CHILDREN'S HOSPITAL**  
*Oregon Health & Science University*

## **Working with you to care for your patients.**

We recognize the value and importance of physician-to-physician relationships in the healing process. As Oregon's only academic health center, we are committed to partnering with you in the coordination of care for your patients.

We offer the most comprehensive range of children's healthcare programs and services in Oregon and Southwest Washington.

Our unique, wide-ranging team of health care experts includes specially trained physicians, nurses, therapists, child life therapists, chaplains, technicians and support personnel.

OHSU Doernbecher Children's Hospital.  
Because every child deserves the best.

### **One Number for Providers**

The Doernbecher Physician Consult line can assist with referrals, consults, transfers or other needs. All you need is one number: **503 346-0644** (toll free: **888 346-0644**)

## **As part of our health mission, we provide:**

- The most comprehensive range of pediatric services: We serve as a major referral center for cancer, heart disease, cardiac surgery, neurosurgery, diabetes, neonatal and pediatric intensive care, metabolic disorders, organ and stem cell transplantation and trauma.
- Statewide outreach clinics that bring pediatric specialty care to children in their home communities.
- Comprehensive NICU and PICU with 24/7/365 in-house coverage.
- A hospitalist program.
- A state-wide telemedicine network.

**We are dedicated to meeting the needs** of referring providers and their patients. Our provider relations manager, Susan Gray Madison R.N., M.S., serves as your personal contact and is committed to working with you and your staff to better partner in the care of your patients. Call 503 346-0644 or email [graymadi@ohsu.edu](mailto:graymadi@ohsu.edu).

## OHSU Connect

When you refer patients to OHSU Doernbecher, OHSU Connect is a Web-based application that provides you and your staff with online real-time access to patient information and clinical data. In addition, OHSU Connect allows you to securely communicate with OHSU and Doernbecher clinicians and other staff members.

OHSU Connect functions as a read-only portal to patient charts in Epic, allowing you to view patient demographics, encounter documentation, scanned documents, medication lists and other information found in the Chart Review section of Epic Hyperspace. Users are also given full InBasket functionality, allowing them to receive notifications including lab results and ADT events, and communicate with OHSU Epic users.

Request an account today:

Visit [www.ohsuhealth.com/connect](http://www.ohsuhealth.com/connect) or call 503 494-4567.

# Adolescent Medicine

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The Adolescent and Young Adult Clinic provides health services for young people between the ages of 10 and 24. Adolescents may select the clinic for their primary health care needs or their primary care provider can refer them for consultation.

### Services

- Primary care
- Behavioral and mental health care
- Consultation and care for eating disorders
- Reproductive care
- Management of chronic illnesses

---

The Pediatric Audiology Program provides comprehensive diagnostic hearing evaluations for infants and children of all ages and developmental levels. Evaluations include behavioral hearing assessments and physiologic evaluation of the ear (tympanometry, otoacoustic emissions, and acoustic reflexes). Electrophysiologic assessment of the auditory system (auditory brainstem response or ABR/BAER) testing is also available.

Our goal is to give families information and support for making informed decisions about treatment options, technology to improve hearing, and communication options. Close working relationships are maintained with primary care providers, pediatric otolaryngologists, pediatric speech-language pathologists, the OHSU Cochlear Implant Program and community-based intervention and educational programs.

# Autism Program – CDRC

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The CDRC Autism Program at Doernbecher provides services to children with established autism or suspected symptoms on the autism spectrum. The clinic is comprised of an interdisciplinary team of clinical psychologists, developmental pediatricians, speech/language pathologists, occupational therapists and audiologists. The goal of the program is to understand the individual differences and needs of each child and to provide specific diagnoses and recommendations to families.

### Services

- Assessment
- Diagnosis
- Recommendations and treatments, including individualized parent training, naturalistic interventions (such as floor time, pivotal response training and incidental teaching), social skills groups, speech therapy and occupational therapy
- Ongoing consultation

The Pediatric Cardiology program provides state-of-the-art expertise in the entire spectrum of congenital and acquired cardiac diseases. Our pediatric cardiac consultative services are available at a variety of locations, including OHSU Doernbecher Children's Hospital, Doernbecher Pediatrics - Westside at Bethany Village, Albany, Bend, Coos Bay, Corvallis, Eugene, Klamath Falls, Medford, Pendleton, Roseburg, Salem and Vancouver. Children can be referred to these clinics by their primary care provider.

