

Tricuspid Valve Atresia and Stenosis

Tricuspid atresia (trī-'kəs-pəd 'valv ə-'trē-zhə) is a rare congenital heart defect (the baby is born with it) where the valve that controls blood flow from the right upper chamber of the heart to the right lower chamber of the heart doesn't form at all. In babies with this defect, blood can't flow correctly through the heart and to the rest of the body. Read more about Tricuspid Atresia at the Center for Disease Control and Prevention's website tinyurl.com/y98ogajy.
