

Recognizing Outstanding Service Excellence

Elizabeth Pedigo, M.D.
Anesthesiology

Joyce Hartje, R.N., from the Pediatric Intensive Care Unit, submitted the following nomination...

In the Pediatric Intensive Care Unit (ICU), we had a fragile young child who was emerging from his sedation and was wild. Dr. Pedigo came to the rescue to order the correct medication to help with the situation, but mostly the three and a half hours she dedicated to this young child by holding him while his sedation wore off and thus allowing the family to regroup and calm down and see that their child was safe. Definitely over and above the call of MD duties, which allowed me, the patients nurse, to attend to other patients requiring care in the Pediatric ICU.

Award Recipient - December 2009
