Section 1: Patient Arrival

Parking - applies only to parking area within the immediate vicinity of the clinic

1. The required number of designated parking spaces are provided (i.e. 10% of total parking spaces) and each designated space displays the symbol shown to the right (see Appendix A).
   □ Yes
   □ No

2. At least one in every eight designated parking spaces is van accessible.
   □ Yes
   □ No

3. There are 98 inches of vertical clearance available for lift-equipped vans.
   □ Yes
   □ No
   □ N/A

Mark “N/A” only if vehicles are parked in an open area (with any overhanging foliage above 98”) and not in a parking garage.
4. All designated parking spaces are on the shortest route of travel to the building’s accessible entrance. □ Yes □ No You may have to ask what the clinic considers their “accessible” entrance.

5. Access aisles are present between designated spaces and surfaces are firm, stable and slip resistant. □ Yes □ No

6. In designated passenger loading zones, there is an access aisle at least 5 feet wide and 25 feet long adjacent and parallel to a vehicle pull-up space. □ Yes □ No □ N/A

May be marked “Patient Drop-Off” or alternatively identified with signs or painted stripes. If no identifiable zone, then mark "N/A."

7. Curb ramps in the parking area have a smooth transition from the ramp to the pedestrian route of travel. □ Yes □ No □ N/A Mark “N/A” only if curb ramps are unnecessary.
Approach to Building - applies from parking area to entrance of building

8. The route of travel does not require the use of stairs.
   □ Yes
   □ No

9. The surface of the route of travel is stable, firm and slip-resistant.
   □ Yes
   □ No

10. The route leading to the building is at least 36 unobstructed inches wide.
    □ Yes
    □ No
11. All curbs on the route of travel have curb ramps.

☐ Yes  ☐ No  ☐ N/A

If no curbs, then write "N/A." Ramp should have/be: Slope < 1:12 (measured at steepest point), stable, firm, and slip resistant, 36 inches wide exclusive of flared sides. If ramp does not meet these criteria, mark "No."

12. Where there are stairs at the main entrance, there is either a ramp, lift, or an alternative entrance provided.

☐ Yes  ☐ No  ☐ N/A

Mark “N/A” if there are no stairs at main entrance.

13. When alternative entrances are used, there is a sign at the main entrance indicating the location of the alternative entrance.

☐ Yes  ☐ No  ☐ N/A

Mark “N/A” only if there are no alternative entrances used.

14. Alternative entrances can be used without assistance.

☐ Yes  ☐ No  ☐ N/A

Mark “N/A” only if there are no alternative entrances used.

15. The entrance door has at least 32 inches clear opening (for a double door, at least one leaf with a 32-inch clear opening).

☐ Yes  ☐ No

16. There is at least 18 inches of clear, unobstructed wall space.

☐ Yes  ☐ No  ☐ N/A

If the door is automatic, mark “N/A.”
17. All threshold edges are 1/4 inch high or less, or if beveled edge, no more than 1/2 inch high.

☐ Yes
☐ No

---

**NOTES : APPROACH TO BUILDING**

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

---

**Ramps (where they exist along the path of travel)**

Mark "N/A" if no ramps are present.

18. The slope of a ramp (rise over run) should be no greater than 1:12 (or 8.33%)

☐ Yes
☐ No
☐ N/A

---

19. The surface of the ramp is stable, firm and slip resistant.

☐ Yes
☐ No
☐ N/A
20. The unobstructed width of the ramp is 36 inches.

☐ Yes
☐ No
☐ N/A

21. Any ramp that rises more than 6 inches or is longer than 72 inches has handrails on both sides.

☐ Yes
☐ No
☐ N/A

22. The tops of the handrails are between 34 and 38 inches above the ramp surface.

☐ Yes
☐ No
☐ N/A

23. When the ramp changes direction, there is a level landing of at least 60 by 60 inches.

☐ Yes
☐ No
☐ N/A

NOTES : RAMPS

________________________________________________________________________
Signage (those that direct to and within a clinic only)

Section A (Questions 24-26): Signs mounted above 80 inches.

