

Oregon Parent Child Interaction Therapy Programs 2018

Parent Child Interaction Therapy (PCIT) is a therapeutic intervention intended for children ages 2 through 6 years, and their parents. It is nationally recognized as one of the most effective treatments for young children experiencing significant social, emotional, or behavioral problems. 85% of Oregon families who participate in 4 or more PCIT therapy sessions demonstrate improvement in child behavior, positive communication and positive parenting skills. The average length of treatment is 16 sessions.

In PCIT, caregivers are taught specific skills to establish or strengthen a nurturing and secure relationship with their child, while encouraging pro-social behavior and decreasing maladaptive behavior. Ideally, during coaching sessions, the therapist observes the interaction from behind a one-way mirror and provides guidance to the parent through a wireless communication system.

PCIT services may be reimbursed by Medicaid or Commercial Insurance.

Location(s)	Contact	Agency
Albany -2730 Pacific Blvd. SE	(541) 967-3866	Linn Health Services, Willamette Health Center
