

## ARRA Economic Stimulus – NIH/AHRQ announcements

*Specific details for each award below may vary by institute. Details below are general details provided in the NIH announcement. For details, be sure to check with your specific institute before applying to ensure eligibility, amount, and deadline.*

*(updated 03.10.10)*

Title	Description	Deadline	Amount	Eligibility
<p><b>NEW</b>  <a href="#">Recovery Act Limited Competition: Impact of Decision-Support Systems on the Dissemination and Adoption of Imaging-Related Comparative Effectiveness Findings (UC4)</a>                      RFA-OD-10-012</p>	<p>For studying the impact of clinical decision support systems in disseminating and increasing the consideration of imaging-related comparative effectiveness research findings. The purpose of this opportunity is to implement and assess real-time decision support systems, which if effective, could be broadly adopted.</p>	<p><b>May 5, 2010</b></p>	<p>Up to \$500,000 per year for two years.</p>	<p>Standard NIH eligibility requirements apply.</p>
<p><b>NEW</b>  <a href="#">Centers for Disease Control and Prevention (CDC) - Laboratory Technical Implementation Assistance for Public Health Cooperative Agreement Program</a></p>	<p>Provides funding to advance public health laboratory capacity to share laboratory orders and results electronically with clinical care and public health agencies in order to achieve meaningful use. This cooperative agreement will establish Laboratory Technical Implementation Assistance for Public Health (LTIAPH) to assist state/territorial/large local public health laboratories and state/local health departments to enhance laboratory information management systems (LIMS) and other critical IT infrastructure to support interoperability of electronic laboratory data between clinical care (through EHRs) and public health agencies.</p>	<p><b>Letter of intent (required):                      March 12, 2010                      Full application:                      April 2, 2010</b></p>	<p>Up to \$2 million for one year.</p>	<p>Standard CDC eligibility requirements apply.</p>
<p><b>NEW</b>  <a href="#">Recovery Act Limited Competition: The NIH Director's ARRA Funded Pathfinder Award to Promote Diversity in the Scientific Workforce (DP4)</a>                      RFA-OD-10-013</p>	<p>A new research grant program that encourages exceptionally creative individual scientists to develop highly innovative and possibly transforming approaches for promoting diversity within the biomedical research workforce. To be considered highly innovative, the proposed research must reflect ideas substantially different from those already being pursued or it must apply existing research designs in new and innovative ways to unambiguously identify factors that will improve the retention of students, postdoctoral fellows and faculty from diverse backgrounds. The goal of this opportunity is to recruit the most talented researchers from all groups; to improve the quality of the educational and training environment; to balance and broaden the</p>	<p><b>May 4, 2010</b></p>	<p>Up to \$2 million in total costs for a project period of three years. Facilities and Administrative costs are included in the total cost amount.</p>	<p>Any individual with the skills, knowledge, and resources necessary to carry out the proposed research as the PD/PI is invited to work with his/her organization to develop an application for support. Awardees must commit a major portion (generally 30% or more) of their research effort to activities supported by the Director's Pathfinder Award and the proposed research must be endorsed by the highest levels of institutional management.</p>

Title	Description	Deadline	Amount	Eligibility
	<p>perspective in setting research priorities; to improve the ability to recruit subjects from diverse backgrounds into clinical research protocols; and to improve the Nation's capacity to address and eliminate health disparities.</p>			
<p><a href="#">NINDS Administrative Supplements for Collaborative Activities to Promote Translational Research (CAPTR)</a> NOT-NS-10-008</p>	<p>National Institute of Neurological Disorders and Stroke (NINDS) announces the availability of one-year administrative supplements for NINDS-funded grantees to stimulate new interdisciplinary collaborations in translational research. The proposed studies must be within the scope of the peer-reviewed activities specified within the NINDS parent award and collaborators may not have a significant history of joint interactions.</p>	<p><b>April 26, 2010</b></p>	<p>Up to \$50,000 in direct costs for a one-year period. If two NINDS grantees are submitting a joint application, each can request up to \$50,000 direct costs. F&amp;A costs will be paid at the full, negotiated rate. NINDS plans to commit up to \$1,000,000 total costs towards this administrative supplement program, with a maximum of 13 awards anticipated.</p>	<p><b>**See announcement for full details</b></p> <p>Before submitting grantees should communicate with their Program Director(s).</p> <p>At least one investigator within the collaboration must be the Program Director/Principal Investigator on an NINDS supported grant. This PD/PI can either use the funds to support his or her part of the collaborative activity, the participation of a collaborator/co-investigator at their home institution, or subcontract to an outside investigator(s) to support his/her involvement.</p> <p>The collaboration must be new. Investigators with a significant history of collaboration are not eligible to apply jointly. Likewise, the collaboration should not already be apparent and supported through a funded NIH activity. The new, collaborating investigator must be independent.</p> <p>Supports administrative supplements to R00 and R01, conditional seven-year Javits award for highly meritorious applications (R37), and P01 awards to NINDS grantees. Parent awards must be actively funded through July 31, 2011 in order to be eligible.</p>

Title	Description	Deadline	Amount	Eligibility