Measure signs along path of travel from building entrance, to the clinic entrance, and within the clinic itself.

24. If mounted above 80 inches, characters on signs that provide directions and information have letters at least 3 inches high.
   - Yes
   - No
   - N/A

Mark “N/A” if no signs are mounted above 80 inches.

25. If mounted above 80 inches, characters on signs that provide directions and information have high contrast.
   - Yes
   - No
   - N/A

Mark “N/A” if no signs are mounted above 80 inches.

26. If mounted above 80 inches, characters on signs that provide directions and information have a non-glare finish.
   - Yes
   - No
   - N/A

Mark “N/A” if no signs are mounted above 80 inches.

NOTES: SIGNS MOUNTED ABOVE 80 INCHES

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
Section B (Questions 27-35): Measure signs within clinic only.

27. Signs designating all permanent rooms and spaces are present
   □ Yes
   □ No

28. Signs are mounted with centerlines 60 inches from floor.
   □ Yes
   □ No
   □ N/A
   Measurement of 60 inches should be taken from on the middle of the sign.
   Mark “NA” if answer to Q27 is “No.”

29. Signs are mounted on the wall adjacent to the latch side of the door and outside the door swing.
   □ Yes
   □ No
   □ N/A
   Mark “NA” if answer to Q27 is “No.”

30. Signs have characters and background with a non-glare finish.
   □ Yes
   □ No
   □ N/A
   Mark “NA” if answer to Q27 is “No.”
31. Signs have raised characters. □ Yes □ No □ N/A Mark “NA” if answer to Q27 is “No.”

32. Signs feature high contrast lettering and backgrounds. □ Yes □ No □ N/A Mark “NA” if answer to Q27 is “No.”

33. Signs feature Braille text. □ Yes □ No □ N/A

34. When a pictogram is used to designate rooms and spaces, it is accompanied by raised characters and Braille. □ Yes □ No □ N/A Mark “N/A” if no pictograms are used.

35. If signs designating rooms and spaces do not have raised characters, Braille, or pictograms, or are not present, there is other directional assistance available (i.e., sound recordings, or a receptionist nearby). □ Yes □ No
Section C (Question 35): Measure sign at clinic entrance only.

36. Sign is present at entrance to clinic at a height of 60 inches to centerline and features high contrast, raised and Braille characters, and non-glare finish.

[ ] Yes  [ ] No
### Controls (e.g. light switches, door handles)

<table>

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
**Doors (within the clinic building, excluding the entrance doors)**

39. When a door is opened to 90 degrees, there is a clear opening width of at least 32 inches measured between the face of the door and the door stop on the latch side.

- ☐ Yes
- ☐ No
- ☐ N/A

Mark “N/A” only if no doors are used within clinic.

40. Clear space between doors in a series is at least 48 inches.

- ☐ Yes
- ☐ No
- ☐ N/A

If both doors are automatic, then mark “N/A.”

41. There is at least 18 inches of clear wall space on the latch side of doors.

- ☐ Yes
- ☐ No
- ☐ N/A

Judge doors from waiting room to exam room/lab restroom on the path of travel only.

Mark “N/A” if door can be operated automatically.

42. The operating hardware is mounted no higher than 48 inches above the floor.

- ☐ Yes
- ☐ No
- ☐ N/A

If door opens automatically with a sensor, enter “N/A.”
43. All handles, locks, and latches or other opening hardware are operable with a single closed fist.

☐ Yes
☐ No
☐ N/A

Mark “N/A” only if no doors are used within clinic. If control operable, consider if usable with closed fist.

44. All threshold edges are 1/4 inch high or less, or if beveled edge, no more than 1/2 inch high.

☐ Yes
☐ No
☐ N/A

45. No more than five pounds of force is required to open an interior door (e.g., restroom door).

☐ Yes
☐ No
☐ N/A

Mark “N/A” if all doors used by public are automatic.

