

Recognizing Outstanding Service Excellence

Yony Gonzalez
Food and Nutrition

Edward Marcell Jr. from Food and Nutrition submitted the following nomination...

I would like to nominate Yony for a Golden ROSE Award. Yony is not someone who is in the forefront of patient care. All of his work is done behind the scenes. He is a dishwasher in the 3rd floor kitchen. Yony's work is always great, but on this morning he was exceptional. As I arrived to work in the morning, I was welcomed to a not so pleasant smell. Upon further investigation I noticed a steady stream of water running through the dishwashing station. Waste water had backed up and was flowing into the kitchen. The sight of the water was something from a comic book. Yony noticed that our drain was backing up. Without being asked he helped unclog the drain multiple times over a three hour period. He did not seem to think he was doing anything special at the time. If the water flooded five more feet we would have had to shut down operation and serve patients cold sandwiches. Yony is not someone who seeks recognition, but is someone who is deserving of it.
