School of Public Health Initiative

Research enterprise
Key issues for next year

• Research retreat in the fall for all primary faculty (share areas of expertise and plans)
• Regularly scheduled grand rounds type of seminar in public health for faculty, staff, and students (monthly, topics to vary)
• Participation in research week activities at both schools, showing our public health presence
• Endowed lectures in public health...one potential topic has surfaced already
Research office—behind the scenes

• Hire new financial analyst at OHSU
• Meet with deans, provosts, key stakeholders at both universities
• Explore common portal for grant submissions, post award management
• Establish IRB reciprocity (MOU apparently written)
• Ensure that current allocations for pilot funds for grants, travel, etc., are preserved
