

Equity Summer Research, Dentistry and Medicine Internship
Oregon Health & Science University
Portland, Or

School of Medicine

The OHSU School of Medicine is a vibrant community of educators, students, scientists, clinicians and others working side-by-side to heal, teach, discover and serve. We are proud of our uniquely collaborative and collegial environment.

Our faculty is dedicated to preparing physicians for the medical, ethical and humanistic responsibilities of their calling, while also providing outstanding care to patients from Oregon and elsewhere. Along with the art of teaching and healing comes the responsibility for discovery. The School of Medicine faculty is widely recognized nationally and internationally for the pursuit of new knowledge in a breadth of investigative areas ranging from molecular biology and cancer to heart disease, behavioral science and issues of public health.

The importance of the work of our physicians and scientists in this century grows by the year as opportunities increase for new knowledge, for better disease treatment, and for a health care system that provides for the needs of the individual in a manner that is affordable and available to all. OHSU and its School of Medicine are committed to meeting the health professions and science education, biomedical research and health care needs of the people and the state we have been proud to serve for more than 100 years.

Our Mission

- Provide programs to enhance human health, with emphasis on improving health and access to care for all Oregonians.
- Educate tomorrow's physicians, scientists and other health professionals and prepare them for a lifetime of learning, leadership, discovery and service.
- Develop new medical knowledge and technologies through basic, clinical and translational research.
- Translate discoveries into effective health care and quality delivery.

School of Dentistry

The School of Dentistry shares the mission of the Oregon Health & Science University to provide educational programs, basic and clinical research, and high quality care and community programs. We strive to foster an environment of mutual respect where the free exchange of ideas can flourish. The dental school prepares graduates in general dentistry and the dental specialties to deliver compassionate and ethical oro-facial health care.

Graduate Studies

Excellence in the Biomedical Sciences

Oregon Health & Science University offers an outstanding opportunity for graduate studies in the biomedical sciences. Over the last decade there has been a tremendous expansion of research programs at OHSU. OHSU has grown into a world-class teaching hospital and research center that draws in students,

scientists and patients from across the country and around the world. At the same time, we retain our strong commitment to serving our local community.

The vigorous research programs and cutting edge research environment have created a unique opportunity for graduate education. Students can choose from over twenty-five Ph.D. and Masters programs, as well as certificate programs and internship opportunities. Graduate students are taught and mentored by a Graduate Faculty composed of more than 300 scientists who are located in a variety of academic and research units within the medical school and university. Overall, OHSU's internationally respected scientists bring in approximately \$300 million in funding for their projects each year, including numerous training awards for graduate students.

With three campus locations -- Marquam Hill main campus in the rolling hills of west Portland, the Center for Health & Healing in the heart of Portland's South Waterfront and the West Campus located in the 'Silicon Forest' of Hillsboro just minutes from the main Marquam Hill campus -- OHSU offers a diverse learning experience for our students. Ongoing investments in research laboratories and technologies provide superb physical resources. These include the Marquam Hill campus with its numerous research buildings, and the newly completed Biomedical Research Building, four floors of the Center for Health & Healing devoted to research units (including Biomedical Engineering, the Heart Research Center, the Knight Cancer Institute, the Oregon Clinical and Translational Research Institute and pharmacy research), and the West Campus location.
