

The State of Our Health 2015:

Key Health Indicators for Oregonians

The State of Our Health 2015

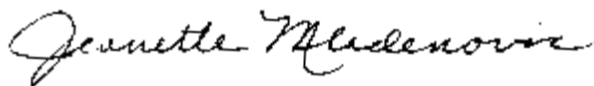

We are pleased to share with you “The State of Our Health 2015: Key Health Indicators for Oregonians.” This monograph updates the initial publication, “The State of Our Health 2013.” Like its predecessor, this monograph offers a compilation of statistics, available through State of Oregon and national agencies, to give us a broad overview of health in Oregon. The monograph provides indicators and influences that contribute to the determinants of health in our state overall and county by county, and includes a poster that illustrates differences across counties. The monograph also provides a framework to consider interventions that have high impact on health and how best to leverage our resources.

Changes over the two-year period since the initial monograph are notable. In some cases, data collection and reporting methodology have been revised, or data have not been updated, making exact comparison over time difficult. Public health practice has evolved, including changes in the numbers of required immunizations. In future editions, we will continue to fine-tune data sources and foci. Despite these considerations, the monograph illuminates the variability in health outcomes across the diverse communities of our state and suggests emerging trends that help inform public health policy and practice.

Oregon has long been a recognized leader in public health and healthcare innovation. We believe that the types of information included here can lead us to identify effective and sustainable solutions to critical problems in public health such as childhood immunization (Oregon ranks 39th nationally) and access to affordable care: 14 percent of Oregonians report that they could not see a healthcare provider due to the cost. Similarly, these data provide evidence of improvement: The number of smokers and reported new cases of HIV has fallen over the past two years, and Oregon leads the nation for the number of clean-air days.

As we (OHSU and PSU) work to establish the proposed school of public health, this monograph supports our mission: to innovatively prepare a public health workforce that better understands the social determinants of health over the lifespan and that is competent to address these by intervening in our communities to improve health. The monograph serves as a benchmark for our faculty and students to advance our knowledge of what types of interventions are effective in promoting health and eradicating disparities. The monograph also serves as a resource for legislators, local leaders, and community health providers as we work collectively to improve population health in Oregon and beyond.

This monograph is truly reflective of the work of many dedicated professionals. We are especially grateful to an anonymous donor, whose continued support allowed us to commission and publish both the initial monograph and this second edition of “The State of Our Health: Key Health Indicators for Oregonians” as a resource for advancing the well-being of Oregonians. Thank you!

The State of Our Health, 2015: Key Health Indicators for Oregonians

In 2015 Oregon continues to serve as a national leader in many initiatives affecting the public's health. These include innovative community design and transportation infrastructure, healthful workplace policies such as the Indoor Clean Air Act, and comprehensive preventive interventions such as Oregon's Women, Infants, and Children (WIC) program. Acclaimed statewide initiatives also include success in health care access following the state's early initiatives under the Affordable Care Act such as Coordinated Care Organizations, and the nationally recognized Newborn Screening Program that serves not only Oregon but also five other states and two territories.

Despite the state's many achievements, there are also continuing challenges. Oregon has definable populations who continue to face significant obstacles to health, including lack of sufficient health-promoting resources and infrastructure to provide the best possible chance for healthy lives. In addition, some communities bear the disproportionate burdens of decisions that have—or have not—been made at a state-wide level, thus fundamentally limiting their potential for good health. For example, some communities do not have regular, reliable access to nutritious and affordable food. Others have environmental hazards that place their population at risk for developing serious health problems over their lifetimes. And, many of the state and county health departments struggle every day, often with decreasing resources, to meet the increasing needs of Oregon's residents.

Oregon continues to broaden the way it thinks about health. Today, we recognize that the pursuit of health is inseparable from the way populations, communities, and the state are organized. The importance of housing, food systems, physical infrastructure, transportation, and what is perhaps the least commonly recognized health indicator of all, the PK-20 public education system, are other factors. These myriad factors are collectively considered the social determinants of health, and these are the focus of the first 2013, and this updated 2015 report.

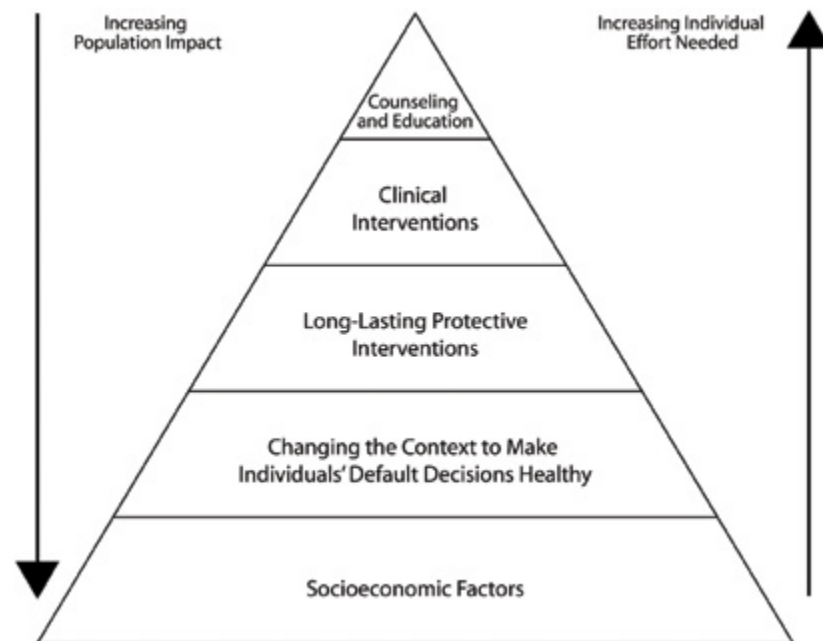

The state is now poised to continue the trajectory of collective action and innovation that has marked Oregon's history. The pathways already laid through innovative policy and community design—coupled with the ability to understand that the prevention of health problems is a function of systems, rather than a series of individual steps—reflects what the Centers for Disease Control and Prevention (CDC) has identified as the primary route to the greatest positive impact: addressing the network of underlying, multilayered, and “root causes” of health and disease.

Introduction

Making the Greatest Impact: The Health Impact Pyramid

An important touchstone in the field of public health is the parable of the stream. The stream represents the myriad causes of preventable disease, avoidable injury, and premature death faced by communities. One day, it became apparent that people were caught in the current, drowning, and rapidly being swept downstream. The first inclination of everyone on the shoreline was to run downstream as quickly as possible, to catch and pull them out, one-by-one. As the number of drowning people steadily increased and the task of trying to pull them out became overwhelming, those on the shore realized that to best save people, they also needed to run upstream to discover and control whatever was causing them to fall into the water. They realized that, while they couldn't abandon their downstream efforts, they needed an approach that made going upstream the priority. This is the mission and challenge of public health: to progressively move upstream while not abandoning efforts downstream.

The Centers for Disease Control and Prevention has illustrated the specific markers along this stream in the Health Impact Pyramid. Each of the pyramid's tiers represents the relative level at which the contributors to health and disease affect population health. Interventions at the upper tiers of the pyramid — including clinical interventions, counseling, and education — are most downstream and have the least population effect. Supportive interventions at the foundational tiers of the pyramid — including socioeconomic and contextual factors — are most upstream and have the greatest population-level impact on health.

Frieden, TR (2010). A framework for public health action: The Health Impact Pyramid. *American Journal of Public Health*, 22(4):590-595

At the most fundamental level, Socioeconomic Factors (Tier 1) are societal-level contributors to health, including increasing educational opportunity, reducing economic inequities, and improving standards of living such as quality of housing and sanitation. These factors, when insufficient, place not only individuals, but entire communities at greater risk for adverse health outcomes. Contextual Factors (Tier 2) are those established elements in the social, natural, and built environments that make it easier — or more difficult — for communities to effectively support their own health. From a health-promoting perspective, these contextual factors include public policies that ensure people have the resources and environmental supports necessary to build and sustain healthy lives. Long-Lasting Protective Interventions (Tier 3) are generally one-time or limited duration activities, most often clinical, that confer enduring protection to individuals. These include immunizations, pre-pregnancy folic acid supplementation, and health screenings that detect risk for future problems. Clinical Interventions (Tier 4) are longer-term clinical care activities, such as medical or pharmacologic treatment for and management of disease. Finally, Counseling and Education (Tier 5) involves one-on-one or population-level health education and supportive counseling, in efforts to help individuals change behaviors.