### **Services**

- Full service cardiac evaluation for heart murmur, chest pain, syncope, congenital heart disease and acquired heart disease
- State-of-the-art echocardiographic services, including screening for fetal cardiac abnormalities
- Cardiac MRI
- Interventional catheterization techniques for non-operative catheter-based procedures such as balloon angioplasty for vascular obstructions

---

The Cardiothoracic Surgery program at OHSU provides nationally recognized excellence in cardiac surgical care for children and families from Oregon and the Pacific Northwest. The program includes an exceptional team of pediatric cardiac surgeons, pediatric cardiac anesthesiologists, pediatric perfusion specialists, pediatric intensive care physicians, pediatric cardiac operating room nurses and PICU nurses who specialize in the perioperative care of children before and after cardiac surgery.

### Services

- The OHSU Doernbecher congenital cardiac surgery program treats all neonatal and childhood heart problems from the less critical to the most complex
- Cardiopulmonary bypass and brain protection for infants undergoing heart surgery
- Hypoplastic left heart syndrome, tetralogy of Fallot, TGA and neonatal complete repair
- Adults with congenital heart disease

# Child Abuse and Suspected Child Abuse and Neglect (SCAN)

The Rosenfeld Center for the Study and Treatment of Child Abuse and the Suspected Child Abuse and Neglect (SCAN) team assess child abuse cases, both local and referred; report abuse episodes to the appropriate authorities and educate students, medical residents, faculty and community health professionals on medical, social and legal aspects of child abuse.

Please call us for information or assistance in reporting suspected child abuse or neglect (physical, emotional, sexual and/or failure to thrive), or to check on a child admitted to Doernbecher for child abuse issues. To report child abuse or neglect in Oregon, you also can call your county abuse hotline.

# Cleft Palate/ Craniofacial Disorders

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The Craniofacial Disorders Clinic provides evaluation and ongoing care coordination for children with cleft palate (with or without cleft lip) or other craniofacial disorders from birth through adulthood. Early nursing consultation is critical for success of initial feeding efforts and is a unique feature of this clinic. The clinic specializes in naso-alveolar molding (NAM) to reconstruct the palate, and also placement of a temporary speech appliance (obturator) clinic. We offer nonsurgical treatment of children with velopharyngeal insufficiency. Children are referred to this clinic by their primary care provider.

### Services

- Prenatal counseling
- Education
- Genetics
- Developmental pediatrics
- Speech-language pathology
- Audiology
- Nursing
- Neurosurgery
- Plastic and reconstructive surgery

# Dental Program

## **OHSU Doernbecher Children's Hospital**

Specialty Clinics, 8th floor

700 S.W. Campus Dr.

Portland, OR 97239

---

The Dental program at Doernbecher cares for children with acute and chronic medical issues. We provide emergency dental care to Doernbecher inpatients and will provide consultation, if requested by the child's physician.

The Pediatric Dental Surgery program is a joint effort supported by Doernbecher Children's Hospital, OHSU School of Dentistry and private partners. The clinic was established to support other Doernbecher programs in the evaluation and treatment of special needs children.

In addition to Doernbecher patients, we welcome referrals from private practitioners in Oregon and Southwest Washington. Our clinic is available for consultation and treatment including sedation and general anesthesia.

We offer IV sedation services for patients with oral/dental needs that require short procedures. We work closely with oral and maxillofacial surgery for older patients in need of surgical care.

# Echo Lab

## OHSU Doernbecher Children's Hospital

8th Floor

700 S.W. Campus Dr.

Portland, OR 97239

The Doernbecher Cardiac Echo lab is a Pediatric ICAEL certified lab in pediatric thoracic echocardiography. It is the only lab in Oregon that is accredited in pediatric transesophageal and fetal echocardiography. It is staffed with pediatric certified echo sonographers and pediatric cardiologists to provide the most accurate, state-of-the-art echo available, including fetal echocardiography.

All echo requests must be accompanied by a faxed order that includes the following patient information:

- Name
- Birth date
- Phone number
- Reason for request
- ICD-9 code

We will contact the family to register them and schedule an appointment at a convenient time. Echo results will be faxed to the office of the requesting physician. If there is a significant finding, a pediatric cardiologist will contact the requesting physician by phone. For your convenience, a fax order sheet is available at [www.ohsудоernbecher.com/referral](http://www.ohsудоernbecher.com/referral)

# Pediatric Emergency Department

The Doernbecher Pediatric Emergency Department is one of only two pediatric Level 1 trauma centers in Oregon. This state-of-the-art, family-centered facility offers:

