Additional readings will be made available through the Sakai learning platform.

Course Description

This course reviews how governmental and non-governmental organizations influence healthcare delivery. Special emphasis is placed on current regulatory and legislative initiatives. Participants gain an increased understanding of the federal and state regulatory/reporting framework within which healthcare is delivered and the role of accreditation bodies within that framework. The course provides examples of the evolution of new legislative initiatives, both at the federal and state level, in order to demonstrate the complexity and impact of regulatory oversight on healthcare delivery. Guest lecturers provide the perspectives of experienced authorities in areas such as Risk Management, Legislation, Environmental Safety, Healthcare Law, Internal Audit, Medicare Reimbursement, and/or Healthcare Compliance.