46. No more than 8.5 pounds of force is required to open an exterior door.

☐ Yes
☐ No
☐ N/A

Mark “N/A” if all doors used by public are automatic.

Section 2: Public Facilities

Telephones (any available for public use along path of travel)

Mark “N/A” if no telephone is available for public use.

47. The designated telephone has at least 30 by 48 inches of clear floor space.
   - Yes
   - No
   - N/A

48. The route to the telephone is at least 36 unobstructed inches wide adjoining or overlapping the clear floor space.
   - Yes
   - No
   - N/A

49. The highest operable part of the phone is no higher than 48 inches. Be sure to check coin and/or credit card slot height.
   - Yes
   - No
   - N/A
50. If a wall-mounted telephone has a leading edge between 27 and 80 inches from the floor, it projects less than 4 inches into the pathway. □ Yes □ No □ N/A

Enter "Yes" if telephone is recessed and not projecting into passageway.

51. The designated phone is adapted with volume control. □ Yes □ No □ N/A

Alternatively, look for volume adjustment button near keypad.

52. Volume controlled telephones are identified by a sign showing a handset radiating sound waves. □ Yes □ No □ N/A

53. When telephone banks (2 or more adjacent public phones) do not contain a text telephone (TTY), there is a sign to indicate location of nearest TTY. □ Yes □ No □ N/A
### Seating (in waiting area only)

54. All aisles between seating are at least 36 unobstructed inches wide.

- [ ] Yes
- [ ] No
- [ ] N/A

Mark “N/A” only if no seating area is available.

55. There is a space for a person in a wheelchair to wait without blocking the clear width of any aisles.

- [ ] Yes
- [ ] No
- [ ] N/A

Mark “N/A” only if no seating area is available.
**Counters (along the path of travel)**

56. The tops of tables or counters are between 28 and 34 inches high.

- [ ] Yes
- [ ] No
- [ ] N/A

57. When tables* are provided (excluding end tables) at least one has knee space of at least 27 inches high, 30 inches wide and 19 inches deep.

- [ ] Yes
- [ ] No
- [ ] N/A

*This question is concerned with tables or counters that provide seats (or transaction areas) for both clinic personnel and patients - for example, a check-out station, registration area, or reception desk.

**NOTES : COUNTERS**

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
Passageways (i.e., route of travel to clinic services excluding doorways)

58. All passageways are at least 36 unobstructed inches wide.

☐ Yes  ☐ No  ☐ N/A  If temporary objects protrude into passageway, then measure passageway to edge of object.

59. If the passageway is less than 60 inches wide, there are passing spaces at least 60 inches wide and 60 inches long or intersecting walks allowing passing at reasonable intervals not exceeding 200 feet.

☐ Yes  ☐ No  ☐ N/A  If passageway is more than 60 inches wide, mark N/A.

60. There is a 5-foot circle or T-shaped space (36 inches wide each direction and 60 inches minimum depth) to reverse direction.

☐ Yes  ☐ No  ☐ N/A  Note: This is a difficult measurement to make. It may require 2 people working together to make an accurate reading. Study the diagram closely, and take your time making your measurement.
61. Where a passageway makes a U-turn around an obstacle which is less than 48 inches wide, the passageway width increases to at least 42 inches on the approaches and 48 inches in the turn.

- Yes
- No
- N/A

Mark "N/A" if there is no U-turn around obstacle.

62. If passageway levels change, the vertical difference is less than 1/4 inch, or if the change in level is between 1/4 and 1/2 inch, there is a beveled edge with a slope no greater than 1:2.

- Yes
- No
- N/A

Mark "N/A" if there is no change in floor level.

63. Objects mounted on the wall that have leading edges between 27 inches and 80 inches from the floor project less than 4 inches into the passageway.

- Yes
- No
- N/A

Mark "N/A" if no protruding objects found. Objects with edges that extend below 27" are not considered obstructions because they are cane-detectable.