- Short waiting times – the average time to see a doctor after arrival is **less than 30 minutes**, most patients are placed in rooms immediately after arrival to avoid waiting
- Board-certified pediatric emergency and emergency medicine specialists
- Specially trained emergency pediatric nurse specialists
- Full spectrum of care from highly skilled specialists – our patients have immediate access to all of OHSU's trauma and surgical resources, as well as Doernbecher's pediatric specialists
- 24-hour observation – Patients who should be monitored overnight have an alternative to being admitted to the hospital
- Our rooms are fully equipped to administer acute care and include accommodations for overnight stay of patients and a family member, should this be necessary
- Bedside registration – Thanks to computerized patient record equipment, most admitting procedures can be conducted in the exam room
- Comforting environment – Patient's enter our facility through a separate and secure, child-friendly waiting room, complete with computer games and a big-screen TV
- Free valet parking – available to all emergency patients

---

The Harold Schnitzer Diabetes Health Center at Oregon Health & Science University serves adults and children who are living with diabetes. Our integrated, patient-centered and family-oriented approach helps reduce the burden of diabetes so our patients can live healthy, productive lives. Our multidisciplinary team includes many diabetes specialists, board-certified pediatric endocrinologists, specially trained nurses, a dietician, a psychologist and diabetes educators. Each patient's team is customized to his or her developmental level and particular needs.

The Pediatric Endocrinology Clinic evaluates and treats children with a wide range of endocrine problems, including diabetes; growth problems; pituitary hormone deficiencies; thyroid, adrenal, and gonadal disorders and precocious or delayed puberty. Our multidisciplinary team includes pediatric endocrinologists, a pediatric endocrine nurse, certified diabetes educators, pediatric dietitians skilled in nutritional management and a social worker specially trained in family counseling. The medical staff helps children and their families understand and manage their particular health situation.

# Healthy Lifestyle Clinic

## OHSU Doernbecher Specialties – Westside

15220 N.W. Laidlaw Rd., Suite 102  
Portland, OR 97229

---

Over the last 30 years, poor eating habits and declining levels of exercise have led to childhood obesity. Doernbecher has always been committed to improving the health of our children, and we are determined to extend that commitment. The Doernbecher Healthy Lifestyle Clinic is a special clinic that evaluates the lifestyles of pediatric patients.

### Services

- Assessment of child's genetic history, eating habits, exercise patterns, screen time, and other important health influences on health
- Evaluation of other weight-related conditions including diabetes, high blood pressure, heart disease, gall stones, fatty liver disease, abnormal menstrual cycles and obstructive sleep apnea

### Faculty/Staff

We offer a multidisciplinary team dedicated to overweight or obese children. This group consists of a pediatrician, a pediatric dietician, a pediatric trained physical therapist and a pediatric behavioral health psychologist.

# Fetal Therapy Program

## OHSU Doernbecher Children's Hospital

8th floor

3181 S.W. Sam Jackson Park Road

Portland, Oregon 97239

---

The OHSU Doernbecher Fetal Therapy Program provides a cohesive, timely, multidisciplinary approach and comprehensive services for women carrying a fetus with medical concerns. The program is the only one of its kind in the region.

The program brings together a coordinated approach to address fetal abnormalities, from pregnancy through delivery. Within a single visit, a patient receives care from a team of obstetric, pediatric and neonatal care specialists throughout OHSU and Doernbecher. This may include experts in maternal-fetal medicine, pediatric cardiology, neonatology, neurology, fetal imaging, genetics and bioethics, interventional radiology and more. The program provides a streamlined care experience, while allowing the evaluation, precise diagnosis and management of complicated conditions.

# Genetics and Birth Defects Clinic

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The Genetics and Birth Defects Clinic helps primary care providers diagnose and care for children with common and uncommon genetic disorders. The clinic's staff includes medical geneticists and genetic counselors. Each clinician is experienced in general clinical genetics and trained in subspecialty areas such as dysmorphism, cytogenetics, biochemical disorders or molecular genetics.

When appropriate, patients may consult with specialists in genetic ophthalmology, pediatric cardiology, endocrinology or neurology. If developmental or behavioral questions exist, developmental assessment of a child can also be performed in the clinic. Specialized laboratory services are available through the DNA diagnostic, cytogenetic and biochemical genetics laboratories. Children are referred to this clinic by their primary care provider.

## OHSU Doernbecher Children's Hospital

10th Floor  
700 S.W. Campus Dr.  
Portland, OR 97239

The Kenneth W. Ford Northwest Children's Cancer Center is a comprehensive children's cancer center. It is also the pediatric program of the OHSU Knight Cancer Institute. Our multi-specialty teams include full-time board-certified pediatric hematology/oncology specialists, nurses specially trained in pediatric hematology/oncology and a support team that includes the entire range of pediatric and surgical subspecialties. Social workers, child life specialists, pediatric nutritionists and pediatric pharmacists also staff the center.

