

2 samples, 40-step Mudpit

Ref #: EX00005
Date: Apr 8th 2013
DUE

To:

Biomarker Candidate Project

Approx 40-step mudpit experiments are the largest we offer routinely, and are designed to see as deeply into a sample's proteome as possible. Some samples, such as blood serum, have to go through an additional depletion step before this analysis can be performed, and this adds to the cost. It is possible to see several thousand proteins in a tissue sample using this method.

Item	Description	Unit Cost	Quantity	Cost
SETUP	Project Setup	131.12	1	131.12
MISC	SCX Separation	65.56	6	393.36
ASSAY	Protein Assay	65.56	1	65.56
PREP	Instrument Prep	65.56	5	327.80
INFOMT	Data Analysis	65.56	25	1,639.00
ORBI	2D LC-MS/MS	33.38	187	6,242.06
SUPPL	Supplies	20.00	1	20.00

Sub Total:	8,818.90
Total Amount:	8,818.90
Paid to Date:	0.00
Balance:	\$8,818.90 USD

Payment due within **30** days of the invoice date.
