

Request Outreach or Training

At the Avel Gordly Center for Healing part of our mission is to provide education and awareness for the African American and African communities about issues of mental health and addictions. We also provide trainings for other healthcare and social service providers about sensitive and culturally responsive treatment for African-Americans.

We can speak about particular topics, and provide information about resources and referrals for help with these concerns:

- Depression
- Anxiety
- Trauma
- Substance use

Afrocentric Approaches to Clinical Practice

We offer a training called “Afrocentric Approaches to Clinical Practice” that is approximately 6 hours long, but can be offered in components at a minimum of 3 hours. We can also come to academic settings and provide 60 – 90 minute customized lectures for students. If you would like a training on culturally responsive care for African-Americans, please fill out the form below and we will get in touch with you.

If you would like to set up a training, a speaker at an event or would like us to bring information to an event or health fair, please fill out the form below and we will get in touch with you.
