TBI Symposium
From Research to Recovery

Join us at this annual event to learn the latest in TBI and concussion research, followed by multidisciplinary lectures on concussion evaluation and treatment.

We are honored to welcome Stanley Herring, M.D., as our clinical keynote speaker on Saturday, September 16. Dr. Herring is clinical professor in the Departments of Rehabilitation Medicine, Orthopaedics and Sports Medicine, and Neurological Surgery at University of Washington. He is director of the UW Medicine Sports Health & Safety Institute, medical director of Sports, Spine and Orthopedic Health for UW Medicine, and co-medical director of the Sports Concussion Program, a partnership between UW Medicine and Seattle Children’s. Dr. Herring specializes in non-operative musculoskeletal and sports medicine, with a particular interest in disorders of the spine and sports concussion.