<p><b>Deadline updated</b>  <a href="#">AHRQ –Comparative Effectiveness Delivery System Demonstration Grants (R18)</a>  RFA-HS-10-013</p>	<p>To conduct demonstrations that implement and evaluate evidence-based strategies and interventions in delivery systems. Demonstrations will focus on either: (1) strategies and interventions for improving care by redesigning care delivery, or (2) strategies and interventions for improving care by redesigning payment. The demonstrations will aim to achieve major improvements in care quality (including clinical outcomes and other dimensions), improve access to care, reduce disparities, or improve population-based measures of health outcomes. The demonstrations will address issues related to the Department of Health and Human Services (HHS) priorities, including those of Medicare and Medicaid. Each demonstration will report on adoption, implementation, and outcomes for evidence-based redesign strategies and/or interventions and will compare these with other strategies with current, standard practices.</p>	<p><b>April 7, 2010</b></p>	<p>Up to \$5 million total for up to three years. Typical awards will not exceed \$3 million total for the three year project period.</p>	<p>Standard AHRQ eligibility requirements apply.</p>
<p><a href="#">AHRQ–Enhanced State Data for Analysis and Tracking of Comparative Effectiveness Impact: Improved Clinical Content and Race-Ethnicity Data (R01)</a></p>	<p>To prevent and treat important clinical conditions by building an infrastructure that will advance knowledge about the comparative effectiveness of important methods, strategies, and treatment regimens. Projects can seek to achieve this goal by either 1) enhancing the clinical content of statewide, all-payer, hospital-based encounter-level data to support comparative effectiveness research, or 2) improving the reliability and validity of information in hospital-based encounter-level data related to race and ethnicity.</p>	<p><b>March 29, 2010</b></p>	<p>Up to \$1.5 million total for a total project period of three years. Typical costs in a single year are expected to range from \$200,000 total costs to \$400,000 total costs.</p>	<p>Standard AHRQ eligibility requirements apply.</p>
<p><b>Deadline updated</b>  <a href="#">Comparative Effectiveness Delivery System Evaluation Grants (R01)</a>  RFA-HS-10-012</p>	<p>To conduct rigorous comparative evaluations of alternative system designs, change strategies, and interventions that have already been implemented in healthcare and are likely to improve quality and other outcomes.</p>	<p><b>March 31, 2010</b></p>	<p>Up to \$500,000 per year for up to three years.</p>	<p>Standard AHRQ eligibility requirements apply. While cost sharing is not a requirement, the AHRQ welcomes applicant institutions, including any collaborating institutions, to devote resources to this effort.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">AHRQ Accelerating Implementation of Comparative Effectiveness Findings on Clinical and Delivery System Interventions by Leveraging AHRQ Networks (R18)</a> RFA-HS-10-014</p>	<p>A Research Demonstration and Dissemination grant to promote the increased implementation and widespread use of findings from comparative effectiveness research (CER) that have been demonstrated to improve the prevention, diagnosis, management or treatment of a clinical condition or to otherwise improve care quality, improve access to care, reduce disparities, or improve population-based measures of health outcomes.</p>	<p><b>March 24, 2010</b></p>	<p>Amounts vary, however no applicant may receive more than a total of \$5 million total costs over the 3 year project period.</p>	<p>This opportunity particularly seeks applications from the following 3 existing AHRQ networks: the ACTION (“Accelerating Change and Transformation in Organizations and Networks”) Network; <b>Primary Care Practice-Based Research Networks (PBRNs)</b> that are registered with the AHRQ PBRN Resource Center; and AHRQ-Designated Chartered Value Exchanges (CVEs). Other applicants which are not members of one of these named networks will be considered eligible if they: can demonstrate the capacity to meet all the requirements specified in this solicitation; have a documented track record of successfully taking proven practices to scale and/or implementing broad delivery system change; and meet one of the organizational/institutional characteristics listed in the <a href="#">full announcement</a>.</p>
<p><a href="#">Program to Enhance NIH-supported Global Health Research Involving Human Subjects (S07)</a> RFA-OD-10-006</p>	<p>To provide short-term support for U.S. and developing country institutions already collaborating on NIH supported human subjects’ research to jointly strengthen the ethical review and monitoring of such projects through enhanced collaboration and communication. This support is meant to improve the quality as well as enhance the efficiency of the ethical review and monitoring and accelerate global health research.</p>	<p><b>March 22, 2010</b> *requires ELT approval Internal</p>	<p>May not exceed <b>\$50,000</b> direct costs per year for a one-year project period. Cost sharing is not required, but institutional commitment is required to be documented in a letter of support.</p>	<p><b>*LIMITED SUBMISSION - requires ELT approval</b> to apply. Email <a href="mailto:funding@ohsu.edu">funding@ohsu.edu</a> by February 12, 2010 if you are interested.</p> <p>Only one application from OHSU can be submitted. Applicants are expected to apply with a developing country collaborating institution as defined by the World Bank (according to Gross National Income (GNI) per capita as “low-income,” “lower-middle-income,” and “upper-middle-income.”</p> <p>Appropriate institutional commitment to the program includes the provision of adequate staff, facilities, and resources that can contribute to the planned program.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">Framework Programs for Global Health Signature Innovations Initiative (R24)</a> RFA-OD-10-007</p>	<p>Funding to enhance the infrastructure and opportunities at the participating institutions for training postdoctoral investigators to carry out innovative, multidisciplinary research in Global Health. The initiative emphasizes hands on, problem solving, and collaborative approaches and may require the development of new training models and new partnerships within and beyond the university community. The programs provides short-term support to U.S. universities and their partners to build capacity to train postdocs to carry out innovative, multidisciplinary research in Global Health and to attract new investigators with diverse expertise into this research field. Institutions should propose to build research or research training infrastructure and develop training resources and activities that will provide the university community with the tools, concepts, mentoring, and opportunities that will nurture innovative multidisciplinary approaches to Global Health research that go beyond sharing viewpoints to actively working together on common research problems.</p>	<p><b>March 22, 2010</b> *requires ELT approval Internal</p>	<p>The amount of funding varies depending on the type of grant – single \$250,000) or consortia (\$400,000) for a one year period.</p>	<p><b>*LIMITED SUBMISSION - requires ELT approval</b> to apply. Email <a href="mailto:funding@ohsu.edu">funding@ohsu.edu</a> by February 12, 2010 if you are interested.</p> <p>Only one application from OHSU can be submitted. All current or former U.S. FIC Framework Programs for Global Health grantee institutions are eligible to apply for this initiative.</p> <p>Appropriate institutional commitment to the program includes the provision of adequate staff, facilities, and resources that can contribute to the planned program.</p>
