Dear Physicians and Health Care Professionals,

It is an honor and privilege to serve as the Chairman of OHSU Casey Eye Institute. In my role, I have the opportunity to partner with many of you in caring for patients with complex eye diseases, as well as lead Casey through an era of unprecedented change in health care policy and advances in clinical care.

Casey was built to bring the latest technologies and treatments to our region, and we are pleased that we can work side by side with you to offer these to your patients. Remarkable advances in imaging and informatics are being pioneered by Casey Faculty. Today we are increasing the numbers of clinical trials in many of our specialties and we are excited to be moving into Phase 1 gene therapy trials for retinal degenerative diseases. Oregonians are benefitting by being some of the first in the nation to access these new therapies.

In anticipation of the predicted shortage of ophthalmologists, we are increasing the numbers of residents in training and increasing the numbers of fellowship trained subspecialists in cornea, retina, neuro-ophthalmology, oculo-plastics and pediatric ophthalmology. As part of the only academic health center in Oregon, Casey is working hard to increase the number of trainees to make sure that our citizens are well served for decades to come.

Demand for our services has grown in recent years. When we have seen our wait times for new patients become unacceptable, we have taken some of our subspecialists "on the road" to serve you in your communities. We hear that the wait times for new patients become unacceptable, we have taken some of our subspecialists "on the road" to serve you in your communities. We hear that the

In my role, I have the opportunity to partner with many of you in caring for patients with complex eye diseases, as well as lead Casey through an era of unprecedented change in health care policy and advances in clinical care.

I hope that you will always feel free to contact me if you have thoughts on how we might better meet the needs of our community. We are grateful for your partnership and input.

Warm Regards,

David J. Wilson, MD