The pyramid illustrates that health is a product of systems that ideally work in concert to provide the best possible outcomes. Disparities in health outcomes, then, are a reflection of gaps or breakdowns in these systems. What data reports often do not reveal — but the pyramid shows — is the broad range of factors that come together to support or threaten communities' health. Through this comprehensive view, Oregon can effectively prioritize strategies, both in short- and long-term planning, to promote communities' health. Moreover, a balanced approach can be developed that is rooted in strategic understanding of how a multitude of factors converge to affect the public's health.

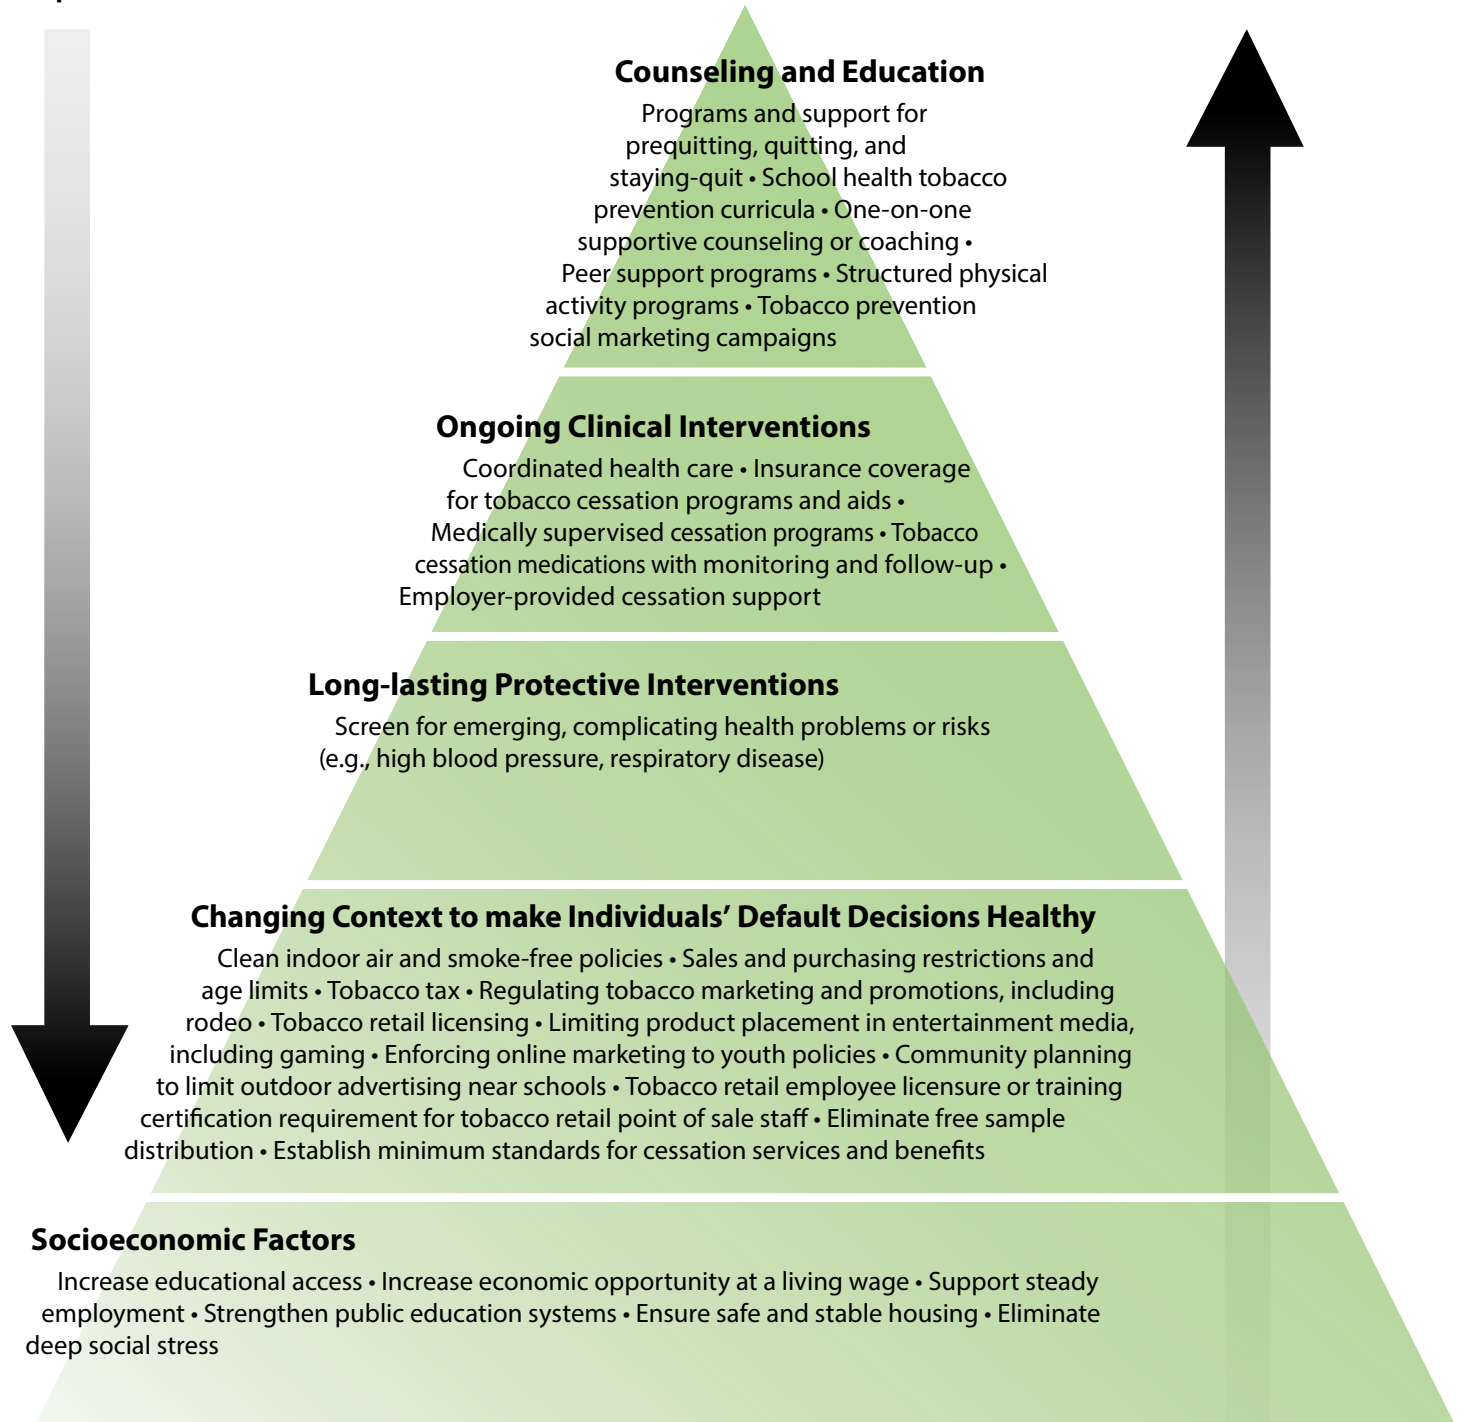

To demonstrate how the tiers of the Health Impact Pyramid interact, four health outcomes important to public health in Oregon are presented: obesity/overweight, tobacco, alcohol, and breastfeeding. The contributing and limiting factors included in these pyramids are not exhaustive lists, but rather are reflective of a range of indicators understood to affect health outcomes in these areas. These pyramids illustrate where Oregon already has taken critical steps in advancing health, as well as opportunities for continued action. These images demonstrate that factors often thought of as outside the traditional health domain — including education, employment, and economic opportunity — are very much public health concerns.

Effective use of the pyramid involves achieving balance. Although strategies to prevent health risks and disease at the Tier 5 level of the pyramid are often the first to receive attention, interventions at Tiers 1 and 2 are most likely to have the broadest positive effect on population health. This does not suggest that Tier 5 is unimportant, but rather that it is in the foundational tiers that most public health problems are rooted. Oregon will continue in a national leadership role in innovative health promotion and protection by focusing on contributing factors at all levels of the pyramid, and by recognizing that problems arising from domains outside the common notions of health are, without question, fundamental to the public's health.

This monograph, an update of the original, “The State of Our Health 2013,” is intended to support efforts at state and local levels to ensure that all Oregonians have equal opportunities to enjoy good health across their lifespans. It is a “snapshot” view of a range of health indicators in the state, which taken in sum, help identify strengths, gaps, and opportunities for Oregonians’ health. Because health is determined at a multitude of levels — including social, economic, structural, biological, behavioral, and policy — not only are commonly reported health indicators included, but also those that clearly are associated with risk for premature death and preventable illness or injury, and which may be generally considered outside the health arena. The purpose of this resource is to broaden the view of how health is assessed, to draw on data and resources spanning a wide variety of social institutions, agencies, and disciplines, in order to show in concrete ways how Oregonians’ health is affected by the collective choices that are made as a state.

