

Jeffrey A. Gold, MD
Associate Professor
Medicine-Pulmonary Critical Care

Dr. Gold, a pulmonary critical care physician scientist, became involved with simulation through his desire to improve the use of electronic health records in the care of ICU patients. He is currently concentrating on the role of simulation to improve usability of the electronic health record (EHR) and is working towards integrating EHR simulation into residency and fellowship training. Dr. Gold has just received his first NIH and AHRQ grant for simulation-based activity, totaling \$1M+ over the next three years. Over the past year, Dr. Gold has presented his EHR simulation data and results at the American Thoracic Society and the national Epic Annual User's Group Meeting, where it was very well-received.

Dr. Gold received his MD from New York University (NYU), completed his Internal Medicine residency at Columbia Presbyterian and a fellowship in Pulmonary Critical Care at NYU. After completing his training, Dr. Gold joined the faculty at NYU as a physician scientist with a research focus in sepsis, receiving appointments as the Critical Care Services Director and Associate Medical Director at Bellevue Hospital. In 2005, Dr. Gold joined the faculty at OHSU and was appointed program director for the Pulmonary Critical Care and Medical Critical Care Fellowships. He also currently serves as the associate director of OHSU's Adult Cystic Fibrosis Center. Dr. Gold has been recognized as Teacher of the Year, twice each, at both NYU and OHSU, and was also recognized as Doctor of the Year while at Bellevue Hospital.
