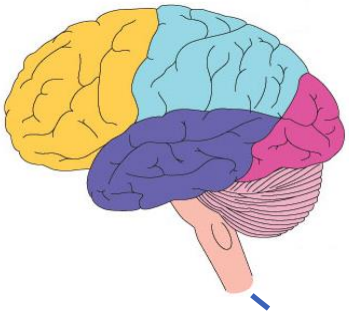
Parents of 8-12 Year Olds!



Have you ever wondered….

What is ADHD?
What about brain activity?
How are Genes related to it?

Help us study it!

ADHD Research Study

Examining Children with and without ADHD

What's Involved?

- One screening visit at OHSU
- Possible follow up testing visit & MRI Scan
- Each visit lasts 2-3 hours
- Clinical feedback provided!

Who's Eligible?

- 8 -12 yr/old children with or without ADHD
- If taking a stimulant medication for ADHD/ADD, they must be off that medication for some visits
- Must be right-handed and have no permanent metal in their bodies
- Saliva sample and repository storage is required

APPROVED: APR 7, 2014

What Is Brain Imaging?

A brain image is obtained using a magnetic resonance imaging (MRI) scanner. It is a non-invasive machine that takes a picture of the brain. No radiation or injections. It is safe for all ages.
