| 17 | May 28 | Jun 17 | Subspecialty clinic | Inpatient consults | Inpatient |
| 18 | Jun 18 | Jul 6 | Inpatient | Subspecialty clinic | Inpatient consults |

***Studying for boards-**Pediatric boards are scheduled for October 10. Internal medicine boards can be scheduled on August 9, 10, 12, 15, 17 or 24. For a **total** of two weeks, first year fellows taking the boards will have no day-time clinical responsibility except for their continuity clinic. For those taking pediatric boards, the two weeks prior to the examination are dedicated to independent study. For those taking both the internal medicine and pediatric boards, one week prior to each scheduled examination is dedicated to independent study. The fellow is still responsible for sharing in nighttime call, though no weekend call will be scheduled during this time. They will be expected to attend the daily morning conferences and research conferences during this time. Independent study from home is allowable if the home environment is more conducive for uninterrupted learning.
