This workshop (Part I) will be an interactive opportunity to discuss keys to improving your skills in preparing and delivering lectures and presentations.

The following week, we will have a practice session (Part II) for up to 20 participants to apply what they have learned by delivering a 10 minute "Microteach" to a small group of peers and a faculty expert. Each small group will provide supportive and constructive feedback to each other, and the presentation will be recorded by video camera so that each participant can review their work in private.

NOTE: If you plan to attend the "Microteach" session (Part II) please register now -- space is limited to 20 participants and you must attend Part I.