64. Carpeting is low-pile, tightly woven and securely attached along edges.

- Yes
- No
- N/A
**Water Fountains (where they exist along the path of travel)**

Mark “N/A” if no fountain is available to the public.

65. Where fountains are provided, there is a clear floor space of at least 30 by 48 inches.

- [ ] Yes
- [ ] No
- [ ] N/A

66. When fountains are provided, there is at least one fountain with its spout fixture no higher than 36 inches from the floor.

- [ ] Yes
- [ ] No
- [ ] N/A
67. If a wall-mounted fountain has a leading edge between 27 and 80 inches from the floor, it projects less than 4 inches into the pathway.

☐ Yes  ☐ No  ☐ N/A

[Note: Many times, there is a high-low fountain arrangement. The high fountain may be a protruding object if it is not recessed or does not have an extension underneath to bring it down to 27" to be cane detectable.]

Enter "Yes" if fountain is recessed and not projecting into passageway.

NOTES : WATER FOUNTAINS

Elevators (where they exist along the path of travel)

Mark “N/A” if elevators are not required to access clinic services and public facilities.

74. The call button has a visual signal that indicates direction of travel.

☐ Yes  ☐ No  ☐ N/A
75. The call button has an audible signal that indicates direction of travel.

- [ ] Yes
- [ ] No
- [ ] N/A

76. There are signs identifying the floor number in raised letters on both sides of the door jamb of the elevator at every floor.

- [ ] Yes
- [ ] No
- [ ] N/A

77. There are signs identifying the floor in Braille letters on both door jambs of the elevator at every floor.

- [ ] Yes
- [ ] No
- [ ] N/A

78. The elevator automatically comes within 1/2 inch of the floor landing at each stop.

- [ ] Yes
- [ ] No
- [ ] N/A
79. The elevator is large enough that a wheelchair user can enter, reach the controls and exit.

☐ Yes
☐ No
☐ N/A

80. The elevator doors reopen automatically without contact if an object passes through the opening between 5 and 29 inches above the floor.

☐ Yes
☐ No
☐ N/A

81. When reopened, it stays open for at least 20 seconds.

☐ Yes
☐ No
☐ N/A

82. The control buttons inside the elevator have Braille lettering.

☐ Yes
☐ No
☐ N/A
83. The control buttons inside the elevator have raised lettering.

- Yes
- No
- N/A

84. If provided, the emergency communication system (e.g., handset, intercom) is identified in both Braille and raised letters.

- Yes
- No
- N/A

85. If provided, the emergency communication system (e.g., handset, intercom) is no higher than 48 inches above the floor.

- Yes
- No
- N/A

86. All elevator controls are no lower than 15 inches and no higher than 48 inches from floor.

- Yes
- No
- N/A

Rest Rooms (Instructions: Assess restroom in public waiting room only).

Features for both toilet stalls and toilet rooms.

92. Signs are mounted on the wall on the latch side of the door, 60 inches from the floor to the middle of the sign.  
   □ Yes  
   □ No  

Measurement of 60 inches should be taken from the middle of the sign.

93. Where pictograms or symbols are used to identify rest rooms, Braille characters are included below them.  
   □ Yes  
   □ No  
   □ N/A  

Mark “N/A” if no pictograms are used.

94. Where pictograms or symbols are used to identify rest rooms, raised characters are included below them.  
   □ Yes  
   □ No  
   □ N/A  

Mark “N/A” if no pictograms are used.

95. The restroom doorway is at least 32 inches wide.  
   □ Yes  
   □ No  

96. Doors are operable with a single, closed fist.  
   □ Yes  
   □ No  

If control is operable, consider whether it is usable with a single, closed fist.
97. Door handles are placed no higher than 48 inches.  
☐ Yes  ☐ No  ☐ N/A  
Mark “N/A” only if door is automatic and operable control is no higher than 48 inches.