Each year, our team treats more than 1,000 children and adolescents with cancer. The team also cares for children and adolescents with other potentially life-threatening blood disorders, such as aplastic anemia, hemophilia and sickle cell disease. In addition, Doernbecher houses the Comprehensive Pediatric Brain Tumor Program and the Hemophilia Center. It also is the only hospital in Oregon that performs pediatric stem cell and bone marrow transplants and has a pediatric survivor program for long-term follow-up and support.

# Lactation Services

## OHSU Hospital

Mother-Baby Unit, 13th Floor  
3181 S.W. Sam Jackson Park Rd.  
Portland, OR 97239

Doernbecher's lactation consultants help mothers and babies who are having problems with breastfeeding. Patients may be scheduled for inpatient or outpatient visits and are seen by a team of nurses who are Board Certified Lactation Consultants.

## Services

- **Prenatal Consultation:** Appointments created to help women understand how breastfeeding works and discuss questions or potential issues that may interfere with a successful lactation
- **Consultation:** Private prenatal or postnatal appointments designed to support mothers in creation of breastfeeding plans. Lactation support for premature, late preterm and normal newborns
- **Urgent consultations:** The lactation specialists are available to address urgent problems that are interfering with breastfeeding or babies who are not feeding well or failing to gain weight
- **Retail services:** Medela breast pumps are available for purchase in the gift shop on the 9th floor
- **Industry consultation:** We provide information for companies wishing to provide breastfeeding support in the workplace

# Lipid Clinic

## **OHSU Doernbecher Children's Hospital**

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

---

The Pediatric Lipid Clinic offers consultation, diagnostic evaluation and treatment for infants, children and adolescents with lipid disorders, such as hypercholesterolemia, hypertriglyceridemia, combined dyslipidemias and hypo-HDL cholesterolemia. The physician consultation also includes an evaluation by a certified specialist in pediatric nutrition, who will spend extensive time counseling a child's family.

The Pediatric Lipid Clinic staff includes a pediatric cardiologist and a pediatric dietician, along with a dedicated support team. The clinical staff works in consultation with other specialists from pediatric endocrinology, pediatric metabolism and adult lipid clinic, as warranted. Primary care physicians refer children to this clinic for treatment.

# Metabolism

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The Metabolic Clinic is the only one of its kind in Oregon. It provides diagnostic and management services to children and adults with confirmed or suspected inborn metabolism errors. Special areas of expertise include disorders of amino acid and sugar metabolism, storage disorders and related degenerative neurological conditions and defects of mitochondrial function.

Team members include a pediatrician, registered dieticians and a nurse practitioner. Other specialists such as orthopedists and neurologists are available for consultation as needed. When appropriate, a nutritionist provides individualized consultation and special diet management.

The team conducts a metabolic clinic weekly at Doernbecher and holds outreach clinics in Bend, Eugene and Medford. Children are referred to this clinic by their primary care provider.

## OHSU Hospital

12th Floor  
700 S.W. Campus Dr.  
Portland, OR 97239

---

The Doernbecher Neonatal Care Center (DNCC) is a 46-bed neonatal facility, designed to accommodate the needs of Level II and/or Level III newborn infants and their families. This includes infants who are not more than 48 weeks post-conception and who need Level II/III care. Infants may be readmitted within one to two weeks after discharge from DNCC or another hospital. We accept other readmissions as needed to support the Department of Pediatrics at Doernbecher.

Faculty members share responsibilities for patient care, continuing education, research and clinical leadership and community service. Physicians also consult with health care professionals about referral to the DNCC and best care practices for their tiny patients.

Portland, OR 97239

## OHSU Doernbecher Specialties – Westside

15220 N.W. Laidlaw Rd.  
Suite 1000  
Portland, OR 97229

The faculty and staff of our Nephrology Division provide comprehensive evaluation, treatment and consultation services for pediatricians and family practitioners who care for children with a wide range of conditions — including hematuria, proteinuria, hypertension, recurrent urinary tract infections, nephrocalcinosis and chronic kidney disease. The interdisciplinary team is comprised of two Board-certified pediatric nephrologists, a pediatric renal nutritionist, a pediatric nephrology nurse, a pediatric dialysis nurse, a transplant nurse and a social worker.

This team approach allows us to work closely with families and the primary care provider to coordinate all aspects of these complex patients' care. This includes advice on diets for children with kidney diseases, balancing growth issues, monitoring labs and medication changes and the psychosocial issues that can accompany chronic kidney disease and transplantation. Primary care providers generally refer children to this service.