This report includes 95 health indicators, 81 of which are reported at both state and county levels, and an additional 14 that are presented only at the state level. Indicators are all publicly available data culled from a variety of standard reports, as well as a small number calculated from raw data. We first present together in the accompanying poster all county and state data for purposes of cross-comparison. Next, state data are presented independently and alongside national rankings (where available), followed by data organized by individual county. The report provides the most recent comparison year(s) available, except when data collection or reporting methods differed and rendered numbers incomparable. The comparison years are intended to provide context only, and differences between years should not be interpreted as statistically significant. Indicator definitions, data sources, and methodology information is presented in the metadata section of the report; additional detail is available from the report’s authors.

With few exceptions described in the metadata, the report authors deferred to the data reporting conventions of the agencies responsible for collection of these indicators. This means there are some differences in what data are reported and which are considered reportable. For example, in some cases agencies reported as “insufficient data” phenomena for which the counts were < 5, while other agencies did report such findings. In these instances, we adhered to the judgments of the reporting agencies in presenting the data. Additionally, asterisks are used to indicate small sample size, in accordance with the source agencies.

The generosity of time and expertise provided by professionals across the more than 30 allied agencies and organizations from which information was collected, including over 45 distinct programs, are reflected in the monograph’s Acknowledgments. This scope of responsible agencies, spanning a range of highly refined skill sets and professional disciplines, reflects the tremendous collaborative effort that is protecting the health — and thus the prosperity — of the state. The “navigation system” in Oregon’s collective journey to become the nation’s healthiest state is dependent upon the best possible data in the most rapidly accessible formats. The complexity in bringing information together across the many data systems points to the need for more unified and integrated data systems, so that that these many professionals can continue to bring to bear the best of what is known in the protection of Oregonians’ health.

Accreditation Grant Funding

Oregonians rely upon their public health agencies to anticipate, respond to, and protect us from threats to communities' health. Our state and county health departments continue their hard work to build and maintain an effective, efficient, and high quality public health infrastructure by pursuing national accreditation. As part of the national effort toward accrediting state and county health departments, Oregon's health departments are identifying current strengths and opportunities for continuous improvement. Many of our health departments are doing so with great success and so far Oregon has four nationally accredited local health departments, with more likely to be accredited in the next coming years.

The majority of Oregon's local public health funding streams are dedicated to specific, categorical programs, which – while supporting programs of import to the state – lack the flexibility to allow counties to apply such funds to accreditation readiness or other infrastructure-strengthening work. As a result, health departments often seek federal and foundation grants to support accreditation and quality improvement initiatives. This map illustrates the local health departments that received grant funding to support their accreditation efforts as of November 2014. In total, 25 local health departments had received one or more grants, ranging in award amounts from \$5,000 to \$50,000. This is good news, and yet many counties are still without sufficient financial support to ensure completion of accreditation processes, or in some cases to pay the accreditation fee. These quality improvement efforts are important for assuring the strength of the public health system.

Sources of funding noted on the map are the National Association of City and County Health Officials (NACCHO); the Performance Management Program of the Oregon Health Authority (PMP), paid for by the National Public Health Improvement Initiative (NPHII); and Northwest Health Foundation (NWHF).

Graphic information in the Accreditation Grant Funding map and Categorical Funds pie chart provided by the Coalition of Local Health Officials (CLHO). Accreditation grant funding information collected by CLHO as of November 2014 through informal surveys. There may be additional information not included on the map.

County and State Public Health Funding

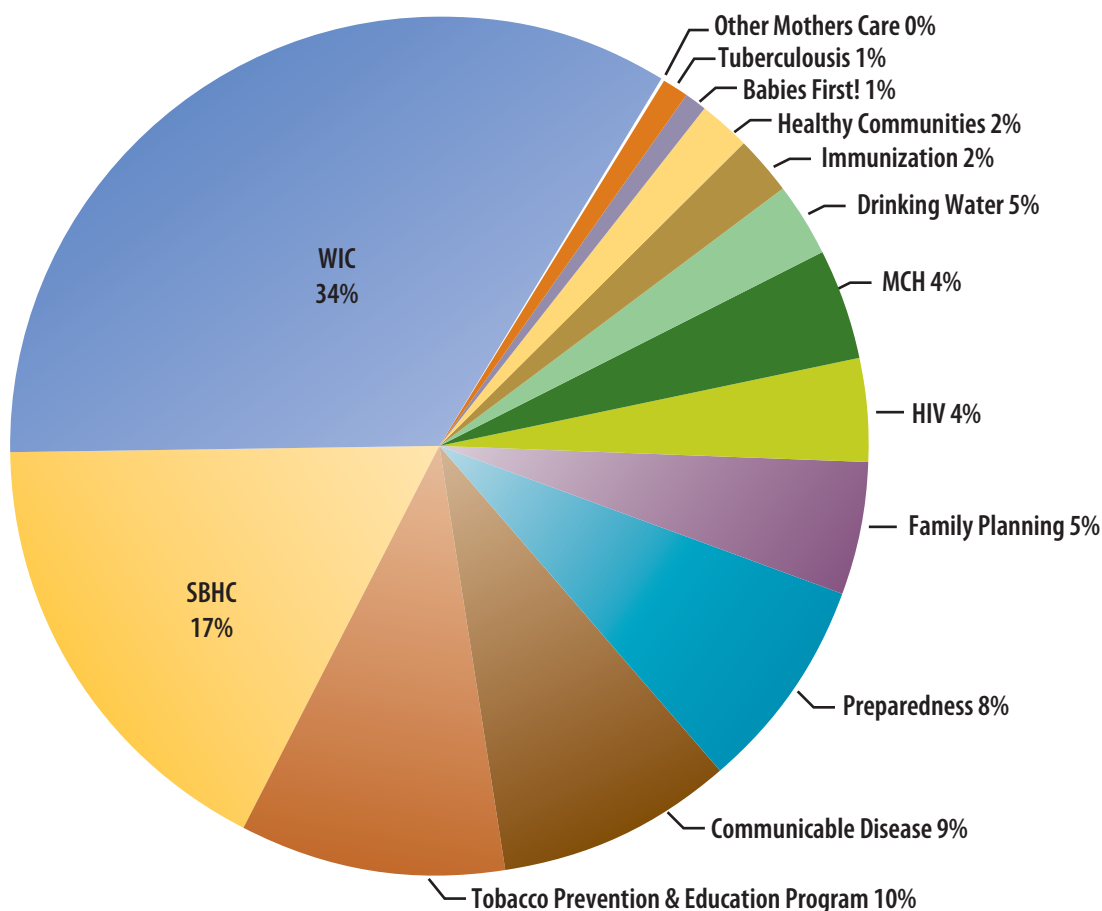

Current System of Local Public Health in Oregon

The current public health funding system requires that each health department must deliver or assure ten mandated programs, which largely receive inadequate federal funding. As available, additional county general funds and competitive grant monies may be allocated to meet the requirements set by the state or determined by community need.

The system consists of 34 Local Public Health Departments in Oregon—27 county-based public health departments, one district health department and four non-profit public health agencies that have a strong link with the county.