<p><a href="#">AHRQ Scalable Distributed Research Networks for Comparative Effectiveness Research (R01)</a> RFA-HS-10-015</p>	<p>To develop the infrastructure and improve the methodology for collecting prospective data from electronic clinical databases to generate new evidence on the comparative effectiveness of healthcare interventions.</p> <p>The goal is to enhance the capability and capacity of electronic health networks designed for distributed research to conduct prospective, comparative effectiveness research on outcomes of clinical interventions. The clinical interventions include, but are not limited to, diagnostics, therapeutics (drugs and biologics), medical devices, behavioral interventions, and surgical procedures used in clinical care.</p>	<p><b>March 10, 2010</b></p>	<p>\$2 million to \$2.77 million total costs per year. Total costs may not exceed \$2.77 million annually. The duration of the project may not exceed three years.</p> <p>AHRQ anticipates awarding up to a maximum of three grants</p>	<p>While there is no cost sharing requirement, an indication of institutional support from the applicant and its collaborators indicates a greater potential of success and sustainability of the project. Examples of institutional support would include: donated equipment and space, institutional funded staff time and effort, or other resource investments. Applicant institutions that plan to provide support should indicate institutional support by outlining the specific contributions to the project and providing assurances that their organization and any collaborators are committed to providing these funds and resources to the project.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">AHRQ Enhanced Registries for Quality Improvement and Comparative Effectiveness Research (R01)</a> RFA-HS-10-020</p>	<p>To develop the infrastructure and improve the methodology for collecting prospective data from electronic clinical databases to generate new evidence on the comparative effectiveness of healthcare interventions.</p> <p>The goal is to enhance the electronic clinical capability of an <b>existing</b> registry for two purposes: 1) create and analyze valid data for comparative effectiveness research, and 2) enhance the ability to monitor and advance quality improvement of clinical care.</p>	<p><b>March 29, 2010</b></p>	<p>\$2 million to \$4 million total costs per year. The duration of the project may not exceed three years.</p>	<p>While there is no cost sharing requirement, an indication of institutional support from the applicant and its collaborators indicates a greater potential of success and sustainability of the project. Examples of institutional support would include: donated equipment and space, institutional funded staff time and effort, or other resource investments. Applicant institutions that plan to provide support should indicate institutional support by outlining the specific contributions to the project and providing assurances that their organization and any collaborators are committed to providing these funds and resources to the project.</p>
<p><a href="#">Institutional Comparative Effectiveness Research Mentored Career Development Award (KM1)</a> RFA-OD-10-011</p>	<p>Funding for institutions to support mentored career development in support of comparative effectiveness research (CER) in an interdisciplinary environment catering to the needs of diverse populations of scholars including (but not limited to) those with backgrounds in biostatistics, epidemiology, health economics, pharmacology, medicine, and dentistry.</p> <p>The proposed institutional research career development program should complement other ongoing research training and career development programs occurring at the applicant institution and it is expected that a substantial number of program faculty will have active research projects in which participants may gain relevant experiences consistent with their research interests and goals.</p>	<p><b>March 25, 2010</b> *requires ELT approval Internal</p>	<p>Up to \$2.5M in total costs of the entire project period, not to exceed three years.</p>	<p><b>*LIMITED SUBMISSION - requires ELT approval</b> to apply. OHSU can only submit one application and institutional support and commitment is required. If interested, contact <a href="mailto:funding@ohsu.edu">funding@ohsu.edu</a> <b>by February 19, 2010.</b></p> <p>The PD/PI should be an established investigator in the scientific area in which the application is targeted who is capable of providing both administrative and scientific leadership to the development and implementation of the proposed program.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">Accelerating Adoption of Comparative Effectiveness Research Results by Providers and Patients (R18)</a> RFA-AE-10-001</p>	<p>To develop and test interventions to improve the translation and adoption of existing comparative effectiveness research (CER) information and incorporate these findings into practice in both the public and private sectors. Funds will be used to support organizations that 1) develop and implement evidence-informed and innovative CER-based adoption interventions targeting patients and/or providers; 2) develop proposals that test the implementation of CER-based adoption strategies within and across organizations and delivery systems and analyze any behavior change (in patients and/or providers) associated with the intervention.</p>	<p><b>March 11, 2010</b></p>	<p>Up to \$1M in total costs of the entire project period, not to exceed three years.</p>	<p>Institutions/organizations with any of the following characteristics:</p> <ul style="list-style-type: none"> <li>• Integrated health care systems</li> <li>• Integrated provider systems</li> <li>• Academic Medical Centers</li> <li>• Provider consortia</li> <li>• Community Health Center Networks</li> <li>• Private payers</li> <li>• Other non-governmental organizations that administer or directly provide health care services</li> <li>• Organizations that serve health care consumers</li> <li>• University-based school (e.g. School of Public Policy or Public Health)</li> <li>• Private research institutes</li> </ul>