98. The entry is large enough for a wheelchair user to enter, turn around and exit.  
☐ Yes  ☐ No  
Note: This is a difficult measurement to make. It may require 2 people working together to make an accurate reading. Study the diagram closely, and take your time.

99. There is a 36-inch wide unobstructed path to all fixtures (e.g., sink, soap dispensers).  
☐ Yes  ☐ No  

100. The sink has a 30-inch wide by 48-inch deep clear space in front (a maximum of 19 inches of the required depth may be under the sink).  
☐ Yes  ☐ No  ☐ N/A  
Mark “N/A” only if there is no sink.
101. Pipes under the sink are covered to protect against contact.

☐ Yes
☐ No
☐ N/A

Mark “N/A” only if there is no sink.

102. Where counters or tables are provided, the top is between 28 and 34 inches from the floor.

☐ Yes
☐ No
☐ N/A

103. The sink rim is no higher than 34 inches.

☐ Yes
☐ No
☐ N/A

Mark “N/A” only if there is no sink.

104. The faucet is operable with a single closed fist.

☐ Yes
☐ No
☐ N/A

Mark “N/A” only if there is no sink.

105. The highest operable part of all dispensers and hand dryers is no higher than 48 inches for a forward approach.

☐ Yes
☐ No
☐ N/A

Mark “N/A” only if there are no dispensers.
106. All dispensers and hand dryers are operable with a single closed fist (pull-down paper-towel dispensers & many seat-cover dispensers are usually not accessible by this criteria).

☐ Yes  ☐ No  ☐ N/A

Mark “N/A” only if there are no dispensers.

107. The mirror is mounted with the bottom edge of the reflecting surface no higher than 40 inches.

☐ Yes  ☐ No  ☐ N/A

Note: This is a difficult measure to take and sometimes requires more than one measurement. Please use caution.

Mark “N/A” only if there is no mirror.

108. There are two horizontal grab bars: one on the wall behind the toilet and one on the side wall nearest to the toilet in the designated stall/toilet room.

☐ Yes  ☐ No

Mark “No” if grab bars are not present or are not positioned parallel to floor.
109. The toilet seat is 17"-19" high. Measure from floor to top of seat. □ Yes □ No

110. There is at least 18 inches of clear space from the center of the toilet to the wall(s) on either side. □ Yes □ No

Note: Make measurement to adjacent wall. Do not include objects such as toilet paper dispensers in your measurement.

111. At all rest rooms, there is a sign indicating the location of the designated rest room(s). □ Yes □ No □ N/A

This question is specific for other restroom locations. Mark “Yes” if non-accessible restrooms provide directional signage to accessible restroom. Mark “N/A” only if: 1) other public restrooms do not exist/are not available to public; or 2) other public restrooms are accessible.
NOTES : RESTROOMS (GENERAL CHARACTERISTICS)

(Proceed to next section!!)
**FOR TOILET STALLS ONLY**

Mark “N/A” if there are no toilet stalls. Proceed to next section: Toilet Room.

---

112. All stall door hardware is operable with a single, closed fist.

- [ ] Yes
- [ ] No

---

113. When stall door is open 90 degrees, there is at least 32-inches' clear width.

- [ ] Yes
- [ ] No

---

114. There is a designated stall with a clear floor space of at least 5 feet long by 5 feet wide.

- [ ] Yes
- [ ] No
- [ ] N/A
115. Where there is no stall with a clear floor space of five feet long and five feet wide, there is a stall that either 36 by 69 inches or 48 inches by 69 inches.

☐ Yes
☐ No
☐ N/A

116. There is at least 18 inches of clear space at the latch side of the stall door.

☐ Yes
☐ No

NOTES: TOILET STALLS ONLY

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

(Proceed to next section!!)
**FOR TOILET ROOMS ONLY**

Mark “N/A” if toilet rooms do not exist (i.e., there are stalls only) or if room floor plan is not applicable.