### Services

- Comprehensive evaluation, treatment and consultation for children with kidney disease or hypertension
- Complete hemodialysis and peritoneal dialysis services for children with acute and chronic renal failure
- Care for patients before and after a kidney transplant

The Neurodevelopmental Clinic is a tertiary care referral resource for children with established or suspected problems with development. The program focus is on children whose development is affected by sensorimotor deficits stemming from nervous system damage or dysfunction. This clinic also provides developmental monitoring and assessment of NICU graduates who are at high risk for motor difficulties, developmental delays, learning disabilities or sensory impairments.

The staff includes developmental pediatricians, occupational therapists, physical therapists, speech-language pathologists and audiologists. Often other services are helpful and the team makes recommendations for referral to these as needed. Examples include psychology, special education, nutrition, assistive technology, dentistry, genetics, metabolics, neurology, neonatology, ophthalmology and orthopedics.

# Neurological Surgery

## OHSU Center for Health & Healing

South Waterfront

3303 S.W. Bond Ave., 8th floor

Portland, OR 97239

The Division of Pediatric Neurosurgery, within the OHSU Department of Neurological Surgery, provides comprehensive neurosurgical evaluation and care at OHSU Doernbecher Children's Hospital and clinics. Children are referred for care by their primary care physician or other specialists.

General pediatric neurosurgical care is available for children from infancy up to age 18. Prenatal counseling is also available for parents expecting a child with spina bifida, hydrocephalus or other problems. Special interdisciplinary programs are offered in the following areas: Craniofacial disorders and Cranial Synostosis (with Pediatric Plastic Surgery), Brain and Spinal Cord Tumors (with Pediatric Oncology and Radiation Oncology), Epilepsy Monitoring and Surgery (with Pediatric Neurology), Spina Bifida and Tethered Spinal Cord (with the CDRC), Spasticity and Movement Disorders (with Pediatric Neurology and Shriner's Hospital for Children) and Pediatric Neurovascular Disorders (with Interventional Neuroradiology). The division also specializes in Chiari malformation, minimally invasive surgery using computer navigation, neuroendoscopy, intra-operative monitoring and intra-operative MRI.

Pediatric neurology provides comprehensive care for all children with neurologic problems and disabilities. Clinical activities focus on epilepsy, cerebral palsy, genetic/metabolic disorders, neuromuscular disorders and other developmental disabilities.

Neurology houses the state's only pediatric epilepsy program offering comprehensive diagnosis and treatment options, including medical and surgical management options. Clinical care is closely coordinated with the referring physician. We also offer access to state-of-the-art technology for video-EEG telemetry and functional neuroimaging including MR spectroscopy. The division has close relationships with behavioral pediatrics, child psychiatry, neurological surgery and neuroradiology. Children are referred to this service by their primary care provider.

3181 S.W. Sam Jackson Park Rd.  
Portland, OR 97229

---

The Northwest Clinic for Voice and Swallowing is a comprehensive clinic that provides evaluation and treatment for children presenting with voice or swallowing disorders, related airway issues, or voice rehabilitation following surgery, including tracheostomy. Clinic evaluations include visits with both a pediatric speech-language pathologist and otolaryngologist who work as a team to develop a treatment plan to address the child's voice or swallowing needs. Comprehensive testing and laryngeal imaging can be conducted through this clinic.

# Nutrition

Doernbecher's pediatric dietitians offer consultation, evaluation and medical nutrition therapy for children with normal and specialized nutritional needs. Pediatric dietitians work as key members of specialized health care teams in both inpatient and outpatient clinics — including diabetes, cystic fibrosis, feeding clinic/failure to thrive, hematology/oncology, neonatology, obesity, renal and eating disorders. Children are referred for outpatient treatment by their primary care physicians.

## Services

- Comprehensive nutrition assessment, including diet analysis, anthropometric measurements, monitoring growth parameters and evaluation of laboratory data
- Individualized nutrition care plans that include oral, gastrostomy and total parenteral nutrition feedings, depending on a child's needs

Portland, OR 97239

**OHSU Casey Eye Institute (Vancouver)**  
16701 S.E. McGillivray Blvd.  
Suite 170  
Vancouver, WA 98683

The Elks Children's Eye Clinic at the Casey Eye Institute offers full optical, medical and surgical care of all pediatric eye problems. The clinic is one of only a few pediatric ophthalmology centers in the west dedicated to pediatric eye care, research and education, and has become one of the most respected university pediatric ophthalmology and strabismus groups in the country.

Staff physicians are internationally recognized for their work in birth defects of the eye, including cataracts, glaucoma, eye tumors, eye injuries and complications related to premature birth. They are actively involved in clinical and translational research, and are a statewide resource for vision screening in schools, preschools, the community and medical offices.