<p><a href="#">Competitive Revision Applications for Small Business Innovation Research and Small Business Transfer Technology Research Grants (R43/R44 and R41/R42) through the NIH Basic Behavioral and Social Science Opportunity Network (OppNet)</a> NOT-OD-10-034</p>	<p>To accelerate innovation through basic behavioral and social science research (<a href="#">b-BSSR</a>) and development that has commercial potential and is relevant to the mission of OppNet (<a href="http://oppnet.nih.gov">http://oppnet.nih.gov</a>). Competitive revisions must focus on b-BSSR that has the potential to accelerate results (e.g., products, processes or services) and/or includes innovative research tools, techniques, devices, inventions, or methodologies. Competitive revision applications must support a significant expansion of the scope or research protocol approved and funded for the “parent” small business award on which the revision application is based.</p>	<p><b>March 25, 2010</b></p>	<p>Up to \$150,000 in direct costs, not to exceed one year. Budget must not exceed the average annual budget (direct costs) of the “parent” award.</p> <p>Equipment/technology acquisition cannot exceed \$75,000 direct costs</p>	<p>Revision applications to active NIH Small Business Research Grants for the following activity codes: (R41, R42, R43, R44 and SBIR/STTR Fast-Track).</p> <p>The “parent” award must be active at the time the application is submitted, and the research proposed in the revision application must be accomplished within one year. The project period of the competitive revision may not extend the “parent” award. If a no-cost extension is needed to complete the work to be proposed in the revision, the no-cost extension must be in place before the application is submitted.</p>
<p><a href="#">Competitive Revision Applications (R01, R03, R15, R21, R21/R33, and R37) for HIV/AIDS-related Research through the NIH Basic Behavioral and Social Science Opportunity</a></p>	<p>to accelerate, expand, and/or strengthen basic behavioral and social sciences research (<a href="#">b-BSSR</a>) relevant to HIV/AIDS risk, prevention, and treatment. Competitive revision applications must support a significant expansion of the scope or research protocol approved and funded for the “parent” award on which the revision application is based.</p>	<p><b>March 25, 2010</b></p>	<p>Up to \$150,000 in direct costs, not to exceed one year. Budget must not exceed the average annual budget</p>	<p>Competitive revision applications to active NIH Research Grants that have potential relevance to HIV/AIDS risk, prevention, and treatment for the following activity codes: R01, R03, R15, R21, R21/R33, and R37.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">Network (OppNet)</a> NOT-OD-10-033</p>			<p>(direct costs) of the “parent” award.</p> <p>Equipment/technology acquisition cannot exceed \$75,000 direct costs .</p>	<p>The “parent” award on which the revision application is based must be active at the time the revision application is submitted, and the research proposed in the revision application must be accomplished within one year. The project period of the competitive revision may not extend that of the “parent” award. If a no-cost extension is needed to complete the work to be proposed in the revision, the no-cost extension must be in place before the application is submitted.</p>
<p><a href="#">Competitive Revision Applications (R01, R03, R15, R21, R21/R33, and R37) through the NIH Basic Behavioral and Social Science Opportunity Network (OppNet)</a> NOT-OD-10-032</p>	<p>To accelerate, expand, and/or strengthen basic behavioral and social sciences research (<a href="#">b-BSSR</a>). Competitive revision applications must support a significant expansion of the scope or research protocol approved and funded for the “parent” award on which the revision application is based.</p>	<p><b>March 25, 2010</b></p>	<p>Up to \$150,000 in direct costs, not to exceed one year. Budget must not exceed the average annual budget (direct costs) of the “parent” award.</p> <p>Equipment/technology acquisition cannot exceed \$75,000 direct costs .</p>	<p>This announcement is for competitive revision applications to active NIH Research Grants for the following activity codes: R01, R03, R15, R21, R21/R33, and R37.</p> <p>The “parent” award on which the revision application is based must be active at the time the revision application is submitted, and the research proposed in the revision application must be accomplished within one year. The project period of the competitive revision may not extend that of the “parent” award. If a no-cost extension is needed to complete the work to be proposed in the revision, the no-cost extension must be in place before the application is submitted.</p>
<p><a href="#">NIH Basic Behavioral and Social Science Opportunity Network (OppNet) Short-term Mentored Career Development Awards in the Basic Behavioral and Social Sciences for Mid-career and Senior Investigators (K18)</a> RFA-OD-10-003</p>	<p>For short-term mentored career development (K18) awards in the basic behavioral and social sciences research (b-BSSR) from three months to one year in duration. The program targets established, mid-career and senior investigators, to support their development of research capability in b-BSSR.</p>	<p><b>February 18, 2010</b></p>	<p>NIH anticipates that 10-20 awards will be made; amounts vary-see announcement for complete details.</p>	<p>For mid-career and senior investigators holding a research or health professional doctorate who are at the academic rank of Associate Professor or Professor, or the equivalent in nonacademic settings, who have established records of independent research who seek an intense, mentored career development experience which will substantially improve their ability to pursue future</p>

Title	Description	Deadline	Amount	Eligibility
				research in the basic behavioral and social sciences. Specifically, (a) biomedical or clinical researchers with little experience in basic behavioral and social sciences research who seek training with a well established b-BSSR investigator in order to explore the introduction of b-BSSR into their research programs; and (b) investigators in the basic or applied behavioral and social sciences who wish to build new components or domains of basic-BSSR into their research programs.
