Show All Downloads
Click the “Jabber Guest Plug-in” icon to start the installation.

If you receive an identity error message, click “OK” and open “System Preferences.”
Click the icon for “Security and Privacy”

Click the button to “Open Anyway”

**If the “Open Anyway” button is unavailable you should change the “Allow apps downloaded from” setting to “Anywhere.”**
Click “Open” on the Confirmation message. **Please make sure that it is asking about the “Cisco Jabber Guest Plug-in” before clicking “Open”**

Once your computer returns to your web browser, Click “Activate Cisco Jabber Guest”
Click “Allow and Remember” if prompted.

You should see an image of yourself on your screen. Click the green “Call” button to connect.
Click the red “End Call” button at the end of your appointment.