### Services

- Diagnosis and management of strabismus (eye misalignment), amblyopia (lazy eye), pediatric ocular tumors, cataracts, glaucoma, blocked tear ducts, injuries, hereditary eye diseases and retinopathy of prematurity
- Infant vision assessment
- Routine eye care and other ophthalmological subspecialty consultation
- Contact lens fittings
- An optical shop, with an extensive selection of pediatric frames

# Oregon Poison Center

The Oregon Poison Center (OPC) is a 24-hour health care information and treatment resource serving the state of Oregon. The Poison Center staff includes doctors and nurses trained in toxicology. They utilize their professional expertise as well as an extensive variety of computer databases, textbooks and journal articles to determine the appropriate treatment guidelines for patients. A careful assessment of a patient's condition as well as the substance of exposure is necessary before determining treatment recommendations. The poison center staff also utilizes continuous follow up and evaluation to determine if treatment recommendations are effective in producing a positive patient outcome.

The OPC has an active public education program, providing resources for teaching about poison prevention, as well as stickers and other informational resources. The Oregon Poison Center provides professional education to health care providers and students from a variety of disciplines, through toxicology conferences, lectures and podcasts. For additional information regarding these programs, contact OPC administration at 503 494-8600.

**Cornell West Clinic**  
1500 NW Bethany Blvd.  
Suite 195  
Beaverton, OR 97006

The Pediatric Orthopaedics and Rehabilitation Practice provides a full spectrum of treatment for children with musculoskeletal problems. The practice serves children with trauma-related injuries and congenital or developmental musculoskeletal disorders, including children with cerebral palsy and other sensorimotor impairments. Common problems seen in this practice are hip dysplasia, clubfoot and benign musculoskeletal lesions. A certified orthotist (a maker and fitter of orthopedic appliances) works with our orthopaedists to provide braces. Primary care physicians and orthopaedic surgeons refer children to the practice for evaluation and treatment.

## Services

Diagnosis and treatment of the following conditions:

- Scoliosis and spine disorders
- Musculoskeletal conditions, including hip, knee, and foot deformities
- Sports-related injuries
- Upper extremity deformities
- Fractures and trauma
- Bone infections
- Malignant and nonmalignant tumors
- Bone dysplasia

# Pain Management Center

The Pediatric Pain Management Center is the only center of its kind in Oregon and is recognized by the American Pain Society as a Center of Excellence. The center focuses on acute and chronic pain management, research and education. Its multidisciplinary team is led by pediatric anesthesiologists and includes child psychologists, child life therapists and the pediatric pain nurses.

Patients can be referred to this program by their primary care provider or other medical specialist.

# Palliative Care

**OHSU Doernbecher Children's Hospital**  
Kenneth Ford Cancer Center, 10th floor  
700 S.W. Campus Dr.  
Portland, OR 97239

---

At Doernbecher Children's Hospital, the Bridges program provides comprehensive palliative care for children with chronic life-threatening conditions who may live for many years or eventually be cured, as well as those who require active end-of-life care. Our team focuses on quality of life and relief of suffering, sometimes in conjunction with curative or life-prolonging care.

Our team of experts includes doctors, nurses, and social workers specially trained in palliative care. We also work closely with child life and chaplain services to provide child and family support. We work together to ensure that we meet each child's physical, emotional, social and spiritual needs at all stages of care.

## Services

- Care focusing on quality of life and relief of suffering
- Child and family support and education
- Staff education on palliative care
- Meeting families' spiritual, religious and cultural requests
- Family portraits for terminally ill children
- Family bereavement services
- Assistance in identifying community home care or hospice resources
- Management of hospice care if requested by primary care provider or care team

# PANDA Transport

The Pediatric and Neonatal Doernbecher Transport (PANDA) Team provides immediate ground or air transport to OHSU Doernbecher Children's Hospital. PANDA primarily serves Oregon and Southwest Washington and also has the capability to provide ground and air transport services to other geographical areas depending upon the needs of the patient. Most transports are for critically ill neonates and children from referring hospitals in Oregon and Southwest Washington to our Pediatric Intensive Care Unit (PICU) or Doernbecher Neonatal Care Center (DNCC).

Referring providers who call for a transport will speak with the attending physician. A DNCC or PICU attending physician is available 24 hours day by telephone to initiate, triage and provide medical direction for each transport.

Our goal is to mobilize the PANDA Transport Team and leave Doernbecher within 15 minutes of initiating the transport. The PANDA Team uses ground (ambulance) and fixed-wing (airplane) modes of transport. Decisions about the mode of transport are based on safety, medical and cost-effectiveness factors.

