FAMILY MEDICINE

Family Medicine Elective Offerings

Sub-internships

FAMP 709A Sub-Internship Family Medicine: An intensive, rigorous experience in which students spend two weeks on inpatient service and two weeks in one of the OHSU FM outpatient clinics. Sub-interns will be given opportunities to demonstrate skills at the level of an incoming intern.

FAMP 709L Rural Sub-I Family Medicine – Campus for Rural Health – Klamath Falls: Students will spend one week on the inpatient wards and have the option of doing one week of maternal and newborn care at the Sky Lakes Medical Center. The remaining time will be in clinic at the Cascades East Family Practice under a faculty or resident preceptor.

FAMP 709W Sub-I Family Med at Southwest Washington Medical Center: Students will spend the mornings rounding on patients and afternoons in the outpatient clinic. Students will do one brief presentation per week to the Family Medicine team and may elect to round with the adult internal medicine service on 2-4 mornings during their rotation.

FAMP 709P Sub-I Family Med at Providence Milwaukie: Students will spend two weeks on inpatient service and two weeks at either PMG Milwaukie Clinic or PMG SE Clinic. During inpatient service students will take two overnight calls and participate in admissions with Providence hospitals. In clinic, students will work with a senior resident or faculty preceptor, seeing a wide variety of patients independently and observing or being observed by their preceptor.

OHSU Family Medicine

Elective Offerings

OHSU Family Medicine's award-winning program exposes students to real-world experiences that allow them to dig deep into the family medicine specialty.

The program allows students to put into place the knowledge they have acquired in the classroom. Students develop leadership skills and enhanced clinical skills that they carry with them for the rest of their career.

Four-Week Electives

FAMP 709AB Family Medicine Inpatient: Students will learn how access, continuity, care coordination, and psychosocial factors affect the health of individuals and families and learn how to apply these factors to the care of individuals in the Family Medicine inpatient setting. Students will be able to use their knowledge and clinical reasoning skills to perform basic history and physical examinations, develop differential diagnoses, order and interpret diagnostic studies, and devise basic treatment plans in the care of adult, pediatric and potentially obstetric patients with a wide range of acute, chronic, and multi-organ system disease.

FAMP 709D Community Family Med - PeaceHealth Sacred Heart: This will provide a community experience with a Family Medicine/Osteopathic physician clinic in Eugene, OR. Students will spend time with mostly chronic disease management, osteopathic manipulative treatment, or preventative care and as much as possible will be given opportunities to demonstrate skills at the level of an incoming intern.

FAMP 709J Sports Medicine - PeaceHealth Sacred Heart: Students will actively participate in patient care in the Slocum Center for Orthopedics and Sports Medicine in Eugene, OR. Clinically oriented with emphasis placed on examination techniques and the diagnosis and treatment of common orthopedic and sports injuries. Students will participate in both surgical and non-surgical approaches to injuries.

FAMP 709KF Rural Inpatient Family Med – Campus for Rural Health – Klamath Falls: Students will develop clinical diagnosis, reasoning and communication skills in the care of adult patients with a range of acute and chronic, multi-organ system disease in the hospital setting. Students will focus on quality improvement and patient safety.

FAMP 709M Integrative Medicine Clinic: Students will gain an understanding of integrative medicine, gain confidence in the ability to access information resources for knowledge of complementary and alternative medicine modalities, and choose one complementary and alternative practice or topic for in-depth study and understanding.

FAMP 709NA Native American Family Medicine: Students will gain a greater understanding of Native American health within a clinical family medicine environment and attend culturally immersive experiences that will help them better understand unique cultural and socioeconomic components of tribal health. Students will rotate within the Portland-metro based Native American Rehabilitation Association (NARA) clinic sites.

FAMP 709ST Rural Hospice - St. Charles Prineville: This is a high intensity and rigorous elective experience. Students are assigned a five-patient panel and will be expected to see their patients on a regular basis with the hospice medical director, pastoral, social workers, and nursing staff. Students will be actively involved in constructing and revising each patient's plan of care while exploring the psychological, spiritual, and ethical issues at the end of life care.

FAMP 709T Focused Clinical Elective: This elective is for students who wish to augment their family medicine experience with additional clinical experience or add exposure to outpatient clinical care. Students will learn about the patient centered medical home, population health and the role of the physician in health policy advocacy and care for patients of all ages in an ambulatory clinic. There are multiple clinical site options for this elective.

Additional elective information and availability at: <https://goo.gl/bBHITH>

FAMP 709U Rural Integrative Behavioral Health: Students will gain a better understanding of both the availability of resources and the delivery system of mental health services in a community mental health and justice system. Students will work closely with an inter-professional team of family medicine behavioral health consultants such as LCSW's, doctoral students, consulting psychiatrists, community mental health agencies, parole and probation officials, and child abuse assessment center staff.

FAMP 741R Rural Family Medicine (8 weeks, Continuity): This is a robust clinical experience working with family physicians in rural Oregon. Students will learn rural patient care in an environment that encourages hands-on problem solving at the site and use of electronic information resources.

Two Week Electives

FAMP 709S Sports Medicine – OHSU: This is a clinically oriented elective with an emphasis on physical examination techniques, the diagnosis and treatment of musculoskeletal injuries, and the care of athletes. Opportunities may exist for the student to participate with their attending physicians at PSU, Lewis & Clark College sports medicine clinics and events.

FAMP 710R Rural Family Medicine Experience: This elective enables students to become more familiar with office-based and community health care in a rural setting. Learners will be able to build on clinical skills, including history taking and patient exam. Student will stay with family physician and their family during the two week immersive experience as they explore life as a family medicine physician.

FAMP 710B : Reproductive Health in Family Medicine: Focus on the student's development of knowledge and skills in the area of women's reproductive health, for example contraception, routine clinical preventive services, early pregnancy ultrasound, and abortions. The elective will allow the student to explore the breadth of women's healthcare services provided to patients in a Family Medicine outpatient setting.
