Strategic Goals

OCTRI supports investigators, administrators and research staff with expertise, equipment and facilities for every stage of the research process. We have been accelerating discoveries towards better health since 2006.

CATALYZE TRANSLATIONAL RESEARCH
- Catalyze discoveries across the human lifespan.
- Provide strategic and operational support to translate research.
- Identify and support research across the translational spectrum.
- Facilitate commercialization and implementation.

DEVELOP THE TRANSLATIONAL WORKFORCE
- Implement innovative research career pathways.
- Broaden the trained clinical and translational research competencies.
- Integrate career development efforts across the CTSA consortium.

CULTIVATE INNOVATION IN RESEARCH
- Investigate and remove barriers to translational research.
- Enhance and speed administrative research processes.
- Develop new methods that improve translational research.
- Disseminate and facilitate adoption and maintenance of innovative methods.

FOSTER & SUPPORT SCIENTIFIC COLLABORATION
- Stimulate trans-disciplinary research.
- Build and participate in cross-CTSA collaborations.
- Create and support private-public partnerships.
- Develop and apply informatics methods to catalyze OHSU and CTSA consortium collaborations.

ENHANCE PARTNERSHIPS WITH COMMUNITIES
- Incorporate community in all phases of research.
- Build capacity for community-based research.
- Increase the portfolio of community-based research among OCTRI, OHSU, and their partners.
- Broaden community participation in OCTRI planning and implementation.