PANDA TRANSPORT:

**888 667-2632**

*The only pediatric transport team in Oregon accredited by the Commission on Accreditation of Medical Transport Services.*

# Pediatric Intensive Care (PICU)

## OHSU Doernbecher Children's Hospital

8th Floor

700 S.W. Campus Dr.

Portland, OR 97239

The OHSU Doernbecher Children's Hospital Pediatric Intensive Care Unit (PICU) provides state-of-the-art critical care to any infant, child or adolescent who arrives with a serious illness or injury, or requires intensive care after a surgical procedure. As a part of OHSU, the Doernbecher PICU has a key role in developing and implementing educational and research activities in pediatric critical care medicine and nursing on a national level.

We are a tertiary referral center, serving children in Oregon, Washington, Idaho, Montana and northern California. The Doernbecher PICU is a 20-bed unit equipped with the latest technology to care for critically ill and injured children. Care is provided by eight board-certified Pediatric Intensive Care physicians who are on the unit 24/7.

# Psychiatry

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th floor

700 S.W. Campus Dr.

Portland, OR 97239

The Child and Adolescent Psychiatry Outpatient Clinic offers primary and tertiary psychiatric services for youths with mental health needs. Board-certified child and adolescent psychiatrists provide direct patient care and supervision in the outpatient clinic and on the consultation-liaison service. Resident physicians in advanced training for child and adolescent psychiatry also provide services in the clinic and on the consultation-liaison service. Children are referred to the service by their primary care providers.

### Services

- Psychiatric inpatient and outpatient consultation
- Urgent mental health consultation and stabilization
- Comprehensive psychiatric evaluation and treatment
- Individual psychotherapy for teens and children
- Medication evaluation and treatment
- Parent training
- Family therapy
- Coordination with primary care providers, non-psychiatric mental health providers and community agencies

Doernbecher Children's Hospital faculty has the depth and breadth of experience to treat the broad spectrum of all respiratory (breathing) conditions in children. We have a multidisciplinary approach to asthma, cystic fibrosis, and other lung and breathing conditions. We have an experienced staff of pediatric pulmonologists, nurses, dietitians, social workers, respiratory therapists, and speech pathologists.

Common pulmonary disorders seen in this clinic include cystic fibrosis, asthma, pneumonia, congenital lung malformations, recurrent aspiration, neuromuscular disease and sleep apnea. Children are seen by a pediatric pulmonologist, either by referral from their primary care provider or by calling us directly.

The Pediatric Pulmonary Function Laboratory is the only facility in Oregon dedicated to children's lung function testing. Doernbecher and OHSU also have Oregon's only care center approved by the Cystic Fibrosis Foundation. In addition, we are the only facility in Oregon with a comprehensive children's sleep disorder program.

The Division of Pediatric Radiology in the Department of Radiology at OHSU is known for its dedication and excellence in pediatric imaging and diagnosis. The digital technology is state-of-the-art and the most sophisticated in the Pacific Northwest. Radiology uses low-dose grid pulsed fluoroscopy, significantly reducing the radiation dose to patients.

This department also has a unique cooperative effort with the Department of Anesthesiology, whose members perform and monitor sedation safely and efficiently. Imaging includes conventional X-rays, ultrasonography, fluoroscopy, magnetic resonance imaging (MRI), computed tomography (CT), nuclear medicine and positron emission tomography/computerized tomography (PET/CT).

Doernbecher radiology accepts outside referrals for all radiologic services. See referral form at [ohsудоernbecher.com/referral](https://ohsудоernbecher.com/referral)

# Rehabilitation Services

## OHSU Doernbecher Children's Hospital

Specialty Clinics, 7th Floor

700 S.W. Campus Dr.

Portland, OR 97239

Doernbecher provides comprehensive pediatric rehabilitation services, on an inpatient and outpatient basis, for children with a wide variety of conditions.

Our occupational therapy program focuses on helping children and youth participate in daily life activities, such as self-care, play and school-related activities. Interventions are designed to promote development, establish foundational skills and address sensorimotor processing. We provide individual, multi-disciplinary and interdisciplinary evaluations.

Our physical therapy program addresses the development and functional motor needs of children of all abilities who have difficulty moving because of injury, disease or other health conditions. We also provide services for adults who have developmental motor disorders.

## Sedation Service

The Pediatric Sedation Service provides safe, efficient sedation services in non-operating room locations as needed to facilitate diagnostic and therapeutic procedures. Pediatric anesthesiologists work with sedation nurses to provide medical supervision and determine the level of care needed for the procedure or examination. Some procedures require very light sedation; others require deep sedation or general anesthesia. Sedation nurses provide the pre-procedure screening and education to help families and their children prepare for the sedation experience. The nurses also provide monitoring and recovery services.

