2011 N.L. Tartar Fellowship Award Application Listing

Research into the use of human hepatocytes in treating liver disease, the effects of vitamin D balance in Parkinson's disease and the developmental origins of bone marrow failure in Fanconi anemia were just some of the 2011 projects funded by the N.L. Tartar Trust.

The 41 Fellowships, which are offered annually by the OHSU Foundation, provide $2,000 to support research endeavors and research career development in the School of Medicine. Ninety-six applications were submitted for consideration for this grant cycle. Forty-one applications, totaling $82,000, were awarded by the N.L. Tarter Trust.
