

IRB Department Connections

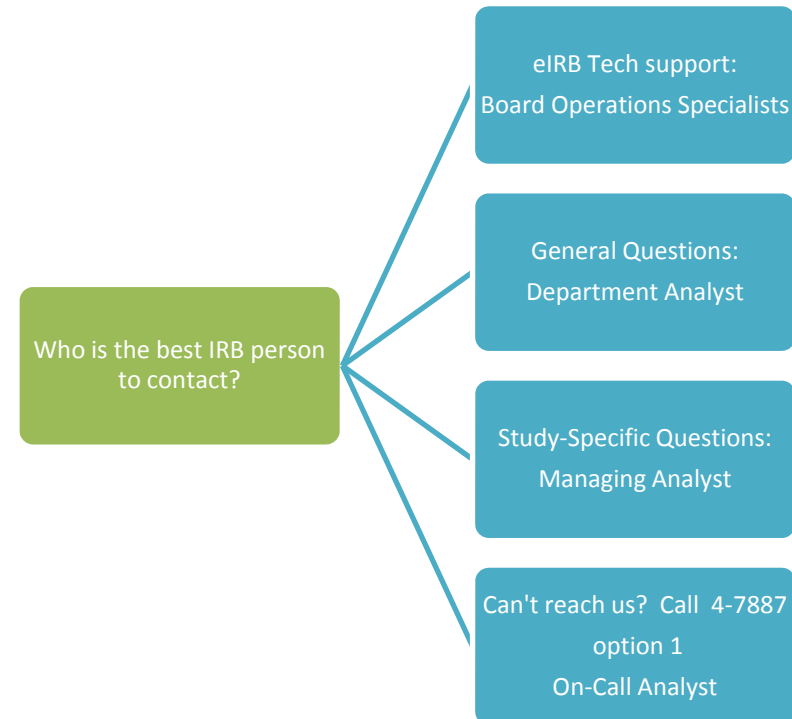

The OHSU Research Integrity Office would like to introduce you to the new “IRB Department Connections” listing. The purpose of this distribution list is to provide the research community with a primary contact person (analyst) for each department. Your department analyst will be available for in-person consultations and can provide departments with continuous updates on policy & procedure changes.

If you are having trouble navigating eIRB or if you have technical support questions, the **Board Operations Specialists (BOS)** who answer our main phone line are skilled at addressing many of these types of concerns, including checking for Conflict of Interest or other Big Brain compliance to ensure your project is ready for submission.

If you have general IRB questions, the best practice is to call your **department analyst** listed in the table below.

If you have study-specific questions and there is a managing analyst assigned to your submission, we encourage you to contact your **managing analyst** as she will be most familiar with your study, modification, or continuing review.

In the event that you are unable to reach your department analyst or managing analyst and need to speak with someone right away, please call our main office line (4-7887, option 1) and ask to speak with one of our **on-call analysts**.

If you find that your department is not currently represented on this listing, please contact Mindy Roberts, ORIO Assistant Director at 503-494-9337 or via email at robertmi@ohsu.edu.