<a href="#">Research On Biosamples From Selected Diabetes Clinical Studies (RC4)</a> <b>RFA-OD-10-010</b>	Funding for: 1) Access to non-renewable (non- DNA) samples generated by selected NIDDK-funded clinical trials and studies and funding to perform validated laboratory assays on the requested samples; OR 2) To apply for funding for assays to be performed on non-renewable (non- DNA) samples generated by selected NIDDK-funded clinical trials and studies, with proof of access approved by the consortia.	<b>March 11, 2010</b>	NIH anticipates that 5-10 awards will be made; no more than \$400,000 total costs over a two-year project period	Standard NIH eligibility requirements.
<a href="#">Administrative Supplements for Comparative Effectiveness Research Workforce Development</a> <b>NOT-OD-10-037</b>	To develop, expand, and/or increase Comparative Effectiveness Research training, education, and career development program(s) within existing Domestic (U.S.) NIH-supported grants. The purpose is to expand the numbers of researchers qualified to oversee or conduct comparative effectiveness research (CER). Activities may include, but are not limited to: adding scholar or training slots for CER education and training through short courses, Certificate programs, and advanced degree-awarding programs; creating a course curriculum for early or midcareer researchers to develop or enhance skills in CER; creating an outreach training or course for community based research to develop or enhance skills in CER; and developing a CER training or course to include related fields such as communication and information dissemination science, medical decision-making, and outcomes and evaluation research as long as the proposal's specific aims supports Federal Coordinating Council-defined CER.	<b>March 1, 2010</b>	Up to \$500,000 in total costs for no more than a one year project and budget period	Detailed eligibility requirements; please see announcement for full details.  PIs holding institutional K12, K30, T32, T35, and T90 awards, together with their KL and TL equivalents may be eligible, however many R and P grants, including S10 are not. Consult your program officer for questions on eligibility.  The PI of the Supplement Request must be the PI named on an NIH award and the parent grant must be active and activities proposed in the supplement must be accomplished within the current competitive segment.

Title	Description	Deadline	Amount	Eligibility
<a href="#">Methodology Development in Comparative Effectiveness Research (RC4)</a> RFA-OD-10-009	To enhance, develop, or evaluate methodologies to improve the efficiency, validity, and credibility of comparative effectiveness research (CER) studies. Research is needed to develop better methods for measuring or reducing these weaknesses, which include, for example, confounding bias in observational studies and selection bias in randomized trials.	<b>February 26, 2010</b>	Anticipate awarding 6-7 proposals; up to \$1.5M is available for the entire length of the grant period, and may not exceed three years.	Standard NIH eligibility requirements. Check announcement to make sure your institute is participating (NHBLI, NCI, NIBIB, NIDDK, NINDS, NLM, NIA, NIAAA, <b>NIDA &amp; NIMH added</b> )
<a href="#">Comparative Effectiveness Research on Upper Endoscopy in Gastroesophageal Reflux Disease (GERD), Eradication Methods for Methicillin Resistant Staphylococcus aureus (MRSA), and Dementia Detection and Management Strategies (RC4)</a> RFA-OD-10-008	To conduct preliminary comparative effectiveness research (CER) projects in targeted, high-priority areas in which such efforts have been lacking. See announcement for the three targeted topic areas. Applications should be thought of as large pilot or preliminary studies rather than definitive trials. The purpose of this research is to improve health outcomes by developing and disseminating evidence-based information to patients, clinicians, and other decision-makers, responding to their expressed needs, about which interventions are most effective for which patients under specific circumstances.	<b>February 26, 2010</b>	Anticipate awarding 4-6 proposals; up to \$1.25M is available for the entire length of the grant period, which may not exceed three years.	Standard NIH eligibility requirements. Check announcement to make sure your institute is participating (NIMH, NIAID, NIDDK, NIA)
<a href="#">NIH Director's Opportunity for Research in Five Thematic Areas (RC4)</a> RFA-OD-10-005	To develop and implement critical research innovations in one or more of the following five thematic areas: <ol style="list-style-type: none"> <li>1. Applying Genomics and Other High Throughput Technologies</li> <li>2. Translating Basic Science Discoveries into New and Better Treatments</li> <li>3. Using Science to Enable Health Care Reform</li> <li>4. Focusing on Global Health</li> <li>5. Reinvigorating the Biomedical Research Community</li> </ol> To address either a specific disease- or technology-related research question relevant to the mission of one or more Institutes, or propose the creation of a unique infrastructure/resource designed to accelerate scientific progress in the future.	<b>March 15, 2010</b>	Budgets must be greater than \$500,000 total costs per year for a project period no more than three years.	All NIH institutes are participating. Standard NIH eligibility requirements apply. Early and New Stage Investigators are eligible.