117. Where the toilet is approached from the front and there is a sink alongside the toilet, there is clear floor space of at least 48 inches wide by 66 inches long (toilet wall to opposite wall).

- □ Yes
- □ No
- □ N/A

If door swings inward, measure space clear of door swing. This is easiest done with 2 people.

118. Where the toilet is approached from the side and there is a sink alongside the toilet, there is clear floor space of at least 48 inches wide by 56 inches long (toilet wall to opposite wall).

- □ Yes
- □ No
- □ N/A

119. Where there is no sink alongside the toilet, there is a clear floor space of at least 60 inches wide by 56 inches long (toilet wall to opposite wall).

- □ Yes
- □ No
- □ N/A
Emergency Egress (a route or path for going out in case of an emergency)

120. The emergency route is at least 36 unobstructed inches wide.  
☐ Yes  ☐ No  
If temporary objects protrude into passageway, then measure passageway to edge of object.

121. The emergency route does not require the use of stairs.  
☐ Yes  ☐ No

122. Exit doors along the emergency route are accessible doors.  
☐ Yes  ☐ No

</tbody>
</table>
Section 3: Access to Mammography Exam Room and Services

129. There is a loaner wheelchair available. □ Yes □ No You may have to ask receptionist if a loaner wheelchair is not readily apparent.

130. There is a 36-inch passageway (excluding doorways) from the waiting area to designated exam room. □ Yes □ No

131. There are graphic charts for assessing pain for patients with cognitive disabilities. □ Yes □ No You may have to ask clinic personnel if a chart is available for use.
132. There is at least one lift or transfer device in exam room.

☐ Yes

☐ No

☐ N/A

Mark “N/A” only if this feature is not needed. Consider whether a transfer device (e.g., step stool with arm support) is needed to get on exam table.

133. All controls (e.g., light switches, door handles) are operable with a closed fist.

☐ Yes

☐ No

☐ N/A

Controls include light switches, locks, vending machines, television controls, fire alarms, etc. Mark “N/A” if patient does not need to access controls in exam room.

Accessible Exam Table

[Material in this section excerpted from the 2008 Massachusetts Facility Assessment Tool (MFAT), which compiles standards from the Americans with Disabilities Act of 1990 (ADA), the Massachusetts Architectural Access Board codes, and other Massachusetts Department of Public Health requirements.]

134. There is at least one height adjustable exam table (lowers to 17”-19”, measured from the floor to the top of the table).

- Yes
- No
- N/A

135. The table is able to support body weight of 300 pounds or more.

- Yes
- No
- N/A

136. Is there at least one accessible exam table in an accessible exam room?

- Yes
- No
- N/A

Accessible Dressing Room

[Material in this section excerpted from the 2008 Massachusetts Facility Assessment Tool (MFAT), which compiles standards from the Americans with Disabilities Act of 1990 (ADA), the Massachusetts Architectural Access Board codes, and other Massachusetts Department of Public Health requirements.]

137. The accessible dressing room is located on an accessible route.

- [ ] Yes
- [ ] No

138. Dressing room has a T-shaped clear floor space or one that is 60” in diameter for a wheelchair to make a 180° turn.

- [ ] Yes
- [ ] No

If dressing room door swings inward, measure space clear of door swing.

139. Dressing room has a mirror at least 18” wide, 54” high, mounted at least 18” above the floor in a position to afford a view when standing or sitting on the seat/bench.

- [ ] Yes
- [ ] No

140. Room has a coat hook located a maximum of 48” above the floor.

- [ ] Yes
- [ ] No
141. Room has a bench at least 42” wide. □ Yes □ No

142. Bench is 17”-19” high. □ Yes □ No

143. Bench is at least 20-24” deep. □ Yes □ No

Accessible Mammography Machine

[Material in this section excerpted from the 2008 Massachusetts Facility Assessment Tool (MFAT), which compiles standards from the Americans with Disabilities Act of 1990 (ADA), the Massachusetts Architectural Access Board codes, and other Massachusetts Department of Public Health requirements.]