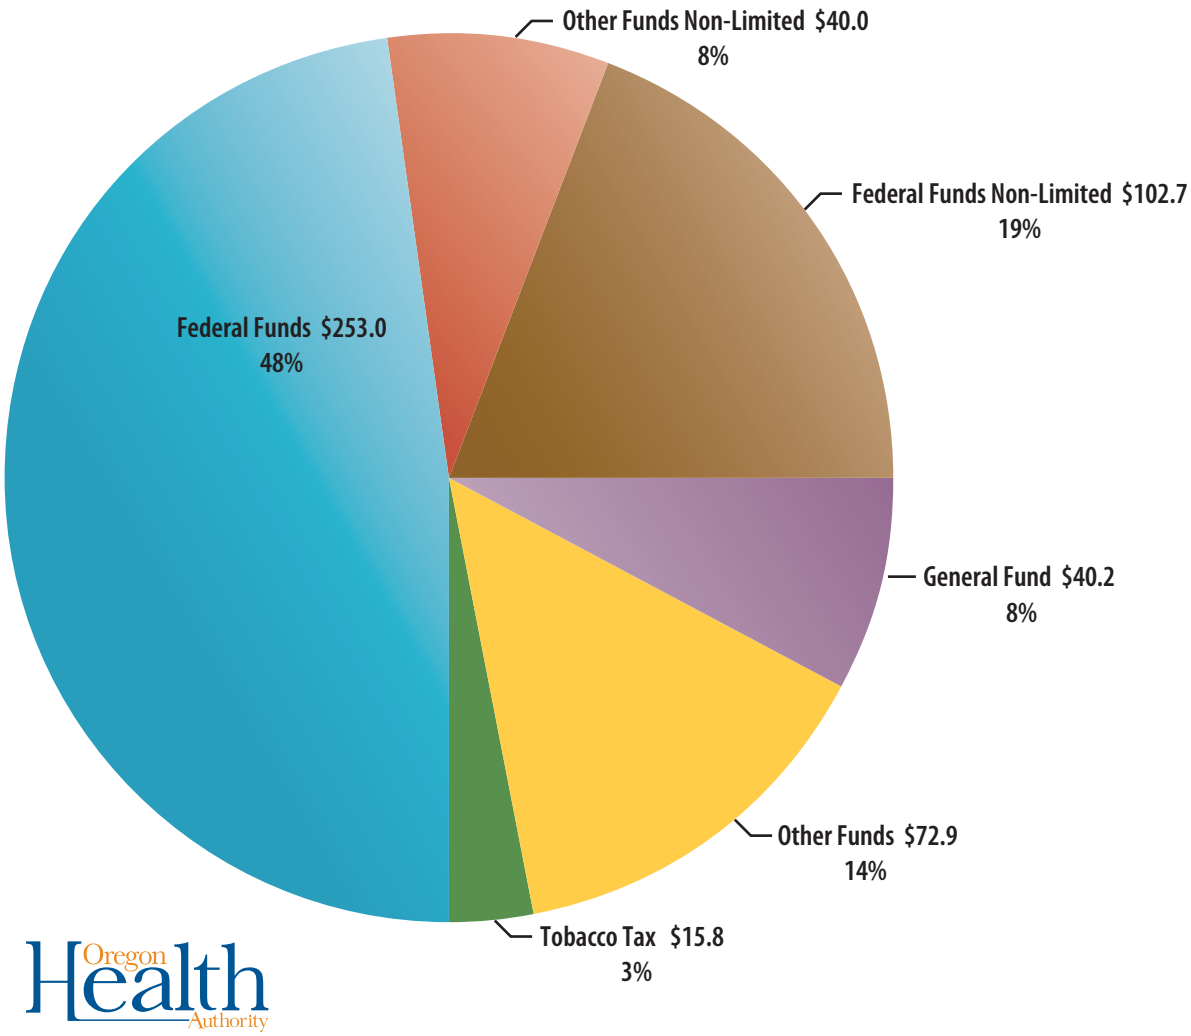

Investments are largely focused on individual care instead of community prevention and capacity. As the figure below shows, Women, Infants, and Children (WIC), Family Planning, and School-Based Health Centers (SBHC), represent 56% of funding to local communities.

Home Ownership %	2009-2013	62.0	44
	2000	64.3	N/A
High Housing Costs %	2009-2013	40	42
	2007-2011	39	40
Homelessness count	2011	22,116	49, tied
	2010	19,208	N/A
High School Graduates %	2009-2013	88.6	18, tied
College Degree %	2009-2013	30.1	19

State rankings are ordered such that those approaching 50 represent the greatest risk to public health, while those closer to 1 represent the greatest benefit to health. Rankings provided are for illustrative purposes only. Readers should be cautioned that sources of data and methodology for state rankings may differ from state and county statistics as noted in the metadata. These are noted with a ♦. It is advised in using these data to select either the data point or the ranking to present.

Data are from secondary sources; for information about calculations and original sources, please see the metadata.

Firearm Deaths count	2013	8	461
	2012	15	442
Car Crashes count	2013	1,066	49,510
	2012	1,072	49,798
Car Crash Deaths count	2013	8	313
	2012	9	336
Work-Related Deaths count	2012	2	47
	2011	1	59
Pertussis count	2013	4	485
	2012	27	911
Influenza count	2013	1	84
	2012	1	67
Salmonella count	2013	19	375
	2012	9	404
Chlamydia count	2013	346	14,265
	2012	268	13,501
Smokeless Tobacco Use Among 11th Grade Males %	2013	6.4	9.6
Methamphetamine-Related Deaths count	2013	2	123
	2012	0	93
Children with Developmental Disabilities count	2013	164	5,625
	2012	163	5,191

Indicator Notes

State rankings are ordered such that those approaching 50 represent the greatest risk to public health, while those closer to 1 represent the greatest benefit to health. Rankings provided are for illustrative purposes only. Readers should be cautioned that sources of data and methodology for state rankings may differ from state and county statistics as noted in the metadata. These are noted with a ❖. It is advised in using these data to select either the data point or the ranking to present.

Asterisks (*) on county and state data pages indicate that the calculation or count was based on extremely low numbers and should be interpreted with caution. This report defers to the data sources' discretion in reporting.

"Minority" indicates all individuals who identify their race and ethnicity as anything other than Non-Hispanic White.

••• Statistic was unavailable or suppressed.

Initials immediately following statistics indicate that the statistic represents a shared calculation, or shared services across multiple counties. County abbreviations are as follows: Baker (Ba); Benton (Be); Clackamas (C); Clatsop (Cl); Columbia (Col); Coos (Co); Crook (Cr); Curry (Cu); Gilliam (G); Grant (Gr); Harney (H); Hood River (HR); Jefferson (J); Josephine (Jo); Klamath (K); Lake (L); Lincoln (Li); Malheur (Mal); Marion (Ma); Morrow (Mo); Multnomah (M); Polk (P); Sherman (S); Tillamook (T); Umatilla (U); Union (Un); Wallowa (Wa); Wasco (W); Wheeler (Wh); Yamhill (Y).

‡ State total includes cases and/or services from unspecified counties and from tribal regions not otherwise listed.

Data for comparison years are presented to provide context; differences between years should not be interpreted as statistically significant.

Use of the Health Impact Pyramid is by permission of Thomas Frieden, MD, MPH, Director of the Centers for Disease Control and Prevention (CDC).

Metadata

2-Year-Olds Who Watch More Than 2 Hours of TV Daily: Percentage based on parent response to question, "In a typical day, how much time does your two-year-old spend watching TV or videos?"

Data Source: Oregon Health Authority (OHA), Oregon Pregnancy Risk Assessment Monitoring System (PRAMS), PRAMS 2 Survey, Table 38, <https://public.health.oregon.gov/HealthyPeopleFamilies/DataReports/prams/Pages/index.aspx>

Geographic Extent: State only **Date of latest data download:** 02/26/2015

3rd Graders With Cavities: Percentage based on a probability-proportional-to-size (PPS) selection of schools from Oregon's public school system. Schools were selected from a list generated from Oregon Department of Education data. Implicit stratification on health region and percent of children in the school eligible for the state free/reduced lunch program was used for the school selections.

Data Source: Centers for Disease Control and Prevention (CDC), National Oral Health Surveillance System, State Oral Health Surveys, 2001-2002 data, <http://www.cdc.gov/nohss/sealants/states/or.htm>, 2006-2007 data, <http://apps.nccd.cdc.gov/nohss/IndicatorV.asp?Indicator=2>

Geographic extent: State only **Date of latest data download:** 03/03/2015

8th Graders Who Watch More Than 2 Hours of TV Daily: Percentage of 8th graders who report watching more than 2 hours of TV on an average school day.

Data Source: Oregon Health Authority (OHA), Oregon Healthy Teens (OHT), OHT Survey Results, 2013 data- Table 57, 2011 data- Table 46, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/OregonHealthyTeens/results/Pages/ohtdata.aspx>

Geographic extent: State only **Date of latest data download:** 03/03/2015

8th Graders Who Have Experienced Bullying: Percentage of 8th graders who report that they have been harassed at school (or on the way to or from school) within the past 30 days.

Data Source: Oregon Health Authority (OHA), Oregon Healthy Teens (OHT), OHT Survey Results, 2013 data- Table 77, 2011 data- Table 70x, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/OregonHealthyTeens/results/Pages/ohtdata.aspx>

Geographic extent: State only **Date of latest data download:** 03/03/2015

11th Graders Who Have Recently Used Methamphetamine: Percentage of 11th graders who report that they have used methamphetamines (also called speed, crystal, crank, or ice) within the past 30 days.