<a href="#">Behavioral Economics for Nudging the Implementation of Comparative Effectiveness Research: Pilot Research (RC4)</a> RFA-OD-10-002	To study how the principles of behavioral economics could be used to enhance the uptake of the results of comparative effectiveness research (CER) among health care providers in their practice.	<b>March 19, 2010</b>	Anticipate awarding 4-6 proposals; up to \$1.25M is available for the entire length of the grant period,	Standard NIH eligibility requirements. Check announcement to make sure your institute is participating (NIMH, NIA, NINDS, NINR, NIDA)

Title	Description	Deadline	Amount	Eligibility
			which may not exceed three years.	
<a href="#">Behavioral Economics for Nudging the Implementation of Comparative Effectiveness Research: Clinical Trials (RC4)</a> RFA-OD-10-001	Funding for clinical trials using the principles of behavioral economics to enhance the uptake of the results of comparative effectiveness research (CER) among health care providers in their practice. For this FOA, applicants must propose controlled trials that randomize units (whether individuals or clusters such as practices, hospitals, or larger units) to conditions, resulting in a randomized clinical trial (RCT) or cluster randomized trial (CRT).	<b>April 7, 2010</b>	Anticipate making two awards; \$7.5M is available for the entire project period, which may not exceed three years.	Standard NIH eligibility requirements. Check announcement to make sure your institute is participating (NIMH, NIA, NINDS, NINR, NIDA)
<a href="#">AHRQ Expansion of Research Capability to Study Comparative Effectiveness in Complex Patients (R24)</a> RFA-HS-10-001	Funding for Infrastructure Development (R24) grant applications organizations that propose to build or enhance partnerships, datasets and methodologies that will improve the capacity to study, and the quality of studies, of patients with multiple chronic illnesses (referred to as Complex Patients).	<b>January 20, 2010</b>	A maximum of \$500,000 total costs annually over a two year project period. AHRQ anticipates awarding 12 applications.	Standard AHRQ eligible requirements. No cost sharing is required, however AHRQ encourages resource support from the applicant institution or partners.
<a href="#">AHRQ Comparative Effectiveness Research to Optimize Prevention and Healthcare Management for the Complex Patient (R21)</a> RFA-HS-10-009	Funding for organizations that aim to understand the comparative value of different strategies in the prevention and management of chronic illness in persons with specific constellations of co-morbid conditions. Exploratory research studies will contribute evidence to help guide the appropriate integration (i.e., prioritization, timing, provision and coordination) of therapeutic and preventive services in individuals with multiple chronic conditions  Three types of projects will be supported: Epidemiologic descriptions based on secondary analysis; Analytic epidemiologic studies; Modeling studies	<b>January 20, 2010</b>	Varies; three types of projects will be supported. See announcement for full details.	Standard AHRQ eligible requirements. No cost sharing is required, however AHRQ encourages resource support from the applicant institution or partners.

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">AHRQ Mentored Clinical Scientists Comparative Effectiveness Development Award (K12)</a> RFA-HS-10-007</p>	<p>The purpose of this program is to support the career development of health services and clinical researchers who have made a commitment to focus their research on the generation, translation, and dissemination of new scientific evidence and analytical tools in comparative effectiveness. The award will provide three years of supervised study and research for one cohort of clinical and research doctorates.</p>	<p><b>January 20, 2010</b></p>	<p>Up to \$850,000 annually; project period may not exceed three years. AHRQ anticipates awarding 5-6 applications.</p>	<p>This opportunity <b>requires ELT approval</b> because it is a limited submission opportunity and OHSU can only submit one application. If interested in applying, please email <a href="mailto:funding@ohsu.edu">funding@ohsu.edu</a>.</p> <p>The PD/PI should be an established clinical-researcher in the area of comparative effectiveness research with a documented record of superior accomplishment, scientific expertise, leadership and administrative skills. The PD/PI should have experience in the design, implementation and management of related research training programs for developing clinical investigators, and must be able to demonstrate a superior record of preparation of post doctoral researchers, who conduct clinical comparative effectiveness research and have demonstrated a successful record of involving health system stakeholder input and partners in the conduct of research that has influenced health care delivery beyond the “bed-side”. The PD/PI must be able to demonstrate access to departmental or other funds for a scholar in the event of a gap in his or her mentor’s research funding.</p>
<p><a href="#">AHRQ Institutional National Research Service Award (NRSA) Postdoctoral Comparative Effectiveness Development Training Award (T32)</a> RFA-HS-10-011</p>	<p>The purpose of this program is to support the postdoctoral training of health services and clinical researchers who have made a commitment to focus their research on the generation, translation, and dissemination of new scientific evidence and analytical tools in comparative effectiveness. The award will provide two years of supervised study and research for two cohorts of clinical and research doctorates, with one cohort initiating training in the first year of the grant and the second initiating training in the second year of the grant.</p>	<p><b>January 20, 2010</b></p>	<p>Up to \$900,000 for the entire project period, up to three years</p>	<p><b>OHSU NOT ELIGIBLE</b> Applicants are only eligible if they have received new five-year NRSA institutional training awards from AHRQ in FY.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">AHRQ Recovery Act 2009 Limited Competition: PROSPECT Studies: Building New Clinical Infrastructure for Comparative Effectiveness Research (R01)</a> RFA-HS-10-005</p>	<p>PROSPECT (Prospective Outcome Systems using Patient-specific Electronic data to Compare Tests and therapies) Studies will be to advance the quality, depth and scale of the electronic data collection infrastructure as a basis for comparative effectiveness research.</p> <p>The projects will substantially enhance the nation's ability and capacity to systematically collect prospective data that will inform comparative effectiveness research on diagnostics, therapeutics, devices, behavioral interventions, and procedures used in clinical care, especially in populations typically under-represented in randomized control clinical trials or that have limited access to healthcare, or both, such as patients with multiple co-morbidities, extremes of age, and minorities.</p> <p>*Opportunity issued through the Agency for Healthcare Research and Quality (AHRQ)</p>	<p><b>January 20, 2010</b></p>	<p>From \$1.5 million to \$3 million total costs per year for no more than three years</p>	<p>Standard AHRQ eligibility requirements apply. The PD/PI must devote a minimum level of effort of 20% annually (2.4 calendar months) to the project.</p>
