Welcome to the Webinar on Shared Plans of Care

• As you arrive, please sign in to the webinar, listing
  – your name,
  – how many people are in your party,
  – and what county you’re from
  – (if you have already signed in, please enter this information into the text box)

• Please mute your phone when not actively participating in conversation.
  – Unmute your phone to ask questions.
  – If listening on your computer, please mute your mic to prevent echoes.
  – Don’t put us on hold! That usually causes music to play that everyone has to listen to....

• When speaking, be sure to identify yourself.
  – If it’s difficult to find space to talk, please use the chat box.

• This webinar will be recorded for note taking purposes, but will not be shared outwardly or posted online.
Agenda

• Introductions

• Housekeeping
  – Regional Meetings

• Last month’s topic: *Engaging with Primary Care*

• This month’s topic: *Health Literacy and Shared Plans of Care*

• Open discussion

• Closing and reminder of next steps
OCCYSHN Regional Meetings

We are hoping for lots of participation, so please invite your local partners to register! This includes *all* local professionals who work with CYSHCN.

- “Save the Date” was sent out in early January.
- Invitational flyers for the Portland Metro and Roseburg OCCYSHN Regionals, including the final agenda and information about logistics and financial support, have recently been emailed to all SPOC participants.
Last Month’s Webinar Topic

• Engaging with Primary Care

• Questions/Thoughts?
This Month’s Webinar Topic

Health Literacy and
Shared Plans of Care

Gillian Freney
OCCYSHN Communications Coordinator
Health Literacy

“Health literacy is the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions.”

- Healthy People 2020
  U.S. Department of Health and Human Services
Culturally & Linguistically Appropriate Services (CLAS)

National CLAS Standards are intended to advance health equity, improve quality, and help eliminate health care disparities.

Principle Standard

Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs.

https://www.thinkculturalhealth.hhs.gov/clas/standards
Impacts on Health Outcomes

People with low health literacy skills:

- are **sicker** when they seek care
- are more likely to have **chronic conditions**, and are less able to manage them.
- have more **preventable hospitalizations**
- **pay more** for health care
- are significantly more likely to say their **health is poor**
- are more likely to **feel shame** about their ability to understand and use health information.

[https://health.gov/communication/literacy/quickguide/factsliteracy.html](https://health.gov/communication/literacy/quickguide/factsliteracy.html)
35% of adults in the U.S. were identified as having serious limitations in health literacy skills. Only 12% were considered proficient.

Some populations at risk for low health literacy:

- racial and ethnic minorities
- did not complete high school
- low income
- limited English proficiency

“Of all the forms of inequality, injustice in healthcare is the most shocking and inhumane.”

—Martin Luther King Jr., 1966
What can be done?

Health Literacy
Universal Precautions

Using Universal Precautions

Assume EVERYONE has limited health literacy.

• You can’t tell by looking.
• Higher literacy skills ≠ understanding.
• Anxiety can reduce ability to manage health information.
• Everyone benefits from clear communication.
Tip #1 for Better Communication

Plain Language
Enemies of Plain Language: Human Nature

• Old habits die hard.
• People want to be smart.
• People want to be kind.
Enemy of Plain Language in SPOC: Initials and Acronyms

- SPOC
- IEP
- DD
- SLP
- EI/ECSE
- ESD
- PT/OT
## Enemies of Plain Language: Jargon

<table>

ORIGINAL “Health literacy is the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions.”

REVISED “Health literacy means people can find and use the information they need to manage their health.”
How was school today?

Fine
## Open-Ended Questions

**Good Starts:** what, describe, why, how, tell me about…
**Bad Starts:** who, when, are, did, will, would

<table>
<thead>
<tr>
<th>Closed-ended questions</th>
<th>Open-ended alternative</th>
</tr>
</thead>
<tbody>
<tr>
<td>Would Anna benefit from counseling, in your opinion?</td>
<td>What do you think about the possibility of counseling for Anna?</td>
</tr>
<tr>
<td>Who can check Jose’s blood sugar levels at home?</td>
<td>Tell me about checking Jose’s blood sugar at home? What does that usually look like?</td>
</tr>
<tr>
<td>Are you in agreement with this SPOC recommendation?</td>
<td>How do you think your family could make this recommendation work?</td>
</tr>
</tbody>
</table>

*https://www.wikihow.com/Ask-Open-Ended-Questions*
Do you have any questions?

What questions do you have?
Cultural Humility

It’s an attitude, not a destination.
Cultural Humility

- approach others with openness to learning from them.
- start with questions rather than assumptions.
- strive to understand rather than to inform.

Speaking of listening instead of talking....

• Do you have strategies for making families feel comfortable in SPOC meetings?
• Anyone want to share an experience where health literacy or cultural issues played a part in SPOC?
• Other thoughts?
Open Discussion
Next scheduled webinar

Our next SPOC webinar will take place on Thursday, April 19, 2018.

The topic will be *Addressing Transition Goals.*
Thanks for joining us!