Data Source: Oregon Health Authority (OHA), Oregon Healthy Teens (OHT), OHT Survey Results, 2013 data- Table 137, 2011 data- Table 137, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/OregonHealthyTeens/results/Pages/ohtdata.aspx>

Geographic extent: State only **Date of latest data download:** 03/03/2015

Access to Exercise Opportunities: Percentage of population with adequate access to locations for physical activity.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Acute Pesticide-Related Illness Count: Number of reported cases of acute pesticide-related illness, by Oregon county in 2009-2011 (n=171) that OHA-PEST determined to be the result of acute pesticide exposure.

Data Source: Oregon Health Authority, Public Health, Healthy Environments, Healthy Homes and Neighborhoods, Pesticide Exposure, Burden of Acute Pesticide Poisoning in Oregon, Table 2, <http://public.health.oregon.gov/HealthyEnvironments/HealthyNeighborhoods/HealthyHomes/Pesticides/Pages/index.aspx>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Notes: Use caution when comparing data from first manual as the 2002-2007 study period was three times as long as 2009-2011, so comparison between the two can only be done by percentages.

Adults on OHP: Percentage of adults who are enrolled in the Oregon Health Plan (age-adjusted) in the reporting year.

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 02/15/2015

Adults With Any Health Insurance: County data: Percentage of adults reporting that they have any kind of health insurance (age-adjusted). State ranking data: Percentage of adults aged 18-64 reporting that they have any kind of health care coverage (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=HC&yr=2013&qkey=8031&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Air Pollution days: The average daily measure of fine particulate matter in micrograms per cubic meter (PM2.5).

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/06/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Alcohol Outlets count: Indicates the number of liquor licenses (current on 02/19/2015) that allow any avenue of direct sale to the consumer, including service at drinking places. This does not include catering, service within the transportation industry, catering, or solely wholesale licenses.

Data Source: State of Oregon, OLCC Liquor Licensing, Current Licenses, All Businesses (excel), Sort by premises county, <http://www.oregon.gov/olcc/LIC/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 02/19/2015

BACK TO TABLE OF CONTENTS

Angina: County data: Percentage based on prevalence of angina in Oregon adults (age-adjusted). **State ranking data:** Percentage based on adults self-reporting whether a doctor, nurse, or other health professional ever told them that they had angina or coronary heart disease (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=CV&yr=2010&qkey=5011&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Arthritis: County Data: Percentage based on prevalence of arthritis in Oregon adults (age-adjusted). **State ranking data:** Percentage based on adults self-reporting whether they are limited in any way of their usual activities due to arthritis (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=AR&yr=2013&qkey=8701&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and country ranking data vary by methodology and should be viewed with caution.

Asthma: County data: Percentage based on prevalence of asthma in Oregon adults (age-adjusted). **State ranking data:** Percentage based on adults self-reporting whether they have ever been told they have asthma (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=AS&yr=2010&qkey=4417&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Binge Drinking females: Percentage of female adults reporting consuming 4 or more drinks of alcohol on one occasion in the past 30 days (age-adjusted).

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 03/01/2015

Binge Drinking males: Percentage of male adults reporting consuming 5 or more drinks of alcohol on one occasion (age-adjusted).

Data Source: Oregon Health Authority, Public Health Division, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 03/01/2015

Breastfeeding at 8 Weeks: Percentage of mothers reporting breastfeeding 8 weeks after delivery.

Data Source: Centers for Disease Control and Prevention (CDC), Pregnancy Risk Assessment Monitoring System (PRAMS): CPONDER, <http://apps.nccd.cdc.gov/cPONDER/default.aspx?page=display&state=24&year=13&category=3&variable=44>

Geographic extent: State only **Date of latest data download:** 03/03/2015

Breastfeeding for First 6 Months: Percentage of mothers reporting exclusive breastfeeding at 6 months.

Data Source: Centers for Disease Control and Prevention (CDC), Breastfeeding, Data and Statistics, Breastfeeding Report Card, <http://www.cdc.gov/breastfeeding/data/reportcard.htm>

Geographic extent: State only **Date of latest data download:** 03/25/2015

Cancer new cases per 100,000: Annual cancer (all sites) age-adjusted (to the 2000 US standard population) incidence rate per 100,000.

Data Source: County data: State Cancer Profiles, Quick Profiles: Oregon, <http://statecancerprofiles.cancer.gov/quick-profiles/index.php?statename=oregon> , State Ranking data: State Cancer Profiles, Incidence Rates Table, <http://statecancerprofiles.cancer.gov/incidencerates/index.php?stateFIPS=00&cancer=001&race=00&sex=0&age=001&type=incd&sortVariableName=rate&sortOrder=default#results>

Geographic extent: State and County **Date of latest data download:** 03/08/2015

Car Crash Deaths count: Indicates number of car crash deaths.

Data Source: Oregon Department of Transportation (ODOT), Crash Analysis and Reporting, Crash Analysis and Reporting- All Crashes, Oregon Motor Vehicle Traffic Crashes by County, http://www.oregon.gov/ODOT/TD/TDATA/pages/car/car_publications.aspx/

Geographic extent: County only **Date of latest data download:** 03/02/2015

Note: Numbers for Curry and Gilliam counties were not included in the state count.

Car Crashes Count: Number of car crashes reported in a given year.

Data Source: Oregon Department of Transportation (ODOT), Crash Analysis and Reporting, Crash Analysis and Reporting- All Crashes, Oregon Motor Vehicle Traffic Crashes by County, http://www.oregon.gov/ODOT/TD/TDATA/pages/car/car_publications.aspx/

Geographic extent: County only **Date of latest data download:** 03/02/2015

Children Eligible for Free and Reduced Lunch: County data: Percentage based on students eligible for free and reduced lunch. State ranking data: Percentage based on students eligible for free lunch.

Data Source: County data: Oregon Department of Education (ODE), Reports, Students, Students Eligible for Free or Reduced Lunch #61, <http://www.ode.state.or.us/sfda/reports/r0061Select.asp>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/05/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Children in Poverty: Estimated percent of people age 0-17 living in poverty.

Data Source: United States Census, Small Area Income and Poverty Estimates, State and County Data Files, <http://www.census.gov/did/www/saie/data/statecounty/data/index.html>

Geographic extent: State and County **Date of latest data download:** 03/26/2015

Children with Developmental Disabilities count: Number of children with developmental disabilities actively enrolled in case management.

Data Source: Oregon Department of Human Services, Developmental Disability Services, Data, Reports and Publications, <http://www.oregon.gov/dhs/DD/Pages/data-reports.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Note: Numbers for Hood River and Sherman counties were not included in the state count.

Chlamydia count: Number of reported cases of chlamydiosis to the Oregon Health Authority.

Data Source: Oregon Health Authority, Public Health, Diseases and Conditions, Communicable Disease, Communicable Disease Surveillance Data, Annual CD Surveillance Reports, Selected Cases, notifiable diseases by county, <http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/AnnualReports/Pages/arpt.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Chronic Absenteeism: Percentage of students who are absent 10% or more of all school days. Data are averaged across school districts in a given county.

Data Source: Oregon Department of Education, Report Card, Media Page, RC Districts Aggregated, <http://www.ode.state.or.us/data/reportcard/Media.aspx>

Geographic extent: County only **Date of latest data download:** 03/10/2015

Chronic Disease Prevention Funding total dollars: Legislatively approved budget for the 2013-15 biennium for health promotion and chronic disease prevention.

Data Source: Oregon Health Authority, Center for Prevention and Health Promotion, <http://public.health.oregon.gov/PHD/Directory/Pages/Program.aspx?pid=5>

Geographic extent: State only **Date of latest data download:** 03/12/2015

Note: Budget information was not available on website, data was obtained by contacting the CFO, Policy and Budget Analyst.

Cigarette Packs Sold per capita: Number of cigarette packs sold per capita.

Data Source: County data: Oregon Health Authority, Public Health, Provider and Partner Resources, Public Health Accreditation and Quality Improvement, Oregon State Health Profile, Health Behaviors, Tobacco, <http://public.health.oregon.gov/providerpartnerresources/publichealthaccreditation/pages/healthstatusindicators.aspx>, State Ranking Data: Centers for Disease Control and Prevention (CDC), Smoking and Tobacco Use, State Tobacco Activities Tracking and Evaluation (STATE) System: <http://apps.nccd.cdc.gov/statesystem/DetailedReport/DetailedReports.aspx#ReportDetail>

Geographic extent: State and County **Date of latest data download:** 03/11/2015

Note: State and county ranking data vary by source and should be viewed with caution.

College Degree: Percentage of the population aged 25 years and older with a bachelor's degree or higher.

Data Source: US Census Bureau, American Community Survey, Educational Attainment, Table S1501, <http://factfinder2.census.gov/>

Geographic extent: State and County **Date of latest data download:** 02/10/2015

Could Not See Doctor Due to Cost: Percentage of population who reported that they could not see a doctor due to cost.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Critical Access Hospital (CAH) Beds count: Number of critical access hospital staffed beds by county.