<p><a href="#">AHRQ Recovery Act 2009 Limited Competition: Electronic Data Methods (EDM) Forum for Comparative Effectiveness Research (U13)</a> RFA-HS-10-006</p>	<p>Conference support funding to convene investigators who are conducting PROSPECT (Prospective Outcome Systems using Patient-specific Electronic data to Compare Tests and therapies) studies on comparative effectiveness of clinical interventions used in priority conditions and populations (please see <a href="#">RFA-HS-10-005</a>), other experts in clinical registries, distributed research methods, health information technology and outcomes research, practicing clinicians, representatives from relevant organizations, and other stakeholders as needed.</p> <p>*Opportunity issued through the Agency for Healthcare Research and Quality (AHRQ)</p>	<p><b>January 20, 2010</b></p>	<p>Up to \$4 million; one award to be funded.</p>	<p>OHSU can submit only one application. If interested, contact <a href="mailto:funding@ohsu.edu">funding@ohsu.edu</a>.</p>
<p><a href="#">AHRQ Clinical and Health Outcomes Initiative in Comparative Effectiveness (CHOICE) Grants (R01)</a> RFA-HS-10-003</p>	<p>For large projects in comparative effectiveness aimed at generating new knowledge to help inform decision making in priority areas of clinical care. The impact of these studies should have a high likelihood of creating major advancements in clinical care.</p> <p>*Opportunity issued through the Agency for Healthcare Research and Quality (AHRQ)</p>	<p><b>December 16, 2009</b></p>	<p>Up to \$10 million in total costs over a maximum 3-year project period.</p>	<p>Standard NIH/AHRQ requirements apply. Only one PD/PI may be designated on the application. PI must devote at least 25% time commitment.</p>

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">Innovative Adaptation and Dissemination of Agency for Healthcare Research and Quality (AHRQ) Comparative Effectiveness Research Products (iADAPT) (R18)</a> RFA-HS-10-004</p>	<p>To increase the impact and effective use of one or more Comparative Effectiveness Research (CER) Review Products by developing, implementing, and evaluating customizations that target important audiences, stakeholders, systems, or settings that are not already specifically targeted or reached by the original review products. Customizations may be in the adaptation of the original CER Review or Executive Summary contents to a specialized clinical audience of potential users (such as Formulary or Pharmaceutical and Therapeutics Committees, health care systems with electronic platforms such as electronic medical records that could support clinical decision support) or adaptation of Comparative Effectiveness Research Summary Guides to underserved populations of patients/consumers whose interface with medical or internet sources of information is limited and who may instead use health care information and advice provided through traditional means, such as neighborhood-, community- or faith-based groups.</p> <p>*Opportunity issued through the Agency for Healthcare Research and Quality (AHRQ)</p>	<p><b>December 16, 2009</b></p>	<p>Up to \$1.5 million in total costs over a period of three years.</p>	<p>Standard NIH/AHRQ requirements apply. Only one PD/PI may be designated on the application. PI must devote at least 25% time commitment</p>
<p><a href="#">Building Sustainable Community-Linked Infrastructure to Enable Health Science Research (RC4)</a> RFA-OD-09-010</p>	<p>To support the development, expansion, or reconfiguration of infrastructures needed to facilitate collaboration between academic health centers and community-based organizations for health science research</p>	<p><b>December 11, 2009</b></p>	<p>Up to \$1 million over three years</p>	<p>Academic Health Centers who have engaged with the community and may have collaborated on projects of mutual interest. Applicants may submit more than one application, provided each application is scientifically distinct.</p>
<p><a href="#">Challenge Grants in Health and Science Research (RC1)</a> RFA-OD-09-003</p>	<p>Funding for institutions/organizations proposing novel research in areas that address specific knowledge gaps, scientific opportunities, new technologies, data generation, or research methods that would benefit from an influx of funds to quickly advance the area in significant ways. Research must address one of the stated <a href="#">Challenge Areas and Topics</a>.</p>	<p><b>April 27, 2009</b></p>	<p>\$500,000/year for two years (\$1M total)</p>	<p>Any individual(s) with the skills, knowledge, and resources necessary to carry out the proposed research as the PD/PI is invited to work with his/her organization to develop an application for support.</p>

Title	Description	Deadline	Amount	Eligibility
<a href="#">Research and Research Infrastructure “Grand Opportunities” (RC2)</a> RFA-OD-09-004	The purpose of the “GO” grants program is to support high impact ideas that lend themselves to short-term funding, and may lay the foundation for new fields of investigation. The program will support large-scale research projects that accelerate critical breakthroughs, early and applied research on cutting-edge technologies, and new approaches to improve the synergy and interactions among multi and interdisciplinary research teams.	<b>May 29, 2009</b>	At least \$500,000 total costs per year for two years.  Total funding is for this program is \$200M, and the NIH expects to award a total of 200 projects.	Varies by institute
Details vary by institute: see your institute’s website for full details on eligibility, and amount <a href="http://grants.nih.gov/recovery/ic_go.html">http://grants.nih.gov/recovery/ic_go.html</a>				
<a href="#">Recovery Act Funds for Administrative Supplements</a> NOT-OD-09-056	Supplement applications must be <b>within</b> the general scope of the peer-reviewed activities and aims approved within the parent grant. In general, NIH intends to accept applications for supplements under this notice in all scientific areas, but some institutes have their own individual priorities and will only fund within their stated priority areas.	<b>Open deadline – see institute for details</b>	Funding is for no more than two years and should not be for more than 50% of the amount of the parent award.	Active NIH Research Grants (Rs) and Research Program and Center Grants (Ps), as well as Career Development Awards (Ks), Institutional Training Grants (Ts), Cooperative Agreements (Us) and Educational Development Awards.
