RECENT POSTINGS TO THE IBC WEBSITE:

Template Biosafety Manuals and BSL-2 Lab Checklist

You may have noticed that OHSU's biosafety staff in the Research Safety Program have been conducting visits to all labs working with Biosafety Level 2 agents or above. We are required by the NIH Guidelines for Research Involving Recombinant DNA Molecules to conduct periodic inspections of labs to ensure that biosafety standards are met. The purpose of these visits is to provide guidance on meeting these standards, including those stated in the BMBL [Biosafety in Microbiological and Biomedical Laboratories \(BMBL\) 5th edition](#).

Do you need help preparing for these visits? The Research Safety Program has posted the following resources and template manuals to the website:

[Template Biosafety
Level 2 Manual](#)
[Template
Adenovirus
Biosafety Manual](#)
[BSL2-Lab Checklist](#)
