Johnson Ph.D.  
“Genetic Basis of Music Perception: Absolute Pitch and Amusia – Interesting but Important?”
- May 15 Cori Feist, M.S., C.G.C., Genetic Counselor  
“L1 – Spectrum Disorders”
- May 22 Jon Zonana, M.D., Professor  
“Radial Ray Defects”
- May 29 Richard Weleber, M.D., Professor  
“Day and Night: RPE65 Leber Congenital Amaurosis and CNGB3 Achromatopsia”
