

## **Molecular and Medical Genetics Grand Rounds**

### **2009 - 2010 Grand Rounds Schedule**

**Thursdays, 9:00 to 10:00 A.M., Mac Hall 3198**

- October 1      Jacob Reiss, M.D., Adjunct Associate Professor  
“A Rare Variant Form of Ehlers-Danlos Syndrome”
- October 8      Kory Keller, M.S., C.G.C., Genetic Counselor  
“New Frontiers in NF1, NF2, & SPRED1”
- October 15     Franklin Moore, M.D., Fellow, Pathology  
“BRCA1: of Pathology, Patients, and Patents”
- October 29     Chris Harrington, Ph.D., Sr. Staff Scientist  
“DNA Microarrays: Past, Present, and Future”
- November 5     Yasmine Akkari, Ph.D.  
“The Cytogenetics of Multiple Myeloma”
- November 12   Eric Orwoll, M.D., Associate Dean  
“Genetic & Proteomic Studies of Osteoporosis and Sarcopenia”
- November 19   Peter Francis, M.D., Associate Professor  
“Treating Inherited Retinal Degenerations”
- December 3     Cori Feist, M.S., C.G.C., Genetic Counselor  
“TP63-related disorders”
- December 10   Nicoleta Voian, M.D., Fellow, Genetics  
“New Steps Toward Treatment of Duchenne Muscular Dystrophy – Exon Skipping Therapy”
- December 17   Jessica Adsit, M.S., Professor  
“Genetic and Epigenetic Implications of Assisted Reproductive Technology”
- January 7      George Leonard, M.D., Fellow, Pathology  
“Prenatal and Preimplantation Diagnosis of Hemoglobinopathies”
- January 14     Kathryn Murray, M.S., Genetic Counselor  
“Family History: Separating Truth from Action”
- January 21     William Horton, M.D., Professor  
“Progress in Understanding and Treating Achondroplasia”
- January 28     Melanie Gillingham, Ph.D., Assistant Professor  
“Feeding and Fasting in Alaska Native Children with CPT1A deficiency”
- February 4     Stephen Moore, Ph.D., Assistant Professor  
“Atypical Rett Syndrome”

- February 11 Grover Bagby, M.D., Professor  
“Hematopoietic Dysfunction in Fanconi Anemia; Is it all about DNA damage?”
- February 18 Cary Harding, M.D., Associate Professor  
“Disorders of Creative Biosynthesis & Transport”
- March 4 Dana Kostiner, M.D., Assistant Professor  
“AAA Syndrome: It has nothing to do with roadside assistance”
- March 11 Lynn Loriaux, M.D., Professor  
“Fuller Albright”
- March 18 Dave Koeller, M.D., Professor  
“Newborn screening and treatment of Glutaric Acidemia Type 1”
- April 1 Mary Williams, M.D., Adjunct Professor  
“The Ichthyoses: Pearls and Pitfalls for the Geneticist”
- April 8 Gwen Fraley, M.S., Genetic Counselor  
“Perception of Risk: Discussing Autism Spectrum Disorders in the prenatal counseling setting”
- April 15 Sue Richards, Ph.D., Professor  
“EGAPP/Evaluation of Genomic Applications in Practice and Prevention”
- April 22 Nicoleta Voian, M.D., Fellow, Genetics  
“Prenatal Screening for Spinal Muscular Atrophy – A Comprehensive View”
- April 29 Kelly Hamman, M.S., Genetic Counselor  
“Astrocytoma and Associated Inherited Cancer Syndromes”
- May 6 Carrie Nielson, Ph.D, MPH, Assistant Professor  
“Genetic Epidemiology of Osteoporosis”
- May 13 Monique Johnson Ph.D., Assistant Professor and  
Robert Searles, Ph.D, Director, Massively Parallel Sequencing Shared Resource  
“NextGen Sequencing: Will this innovative technology change the face of genetic research and clinical testing?”
- May 20 William Noonan, M.D., J.D., Attorney, Klarquist Sparkman, LLP  
“Biological Patents, DNA Inventions, and Myriad Genetics”
- May 27 Allison Gregory, M.S., Genetic Counselor  
Michael Kruer, M.D., Fellow  
“Update on Neurodegeneration with Brain Iron Accumulation: New Genes, New Directions”
- June 3 Jon Zonana, M.D., Professor  
“Update of the Hypohidrotic Ectodermal Dysplasia (HED)”