**OHSU Sleep Disorders Clinic**  
**Hatfield Research Center**  
**13th floor, 13D89**  
3181 SW Sam Jackson Park Road.  
Portland, OR 97239

The Pediatric Sleep Disorders Program is a multidisciplinary program involving physicians from child psychiatry, pediatric pulmonary medicine, general pediatrics and pediatric otolaryngology. The disorders treated include obstructive sleep apnea, restless legs syndrome, narcolepsy, insomnia, behavioral sleep disorders, parasomnias (sleep terrors and sleep walking) and delayed sleep phase syndrome. Sleep studies, such as polysomnograms and multiple sleep latency tests, are performed at the OHSU Sleep Lab. The lab is located at the Marriott Residence Inn at Riverplace, where we are able to simulate an at-home sleep environment. Treatments include education, behavioral interventions, pharmacotherapy and potentially surgery or continuous positive airway pressure (CPAP) for sleep-disordered breathing.

University of Oregon  
901 E. 18th Ave.  
Eugene, OR 97403

The Portland Spina Bifida Clinic and the Eugene Spina Bifida Clinic staff care for patients of all ages with neural tube defects. Clinic activities include prevention through case finding, diagnosis and evaluation. The team makes recommendations to primary care physicians regarding intervention, long term management and coordination of care.

The program primarily serves children and young adults from birth through age 21. However, people with neural tube defects may be referred to the program at any age. The program counsels families who have had a prenatal diagnosis of neural tube defect to help prepare the family for delivery, infant care, and ongoing management. Children are referred to the clinic by their primary care physicians.

# Stem Cell/Bone Marrow Transplant Program

## OHSU Doernbecher Children's Hospital

10th Floor  
700 S.W. Campus Dr.  
Portland, OR 97239

Doernbecher is the only pediatric hospital offering blood and bone marrow transplants in Oregon. The program is accredited by the Foundation for the Accreditation of Cellular Therapy and the National Marrow Donor Program. Our dedicated team of doctors, nurse practitioners, nurses and associated health care staff specializes in caring for children and adolescents receiving blood stem cell or bone marrow transplantation. We treat patients with a variety of cancers and nonmalignant conditions such as immunodeficiencies, metabolic disorders and inherited blood disorders. Our program offers autologous transplants and allogeneic transplants using related donors, unrelated donors or cord blood.

### Services:

- Consultation for new patients and second opinions
- HLA-typing and donor search
- Bone marrow harvest and stem cell collections
- Inpatient and outpatient transplant care
- Long-term follow-up clinic
- Opportunity for participation in clinical research trials

# Surgery, General

Our pediatric general surgery team provides comprehensive surgical care for infants, children and adolescents. A collaborative team of specialists provide patients with individualized surgical care for a variety of conditions affecting the thoracic area, abdomen and pelvis including appendicitis and hernias, as well as rare or complex conditions such as solid tumors, pectus and other chest wall abnormalities, anorectal malformations and multiple congenital anomalies.

## Services

- Minimally invasive surgery
- Specialized endoscopic procedures
- Pectus excavatum/pectus carinatum repair
- Tumor resection
- Vascular access for IV therapy/chemotherapy
- Antegrade continence enemas
- Colorectal problems

Preparations for anxiolytic medications or conscious sedation is available for invasive clinic procedures. Additionally, the general surgery clinic offers specialty services for patients with ostomies and bowel management issues.

# Telemedicine

The OHSU Doernbecher Telemedicine Network provides immediate access to neonatal and pediatric critical care specialists throughout Oregon 24/7. Through our secure network, physicians at participating hospitals may consult “face to face” with Doernbecher pediatric critical care specialists or neonatologists to help evaluate time-critical patient needs and collaborate in development of treatment plans.

## Telemedicine can:

- Provide immediate access to a Doernbecher consultant
- Assist in the diagnosis and best possible treatment plan for the patient, which improves outcomes
- Avoid costly and stressful transfers for patients, keeping them in their local communities
- Reduce cost of care
- Increase satisfaction of local physicians and their patients

# Urology

## OHSU Doernbecher Children's Hospital

Specialty Clinic, 7th Floor

700 S.W. Campus Dr.

Portland, OR 97239

Pediatric urology provides comprehensive medical and surgical care for the infant and child with structural and functional abnormalities of the urinary tract. Our urologists regularly provide surgical reconstruction of the penis, bladder, ureters and kidneys. We also provide care for children with exstrophy, hypospadias, epispadias, hydronephrosis, vesicoureteral reflux and many other abnormalities of the genitourinary tract.

In addition, our pediatric urology program provides a voiding and incontinence clinic for children. This is especially important for those children with day and nighttime wetting and associated urinary tract infections. Conscious sedation is available for children who are anxious or who have had a bad experience with urological testing. Children are referred to this program by their primary care provider.
