

Molecular and Medical Genetics Grand Rounds  
2008 - 2009 Grand Rounds Schedule  
**Thursdays, 9:00 to 10:00 A.M., Mac Hall 3198**

- October 2 Karen Kovak, M.S., Genetic Counselor  
“Huntington Disease Part 2 – Family Perspectives”
- October 9 Donald Basel, M.D., Genetics Resident  
“Fibrillinopathies: Proteotype vs. Phenotype”
- October 16 Jacob Reiss, M.D., Adjunct Associate Professor  
“Lynch Syndrome”
- October 23 Melanie Gillingham, Ph.D., Assistant Professor  
“Effect of Feeding, Exercise and Genotype on Plasma Long-chain 3-hydroxyacylcarnitines in Children with LCHAD deficiency”
- October 30 Cori Feist, M.S., C.G.C., Genetic Counselor  
“Meckel-Gruber Syndrome”
- November 6 Kory Keller, M.S., C.G.C., Genetic Counselor  
“Pitfalls in the molecular diagnosis of hearing loss”
- November 20 Jennifer Penfield, P.A., Instructor and  
Louise Merkens, Ph.D., Research Assistant Professor  
“Sitosterolemia”
- December 4 Dave Koeller, M.D., Associate Professor  
“Hypoglycemia: New Thoughts on an Old Problem”
- December 11 Penny Hogarth, M.D., Associate Professor  
“Redefining Parkinson Disease”
- January 8 Susan Olson, Ph.D., Professor  
“Diagnostic Chromosome Rearrangements in Leukemias and Lymphomas”
- January 15 Robert Steiner, M.D., Professor  
“Poisoned by Cholesterol – Niemann Pick C”
- January 22 Allison Gregory, M.S., Genetic Counselor  
“Celiac Disease”
- January 29 Robb Moses, M.D., Professor  
“Demons to CNVs”
- February 5 Franklin Moore, M.D., Molecular Pathology Fellow  
“Diagnostic and Prognostic Implications of Gene Mutations in Acute Myeloid Leukemia”
- February 12 Jon Zonana, M.D., Professor  
“Obesity: Are you what you Eat?”

- February 19 Monique Johnson Ph.D., Research Assistant Professor  
“CPT1A Deficiency: An Alaskan Conundrum”
- February 26 Sue Richards, Ph.D., Professor  
“Mosaicism and Reversion: Natural Gene Therapy”
- March 5 Robina Ingram-Rich, Assistant Professor  
“Health Literacy – Healthy People 2010 Objective 11-2 & considerations from the Institute of Medicine report”
- March 12 Donald Basel, M.D., Genetics Resident  
“From whence we came”
- March 19 David Farrell, Ph.D., Professor, Anatomical Pathology  
“Fibrinogen Gamma’ Variant: The Clot Thickens...”
- April 2 Kerry Silvey, M.A., C.G.C., Public Health Genetics Specialist  
“Across the River – Public Health Genetics in Oregon”
- April 9 Cary Harding, M.D., Associate Professor  
“Newborn Screening for Fatty Acid Oxidation Disorders”
- April 16 Christopher Corless, M.D., Vice Chair for Research and Professor, Pathology  
“Matching Cancer Genotypes to Treatments: Lessons From GI Stomal Tumor and Melanoma”
- April 23 Richard Weleber, M.D., Professor  
“Modeling and Analysis of Visual Fields in Genetic Eye Disease”
- April 30 Gwen Fraley, M.S., Genetic Counselor  
“Non-invasive Prenatal Diagnosis: The Future is Now”
- May 7 Jone Sampson, M.D., Assistant Professor  
“Advances in Breast Cancer: Pathways to Personalized Medicine”
- May 14 Dana Kostiner, M.D., Assistant Professor  
“Bloom Syndrome and Related Chromosome Breakage Syndromes”
- May 21 Jamie Fitzgerald, Ph.D., Assistant Professor, Orthopedics  
“Mutational analysis of three new collagen VI genes”
