

Ted R. Lilley Cancer CURE Program

The Ted R. Lilley Cancer Continuing Umbrella of Research Education (CURE) Program is a paid research internship that matches students with a cancer-specific researcher. Interns work full-time for eight weeks in a research laboratory alongside OHSU scientists conducting cancer research.

Interested in science research and want to gain hands-on lab experience?

Program offerings

- Paid internship in a research lab with a Knight Cancer Institute mentor
- Gain real-world research experience
- Make connections with staff and faculty
- Seminars featuring experts from various disciplines

Who should apply

- Current sophomores, juniors and seniors from Oregon high schools, particularly public school students in the Portland Metro area
- Students from historically underrepresented backgrounds in health sciences
- Must be 16 or older by June 24, 2024
- Students must have a 3.0 GPA or higher, have taken at least one science class (preferably biology), have an interest in research

COVID-19 Disclaimer

The CURE program is planning to be in-person for the summer of 2024, but we acknowledge that further spread of COVID-19 may prevent that. If we are not able to be in-person, we will offer a shortened program over the summer consisting of virtual seminars with doctors, scientists, current medical students, and others.

Program Dates

June 24 - Aug. 16, 2024

Application Deadline

December 15, 2023