Data Source: Oregon Association of Hospitals & Health Systems, Appraise Insights, Oregon Community Hospital Report, <http://appraisehealthinsights.com/public-reports/oregon-community-hospital-report/>

Geographic extent: County only **Date of latest data download:** 03/12/2015

Note: CAH bed count not available by county in the hospital report, data was obtained by contacting the Director of Information Systems.

Current Smokers: County data: Percentage of adults who report using tobacco (age-adjusted). State ranking data: Percent of adults who report that they are current smokers (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/0811.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=TU&yr=2013&qkey=8161&state=All>

Geographic extent: State and county **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Dentist ratio to population: Indicates ratio of dentists to total population.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: County and state **Date of latest data download:** 03/25/2015

Diabetes: Percentage of adults reporting that they have been told that they have diabetes (age-adjusted). State ranking data: Percentage of adults reporting that they have been told by a doctor that they have diabetes (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/0811.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=DB&yr=2010&qkey=1363&state=All>

Geographic extent: State and county **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Eat Recommended Amount of Fruits & Vegetables: Percentage of adults who report consuming at least 5 servings of fruits and vegetables per day (age-adjusted). State ranking data: percentage of adults who report consuming more than 1 serving of fruits and vegetables per day (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/index/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention

(CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=FV&yr=2013&qkey=8681&state=All> and <http://apps.nccd.cdc.gov/brfss/list.asp?cat=FV&yr=2013&qkey=8691&state=All>

Geographic extent: State and county **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Fast Food: % living within ½ mile: Indicates percentage of households living within a ½ mile walk distance to fast food restaurants.

Data Source: Oregon Health Authority, Oregon Environmental Public Health Tracking, Environmental Justice, Community Design, Alcohol, Food and Tobacco, County, <http://epht.oregon.gov/Index.aspx>

Geographic extent: County only **Date of latest data download:** 02/25/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Firearm Deaths count: County data: Indicates number of deaths due to firearms by county of residence. State ranking data: Indicates number of deaths due to injury by firearms per 100,000 population.

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual Reports, Chapter 6, Table 33, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/Pages/vol2.aspx>, State ranking data: Kaiser Family Foundation, State health facts, Health status, Deaths due to firearms, Number of deaths due to injury by firearms per 100,000 population, <http://kff.org/other/state-indicator/firearms-death-rate-per-100000/>

Geographic extent: State and county **Date of latest data download:** 02/26/2015

Note: State and county ranking data vary by methodology and source and should be viewed with caution. Numbers for Gilliam, Morrow, Sherman, and Wheeler counties were not included in the state count.

Firearm Dealer Licenses count: Indicates the total number of Type 01 (dealer in firearms and other destructive devices, including gunsmiths) and Type 02 (pawnbroker in firearms other than destructive devices) federal firearm licenses.

Data Source: United States Department of Justice, Bureau of Alcohol, Tobacco, Firearms and Explosives, Firearms, Firearms Industry, Listing FFLs, <http://www.atf.gov/content/firearms/firearms-industry/listing-FFLs>

Geographic extent: State and county **Date of latest data download:** 03/12/2015

Fluoridated Water: County data: Percentage of population using public water systems that receive receiving fluoridated water. State ranking data: Percentage of population using community water systems receiving fluoridated water.

Data Source: <http://apps.nccd.cdc.gov/gisdoh/waterfluor.aspx>

Geographic extent: State and county **Date of latest data download:** 02/11/2015

Note: State and county ranking data vary by methodology and source and should be viewed with caution. County level data are only available for 2006 and only state level data and state ranking data are available for 2012.

Foreclosure Filings ratio to total homes owned: Number of active foreclosure homes as a ratio to total homes owned.

Data Source: RealtyTrac, <http://www.realtytrac.com/trendcenter/or-trend.html>

Geographic extent: State and county **Date of latest data download:** 03/12/2015

Good General Health: County data: Percentage of adults self-reporting that their health in general was “excellent”, “very good”, or “good” when asked on a five-point scale (age-adjusted). State ranking data: Percentage of adults self-reporting that their health in general was “excellent”, “very good”, or “good” when asked on a five-point scale (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=HS&yr=2013&qkey=8001&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Good Mental Health: Percentage of adults self-reporting good mental health in the past 30 days (age-adjusted).

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 03/21/2015

Good Physical Health: Percentage of adults self-reporting good physical health in the past 30 days (age-adjusted).

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 03/21/2015

Heart Attack: County data: Percentage based on prevalence of heart attacks in Oregon adults (age-adjusted). State ranking data: Percentage based on adults self-reporting if they have ever been told they had a heart attack (myocardial infarction) (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=CH&yr=2013&qkey=8091&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

High Blood Cholesterol: County data: Percentage based on prevalence of high blood cholesterol in Oregon adults (age-adjusted). State ranking data: Percentage based on adults who have had their blood cholesterol checked and have been told it was high (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=CA&yr=2013&qkey=8081&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

High Blood Pressure: County data: Percentage based on prevalence of high blood pressure in Oregon adults (age-adjusted). State ranking data: Percentage based on adults who have been told they have high blood pressure (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=HA&yr=2013&qkey=8051&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

High Housing Costs: Percentage of households where 30% or more of income is spent on housing costs.

Data Source: Calculated from US Census Bureau, American Community Survey, 5 year estimates, Selected Housing Characteristics, Table DPO4, <http://factfinder2.census.gov/>

Geographic extent: State and county **Date of latest data download:** 03/12/2015

Note: Data from first and second manuals should be compared with caution as variable parameters may have changed.

High School Graduates: Percentage of population aged 25 years and older who graduated from high school (includes equivalency).

Data Source: US Census Bureau, American Community Survey, 5-year estimate, Educational Attainment, Table S1501. <http://factfinder2.census.gov/>

Geographic extent: State and County **Date of latest data download:** 02/10/2015

HIV new cases: County data: Indicates number of HIV infection cases by year and county of residence at diagnosis.

State ranking data: Indicates estimated numbers of adult and adolescent HIV diagnoses.

Data Source: County data: Oregon Health Authority, Public Health, Disease and Conditions, Communicable Disease, Communicable Disease Surveillance Data, HIV Data, HIV/AIDS Reports and Data, Oregon Cases of HIV infection by county of residence and year of diagnosis, <http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/HIVData/Pages/epiprofile.aspx>. State ranking data: Kaiser Family Foundation, State Health Facts, HIV/AIDS/HIV Diagnoses, Estimated numbers of HIV diagnoses, adults and

adolescents, <http://kff.org/hiv/aids/state-indicator/estimated-numbers-of-hiv-diagnoses-adults-and-adolescents/>

Geographic extent: State and County **Date of latest data download:** 03/09/2015

Note: State and county ranking data vary by methodology and should be viewed with caution. Numbers for Sherman county were not included in the state count.

Homelessness count: Indicates total number of individuals suffering from homelessness, including Emergency Shelter, Voucher, Transitional Housing, Unsheltered, and Turn Away counts.

Data Source: County data: Oregon Housing and Community Services, Oregon Point In Time Homeless Counts, <http://www.oregon.gov/ohcs/Pages/research-point-in-time-homeless-count-in-oregon.aspx>, State ranking data: National Alliance to End Homelessness, State of Homelessness, <http://www.endhomelessness.org/library/entry/soh-2012-chapter-one-homelessness-counts>

Geographic extent: State and County **Date of latest data download:** 03/12/2015

Home Ownership: Owner-occupied homes as a percentage of total occupied housing units.

Data Source: US Census Bureau, American Community Survey 5 year estimate, Selected Housing Characteristics, Table DP04, <http://factfinder2.census.gov/>

Geographic extent: State and county **Date of latest data download:** 03/12/2015

Immunized 2-Year-Olds: County data: Indicates percent of 2-3 year olds who have received the following doses of vaccinations: (4) DTaP; (3) IPV; (1) MMR; (3) Hib; (3) HepB; (1) Varicella; (4) PCV. State ranking data: Indicates percent of children aged 10 to 35 months receiving recommended doses of DTaP, polio, MMR, Hib, hepatitis B, varicella, and PCV vaccines.

Data Source: County data: Oregon Health Authority, Public Health, Prevention and Wellness, Vaccines and Immunizations, <http://public.health.oregon.gov/PreventionWellness/VaccinesImmunization/Pages/researchchild.aspx>, State ranking data: America's Health Rankings, Immunization, Children, United States, <http://www.americashealthrankings.org/ALL/Immunize>

Geographic extent: State and County **Date of latest data download:** 03/08/2015

Note: State and county ranking data vary by methodology and should be viewed with caution. Data from first and second manuals should be compared with caution as variable parameters may have changed.

