Salem Convention Center
Salem, Oregon

Division of Continuing Professional Development
School of Medicine
Oregon Health & Science University

COURSE DESCRIPTION

The overall objective of this activity is to prevent, accurately diagnose, and optimally treat infectious diseases.

Specific learning objectives, based on documented gaps in current practice supported through regional and national data, will address clinical problems related to:

- Infectious causes of diarrhea;
- Sexually transmitted diseases;
- HIV/AIDS;
- Chronic infection due to Hepatitis C;
- Sepsis;
- Respiratory tract infections including pneumonia and sinusitis;
- Intra-abdominal infections;
- Urinary tract infections;
- Skin and soft tissue infections;
- Travel medicine; and
- Emerging infectious diseases.

Participants will also learn about new antibiotics and other therapeutic agents, updated practice guidelines, and strategies for prevention of infections including the latest vaccine recommendations.

Case-based discussions and ample time for questions will supplement large group presentations. Participants will be able to immediately implement what they learn into their practices so that patient outcomes improve.