144. The mammography machine is on an accessible route. □ Yes □ No

145. The machine has a positioning chair with a braking device and adjustable arms available for ready access. □ Yes □ No

146. The machine has a breast platform that lowers to a height of 24”-27” above the floor to the top side of the platform. □ Yes □ No (NOTE EXCEPTION TO MFAT: This question varies the height requirement from the original MFAT standard of 24”).

147. The machine has a 60” diameter circle of clear floor space or a T-shaped clear floor space as shown adjacent to the machine. □ Yes □ No

Fig. 3: Wheelchair turning Space
148. Does at least one mammography machine meet ALL of the above standards? □ Yes □ No

</table>

Number of required parking spaces for outpatient units and facilities: **10 percent of the total number** of parking spaces provided serving each such outpatient unit or facility. **Note:** When calculating the number of accessible spaces needed, round the number up to the next whole number if the number comes out unevenly. For example, if a lot has 83 spaces, 10 percent would be 8.3 spaces. It is required that the partial number be rounded up, so the number of spaces needed is 9.
Appendix B: Overall Scoring Sheet
Your Overall Score

To calculate an overall score, please enter “1” for each item that received a YES or N/A mark next to the corresponding question number below.

</tbody>
</table>
How to calculate your overall score

Example:
Count how many items you marked YES or N/A. If you answered YES or N/A to 145 items, your calculation would look like this:

\[
\frac{145 \text{ (items marked YES or N/A)}}{148 \text{ (total survey items)}} \times 100 = 98\% \text{ (percent usable)}
\]

Your clinic would be 98 percent usable for people with disabilities.

Now enter the total number of yes responses, divide by 148, and multiply by 100 for your score.
Appendix C: Mobility Scoring Sheet
Your Mobility Score

To calculate a score for the mobility category, please enter “1” for each item that received a YES or N/A mark next to the corresponding question number below. There are 111 items that count towards the mobility score.

How to calculate your mobility score

Example:
Count how many items you marked YES or N/A. If you answered YES or N/A to 108 items, your calculation would look like this:

\[
\frac{105}{111} \times 100 = 94\%
\]
(items marked YES or N/A) divided by (total survey items) multiplied by 100 equals (percent usable)

Your clinic would be 96 percent usable for people with mobility impairments.

Now enter the total number of yes responses, divide by 111, and multiply by 100 for your score.

\[
\text{[Total number of yes responses]} \div 111 \times 100 = \text{[Your score]}
\]
Your Sensory Score

To calculate a score for the sensory category, please enter “1” for each item that received a YES or N/A mark next to the corresponding question number below. There are 39 items that count towards the sensory score.

<table>

</tbody>
</table>
How to calculate your sensory score

Example:
Count how many items you marked YES or N/A. If you answered YES or N/A to 37 items, your calculation would look like this:

\[
\frac{35}{39} \times 100 = 92\%
\]

(items marked YES or N/A) \hspace{1cm} (total survey items) \hspace{1cm} (percent usable)

Your clinic would be 95 percent usable for people with sensory impairments.

Now enter the total number of yes responses, divide by 39, and multiply by 100 for your score.
Appendix E: Cognitive Scoring Sheet
Your Cognitive Score

*To calculate a score for the cognitive category, please enter “1” for each item that received a YES or N/A mark next to the corresponding question number below. There are 8 items that count towards the cognitive score.*

</tbody>
</table>
How to calculate your cognitive score

Example:
Count how many items you marked YES or N/A. If you answered YES or N/A to 6 items, your calculation would look like this:

\[
\frac{7}{8} \times 100 = 88\%
\]

(items marked YES or N/A) (total survey items) (percent usable)

Your clinic would be 88 percent usable for people with cognitive impairments.

Now enter the total number of yes responses, divide by 8, and multiply by 100 for your score.

\[
\frac{\text{(total number of yes responses)}}{8} \times 100 = \text{score}
\]