Immunized Seniors crude: Indicates percentage of adults 65 and over who have received an influenza shot in the past year.

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=IM&yr=2013&qkey=8341&state=All>

Geographic extent: State and County **Date of latest data download:** 03/08/2015

Inadequate Prenatal Care: Indicates percentage of women who received less than 5 prenatal visits or care beginning in the 3rd trimester.

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Birth Data, Adequate Prenatal Care, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/birth/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 02/20/2015

Inadequate Social Support: Indicates percentage of adults without social/emotional support.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Income Inequality: Gini Coefficient: A measure of income inequality wherein the value of "0" would reflect perfectly equal distribution of income and "1" would indicate the most extreme income inequality (one person has all income and everyone else has none).

Data Source: US Census Bureau, American Community Survey 5 year estimate, Gini Index of Income, Table B19083: <http://factfinder2.census.gov/>

Geographic extent: State and County **Date of latest data download:** 02/05/2015

Infant Mortality Rate per 1,000: Indicates infant mortality rate per 1,000 live births (death occurring before age 1).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual

Reports, Volume 2, Chapter 7 Fetal and Infant Mortality, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/Pages/vol2.aspx>, State ranking data: America's Health Rankings, Infant Mortality, United States, <http://www.americashealthrankings.org/ALL/IMR>

Geographic extent: State and County **Date of latest data download:** 02/25/2015

Note: State and county ranking data vary by source and should be viewed with caution.

Influenza count: Indicates number of reported cases of haemophilus influenzae to Oregon Health Authority.

Data Source: Oregon Health Authority, Public Health, Diseases and Conditions, Communicable Disease, Communicable Disease Surveillance Data, Annual CD Surveillance Reports, Selected Cases, notifiable diseases by county, <http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/AnnualReports/Pages/arpt.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Note: Data from first and second manuals should be compared with caution as variable parameters may have changed.

Inmates Lacking GED or HS diploma: Indicates percentage of inmates lacking a GED or High School diploma.

Data Source: Oregon Health Authority, Public Health, About Public Health, Oregon State Health Profile, <http://public.health.oregon.gov/About/Pages/index.aspx>

Geographic extent: State only **Date of latest data download:** 02/26/2015

Intimate Partner Violence-Related Homicides: Indicates percentage of all homicides that were related to or the result of intimate partner violence.

Data Source: Oregon Health Authority, Public Health, Diseases and Conditions, Injury and Fatality Data, Oregon Violent Death Reporting System, Figure 14, <https://public.health.oregon.gov/DiseasesConditions/InjuryFatalityData/Pages/nvdrs.aspx>

Geographic extent: County only **Date of latest data download:** 03/03/2015

Life Expectancy at Birth female: Indicates life expectancy (in years) at birth for females.

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual Reports, Volume 2, Chapter 6 Mortality, Table 56, Life expectancy at birth and remaining years, at select ages by county and sex, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/Pages/vol2.aspx>, State ranking data: Kaiser Family Foundation, State Health Facts, Health Status, Life expectancy, Life expectancy at birth (in years), by gender, <http://kff.org/other/state-indicator/life-expectancy-by-gender/>

Geographic extent: State and County **Date of latest data download:** 03/01/2015

Note: State and county ranking data vary by source and should be viewed with caution.

Life Expectancy at Birth male: Indicates life expectancy (in years) at birth for males.

Data Source: County ranking: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual Reports, Volume 2, Chapter 6 Mortality, Table 56, Life expectancy at birth and remaining years, at select ages by county and sex, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/Pages/vol2.aspx>, State ranking data: Kaiser Family Foundation, State Health Facts, Health Status, Life expectancy, Life expectancy at birth (in years), by gender, <http://kff.org/other/state-indicator/life-expectancy-by-gender/>

Geographic extent: State and County **Date of latest data download:** 03/01/2015

Note: State and county ranking data vary by source and should be viewed with caution.

Limited Access to healthy foods: Percentage of population who have limited access to healthy food.

Data Source: County Health Rankings, County Rankings Data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: County and state **Date of latest data download:** 03/06/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Low Birth Weight Rate per 1,000: County data: Indicates rate of low birth weight (2,499 grams or less) per 1,000 births. State ranking data: Indicates percentage of infants weighing less than 2500 grams (5 pounds, 8 ounces) at birth.

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Birth Data, Birth weight, Low birth weight infants by county of residence, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/birth/Pages/index.aspx>, State ranking data: America's Health Rankings, Low birth weight, United States, <http://www.americashealthrankings.org/ALL/birthweight>

Geographic extent: State and county **Date of latest data download:** 02/25/2015

Note: State and county ranking data vary by source and methodology and should be viewed with caution.

Mammography: County data: Indicates percentage of women ages 50-74 years old who have had a mammogram within the past 2 years (age-adjusted). State ranking data: Indicates percentage of women aged 50 and higher who have had a mammogram within the past 2 years (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=WH&yr=2012&qkey=8491&state=All>

Geographic extent: State and County **Date of latest data download:** 02/12/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Median Household Income: Indicates median household income in dollars.

Data Source: United States Census, Small Area Income and Poverty Estimates, State and County Data Files, <http://www.census.gov/did/www/saipe/data/statecounty/data/index.html>

Geographic extent: State and County **Date of latest data download:** 03/26/2015

Mental Health Providers ratio to population: Indicates ratio of population to mental health providers.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Methamphetamine-Related Deaths count: Indicates number of methamphetamine-related deaths.

Data Source: Oregon State Police, State Medical Examiner, Drug related deaths, <http://www.oregon.gov/OSP/SME/Pages/index.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Note: Numbers for Baker, Benton, Crook, Curry, Gilliam, Grant, Harney, Jefferson, Lake, Malheur, Morrow, Sherman, Umatilla, Union, Wallowa, Wasco, and Wheeler counties were not included in the state count.

Minority Income as a % of White Income: Per capita income for all individuals who identify their race and ethnicity as anything other than Non-Hispanic White, as a percentage of the per capita income of Non-Hispanic Whites.

Data Source: Calculated from: US Census Bureau, American Community Survey 5-year estimates, Tables: B19313, B19313H, DP05, <http://factfinder2.census.gov/>

Geographic extent: State and County **Date of latest data download:** 03/13/2015

Note: Some counties have been omitted for extraordinarily high margins of error. Please contact the authors for margins of error.

Nitrate Risk in at Least One Public Water System: Indicates whether there is a nitrate risk in at least one public water system.

Data Source: Oregon Department of Environment Quality, <http://www.deq.state.or.us/wq/dwp/docs/PWSnitrateReport.pdf>

Geographic extent: County only **Date of latest data download:** 02/20/2015

Obese: County data: Percentage based on Oregon adults who are classified as obese (age-adjusted). State ranking data: Percentage based on a body mass index (BMI) of 30.0-99.8 (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=OB&yr=2013&qkey=8261&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Opioid-Related Deaths count: Indicates the total number of opioid-related deaths in Oregon.

Data Source: Oregon Health Authority, Provider Partner Resources, Public Health Accreditation, Documents, Indicators, Opioid related deaths, <https://public.health.oregon.gov/ProviderPartnerResources/PublicHealthAccreditation/Documents/indicators/opioidrelateddeaths.pdf>

Geographic extent: State only **Date of latest data download:** 03/03/2015

Oregon Health Plan Funding total: Indicates the Legislatively approved budget for the Oregon Health Authority's Medical Assistance Program (updated through December 2014) for the 2013-15 biennium.

Data Source: Oregon Health Authority, Center for Prevention and Health Promotion, <http://public.health.oregon.gov/PHD/Directory/Pages/Program.aspx?pid=5>

Geographic extent: State only **Date of latest data download:** 03/12/2015

Note: Budget information was not available on website, data was obtained by contacting the CFO, Policy and Budget Analyst.

Overweight: County data: Percentage based on Oregon adults who are classified as overweight (age-adjusted).

State ranking data: Percentage based on a body mass index (BMI) of between 25.0-29.9 (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=OB&yr=2013&qkey=8261&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Pap Smear: County data: Indicates percentage of women ages 21-65 years old with a cervix who have had a PAP test in the past 3 years (age-adjusted). State ranking data: Indicates number of women ages 18 and higher who have had a PAP test within the past 3 years (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=WH&yr=2012&qkey=8491&state=All>

Geographic extent: State and County **Date of latest data download:** 02/12/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Pertussis count: Indicates number of reported cases of Pertussis to the Oregon Health Authority.

