

Reducing medication errors

PROJECT PLAN OVERVIEW:

After educating staff on the known challenges of medication passing, the impact of med errors on the elderly population, and the facility's current ratings in comparison to state data:

- Quality Board established; daily monitoring initiated.
 - Idea Board
 - Care Calendar
 - Clock Diagram
 - Abnormality/Barrier Tracker
- Training plan created with assistance from frontline staff and leadership.
- Training and education continuously provided in real time, as abnormalities or barriers were discovered.
- After one month:
 - Review data and assess for potential patterns and responses to rapid actions and education.
