</tbody>
</table>
We recognize and reflect the important notion that in order to increase diversity on our campus, we must make targeted, deliberate, and measurable efforts to create an environment that not only welcomes, but encourages a diverse population of people.

In modern science research, academic success and scientific breakthrough rests on our utilization of multifaceted approaches and perspectives. By cultivating visible diversity, we believe that the exposure to a variety of ideas and collective experiences will foster creativity and relationships – enriching our academic environment and strengthen our scientific community as a whole.

**Graduate Student Organization (GSO)**
The Graduate Student Organization (GSO) is an organization by and for graduate students of the School of Medicine. Students from PhD, Masters and Graduate certificate programs are welcome and encouraged to be involved. Graduate students from all programs (including other OHSU schools) share common needs and challenges; the GSO gives students a forum to discuss these issues. We provide a community, both academic and social, for graduate students at OHSU. It promotes communication amongst students and faculty from the different disciplines and departments, while acting as an advocate for graduate students individually and as a whole.

NSWB is a student run organization committed to expanding the global perspective of the individual nursing student. By developing awareness of different cultures and their health needs, beliefs, approaches, and disparities, nursing students will become better prepared both personally and professionally to provide culturally competent health care within our increasing global society.

NSWB strives to provide information on international service learning opportunities for OHSU students. We believe that facilitating international clinical and academic opportunities will increase student awareness of the challenges facing underserved global communities, thereby inspiring students to work toward encouraging a healthier future for all people around the globe. NSWB promotes global health education, advocacy, and service, and strongly believes that optimal health is an essential human right.

Oral and Maxillofacial Surgery Group  
The goal of the pre-doctoral Oral and Maxillofacial Surgery (OMFS) Student Interest Group is to create unique opportunities for dental students to explore the dental specialty of OMFS. We recognize that our students are at a relatively early stage in their doctoral education and unfamiliar with the scope of the specialty. Therefore, the SIG is a time when students may gain exposure to the specialty, meet current OMS residents and ultimately have the necessary resources and mentoring to pursue a career in OMFS.