Data Source: Oregon Health Authority, Public Health, Diseases and Conditions, Communicable Disease, Communicable Disease Surveillance Data, Annual CD Surveillance Reports, Selected Cases, notifiable diseases by county, <http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/AnnualReports/Pages/arpt.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Physical Activity: County data: Percentage of Oregon adults who reported meeting the CDC recommendations for physical activity (age-adjusted). State ranking data: Percentage of adults who participated in enough aerobic and muscle strengthening exercise to meet guidelines (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=PA&yr=2013&qkey=8291&state=All>

Geographic extent: County and state **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Population Estimate (Certified): Certified population estimates as of July 1st.

Data Source: Portland State University, College of Urban and Public Affairs, Population Research Center, Population Estimates, <http://www.pdx.edu/prc/population-estimates-0>

Geographic extent: County only **Date of latest data download:** 01/18/2015

Pregnant Women Served by WIC: Indicates percentage of all pregnant women served by the Women, Infants and Children nutrition program (WIC).

Data Source: Oregon Health Authority, Public Health, Healthy People and Families, WIC, <http://public.health.oregon.gov/HealthyPeopleFamilies/wic/Pages/annual.aspx>

Geographic extent: County only **Date of latest data download:** 03/11/2015

Preventable Hospital Stays per 1,000: Indicates number of hospital stays for ambulatory-care sensitive conditions per 1,000 Medicare enrollees.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>,

State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Primary Care Physicians ratio to population: Indicates ratio of population to primary care physicians.

Data Source: County Health Rankings, County data: <http://www.countyhealthrankings.org/rankings/data/OR>,

State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Salmonella count: Indicates number of reported cases of Salmonellosis to the Oregon Health Authority.

Data Source: Oregon Health Authority, Public Health, Diseases and Conditions, Communicable Disease, Communicable Disease Surveillance Data, Annual CD Surveillance Reports, Selected Cases, notifiable diseases by county, <http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/AnnualReports/Pages/arpt.aspx>

Geographic extent: County only **Date of latest data download:** 02/26/2015

Schools Meeting Phys Ed Requirements count: Indicates number of schools in Oregon meeting the physical education requirements (Requirement: K-5= 150 minutes, Grades 6-8= 225 minutes).

Data Source: Oregon Department of Education. Physical education legislative report on 2007 House Bill 3141,

<http://www.ode.state.or.us/teachlearn/subjects/pe/final-2013-14-pe-legislative-report.pdf>

Geographic extent: State only **Date of latest data download:** 03/09/2015

Sigmoidoscopy/Colonoscopy: County data: Indicates percentage of adults aged 50-75 years who have received a fecal occult blood test in the past year, or a colonoscopy within the past 10 years, or a sigmoidoscopy within the past 5 years (age-adjusted). State ranking data: Indicates percentage of adults aged 50 or higher who have ever had a sigmoidoscopy or a colonoscopy (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=CC&yr=2012&qkey=8531&state=All>

Geographic extent: State and County **Date of latest data download:** 02/12/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Smokeless Tobacco Use Among 11th Grade Males: Indicates percentage of 11th grade males who use smokeless tobacco.

Data Source: Oregon Health Authority, Public Health, Prevention and Wellness, Tobacco Prevention, https://public.health.oregon.gov/PreventionWellness/TobaccoPrevention/Documents/tobacco_facts/other_tobacco_products.pdf

Geographic extent: County only **Date of latest data download:** 02/26/2015

Stroke: County data: Percentage based on prevalence of strokes in Oregon adults (age-adjusted). State ranking data: Percentage based on adults who have ever been told they had a stroke (not age-adjusted).

Data Source: County data: Oregon Health Authority, Public Health, Birth and Death Certificates, Surveys, Adult Behavior Risk (BRFSS), Results by County, <http://public.health.oregon.gov/BirthDeathCertificates/Surveys/AdultBehaviorRisk/county/Pages/index.aspx>, State ranking data: Centers for Disease Control and Prevention (CDC), Office of Surveillance, Epidemiology, and Laboratory Services, Behavioral Risk Factor Surveillance System, <http://apps.nccd.cdc.gov/brfss/list.asp?cat=CH&yr=2013&qkey=8111&state=All>

Geographic extent: State and County **Date of latest data download:** 02/15/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Suicide Deaths age-adjusted rate per 100,000: Indicates rate of suicide deaths per 100,000 individuals (age-adjusted).

Data Source: County ranking: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual Reports, Volume 2, Chapter 6 Mortality, Table 47t, Age-adjusted death rates for selected causes by county/geographic region, <http://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/Pages/vol2.aspx> State ranking data: America's Health Rankings, Suicide, United States, <http://www.americashealthrankings.org/all/Suicide>

Geographic extent: State and County **Date of latest data download:** 03/08/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Supermarkets: Indicates percentage of households living within a ½ mile walking distance to grocery stores.

Data Source: Oregon Health Authority, Oregon Environmental Public Health Tracking, Environmental Justice, Community Design, Alcohol, Food and Tobacco, County, Food retailers, stores, grocery stores, <http://epht.oregon.gov/Index.aspx>

Geographic extent: County only **Date of latest data download:** 02/25/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Teen Pregnancy per 1,000: Indicates teen (ages 15-19) pregnancy rate per 1,000 females.

Data Source: Oregon Health Authority, Public Health, Birth and Death Certificates, Vital Statistics, Annual Reports, County Data Book, Table 15, Pregnancy rates of teens by county of residence, <https://public.health.oregon.gov/BirthDeathCertificates/VitalStatistics/annualreports/CountyDataBook/Pages/cdb.aspx>

Geographic extent: County only **Date of latest data download:** 03/01/2015

Tobacco Outlets count (excluding age-restricted establishments): Indicates number of tobacco outlets excluding age-restricted establishments such as bars, taverns, liquor stores, and smoke shops.

Data Source: Oregon Health Authority, Addictions and Mental Health Division, <http://www.oregon.gov/oha/amh/Pages/prevention.aspx>

Geographic extent: County only **Date of latest data download:** 03/13/2015

Note: Tobacco outlet count information was not available on website, data was obtained by contacting the Prevention Team Lead.

Town & City Walkability: Indicates number of intersections per net square mile within urban growth boundaries.

Data Source: Oregon Health Authority, Oregon Environmental Public Health Tracking, Environmental Justice, Community Design, Transportation, County, Walkability, Number of intersections, <http://epht.oregon.gov/Index.aspx>

Geographic extent: County only **Date of latest data download:** 02/25/2015

Note: Data from first and second manuals should not be compared as variable parameters have changed.

Unemployment: Percentage of the workforce that is unemployed, annual average. The workforce includes those working and those available and actively looking for work.

Data Source: State and County: Oregon Employment Department, Local Area Unemployment Statistics, Annual Average, not seasonally adjusted. County Rankings: Bureau of Labor Statistics, Local Area Unemployment Statistics, Series ID LAUST010000000000003 - LAUST560000000000003. <http://www.bls.gov/lau/>

Geographic extent: State and County **Date of latest data download:** 03/10/2015

Violent Crime per 100,000: Indicates number of reported violent crime offenses per 100,000 population

Data Source: County data: County Health Rankings, <http://www.countyhealthrankings.org/rankings/data/OR>, State Rankings Data: <http://www.countyhealthrankings.org/rankings/data>

Geographic extent: State and County **Date of latest data download:** 03/25/2015

Work-Related Deaths count: County data: Indicates number of work related deaths. State ranking data: Indicates number of fatal occupational injuries in construction, manufacturing, trade, transportation, utilities, professional, and business services per 100,000 workers.

Data Source: County data: Oregon Health & Science University, Oregon Fatality Assessment and Control Evaluation (OR-FACE) Program, <http://www.ohsu.edu/xd/research/centers-institutes/oregon-institute-occupational-health-sciences/outreach/or-face/index.cfm>, State ranking data: America's Health Ranking, Occupational Fatalities, United States, <http://www.americashealthrankings.org/ALL/WorkFatalities>

Geographic extent: State and County **Date of latest data download:** 02/26/2015

Note: State and county ranking data vary by methodology and should be viewed with caution.

Years of Potential Life Lost (YPLL) per 100,000: Indicates years of potential life lost (premature death) before age 75 per 100,000 population (age-adjusted).

Data Source: County data: County Health Rankings, <http://www.countyhealthrankings.org/rankings/data/OR>, State ranking data: America's Health Rankings, Premature Death, United States, <http://www.americashealthrankings.org/ALL/YPLL>

Geographic extent: State and County **Date of latest data download:** 03/25/2015
