An active learning environment is created with rotating tiered seating that allows for small group break-out sessions in a large lecture environment.

Team-based lecture halls

Interior windows allow views into research labs and teaching environments, showcasing the programmatic elements of the building.

Research and teaching on display

A variety of clinical simulation spaces are provided to expose healthcare students to a wide range of practical experiences in a safe, low-risk environment.

Clinical simulation

Teaching "in-the-round" supported by advanced audiovisual systems leverages technology and group interactions in teaching.

Learning studio

Spontaneous collaboration

Collaborative learning environments

Communal spaces within the building are designed to foster spontaneous and informal collaboration between students, faculty, and researchers.