Details vary by institute: see your institute’s website for full details on eligibility, deadline dates, and amount <a href="http://grants.nih.gov/recovery/ic_supp.html">http://grants.nih.gov/recovery/ic_supp.html</a>				
<a href="#">Recovery Act Funds for Competitive Revision Applications</a> NOT-OD-09-058	Funding to support a significant expansion of the scope or research protocol of approved and funded projects. Revision applications must be for costs to support new research objectives and aims that are <b>outside</b> of the scope of the approved parent grant.	<b>April 21, 2009</b>	Varies by institute.  The requested budget must be reasonable and appropriate for the work being proposed. (Equipment purchases cannot exceed \$100,000.)	Active NIH Research Grants, including, but not limited to, R01, R03, R15, R21, R25, R33, R34, R37, R21/R33, R41, R42, R43, R44, SC1, SC2, SC3 grants, and Program Project grants, Center grants, Cooperative Agreements, Training Grants, and Institutional Career Development Awards.
Details vary by institute: see your institute’s website for full details on eligibility, deadline dates, and amount <a href="http://grants.nih.gov/recovery/ic_supp.html">http://grants.nih.gov/recovery/ic_supp.html</a>				

Title	Description	Deadline	Amount	Eligibility
<p><a href="#">Recovery Act Funds for Administrative Supplements Providing Summer Research Experiences for Students and Science Educators</a> NOT-OD-09-060</p>	<p>To encourage students to seriously pursue research careers in the health related sciences, as well as provide elementary, middle school, and high school teachers, community college faculty, and faculty from non-research intensive institutions with short term research experiences in NIH-funded laboratories.</p>	<p><b>Open deadline – see institute for details</b></p>	<p>Varies by institute.</p>	<p>Active NIH Research Grants, Research Program and Center Grants (Ps), and Cooperative Agreements (Us).</p>
<p>Details vary by institute: see your institute's website for full details on eligibility, deadline dates, and amount <a href="http://grants.nih.gov/recovery/ic_supp.html">http://grants.nih.gov/recovery/ic_supp.html</a></p>				
<p><b>NEW</b> (6.08.09) <a href="#">Recovery Act Limited Competition: Protection of Human Health by Immunology and Vaccines (U01 &amp; U19)</a> RFA-AI-09-040</p>	<p>Funding to create a Core Program (U19) or Research Program (U01/U19). Funds are for participation in creating a network of human immunology profiling research groups. Applications are sought that propose to study human immune responses (1) following infection, (2) prior to and following vaccination against an infectious disease, or (3) prior to and following treatment with an immune adjuvant that targets a known innate immune receptor(s). The purpose of this opportunity is to capitalize on recent advances in immune profiling to measure the diversity of human immune responses under a variety of conditions, using bioinformatic, multiplex, and/or systems biology approaches to study samples from well-characterized human cohorts and to measure aspects of the human transcriptome and/or proteome.</p>	<p><b>October 15, 2009</b></p>	<p>Varies per award mechanism (U01 or U19) – See full announcement.</p>	<p>Please see announcement for complete details regarding what funds can be used to support and the different requirements for Research Programs and Core Programs. Applications should not propose any clinical trials and should not propose budgets for any clinical trials.</p>
<p><a href="#">Enabling National Networking of Scientists and Resource Discovery (U24)</a> RFA-RR-09-009</p>	<p>To develop, enhance, or extend infrastructure for connecting people and resources to facilitate national discovery of individuals and of scientific resources by scientists and students to encourage interdisciplinary collaboration and scientific exchange.</p>	<p><b>June 15, 2009</b></p>	<p>No more than \$7.5M/year or a max. of \$15M over two years</p>	<p>Limited Submission – OHSU can only submit 1 application, but may participate in more, provided they are scientifically different. Applicants must be <u>NCCR funded centers (CTSA or NPRC)</u>. If interested, contact <a href="mailto:dresbeck@ohsu.edu">dresbeck@ohsu.edu</a> by April 30<sup>th</sup>, 2009.</p>
